

Appendix N — Wider Founding Team CVs

Supporting Appendix to the DEQUAD Envestors Submission

Beyond the two named co-founders (Yusuf Quadri, CEO; Yusuff Adeagbo, CTO), DEQUAD is joined at incorporation by three senior team members who bring deep functional expertise across marketing, engineering and programme delivery. Each has accepted an EMI share-option grant; none is taking a cash salary in Year 1, materially strengthening the leadership profile without increasing cash burn.

N.1 — Dr Gerald Marfo · Chief Marketing Officer

Field	Value
Role at DEQUAD	Chief Marketing Officer (founding team member)
Working pattern Y1	Part-time, EMI-vesting; full-time and salaried from Y2 once seed closes
Cash investment	£0 — joining as senior team member, not as a share-capital founder
Equity	EMI options with 4-year vest, 1-year cliff

Summary

Dr Gerald Marfo holds a **PhD in Digital Marketing** and brings academic-level rigour to DEQUAD's marketing strategy. His remit covers brand positioning, the UK go-to-market plan (universities and students in parallel), measurement frameworks (CAC, LTV, conversion analytics) and channel selection across organic, paid, content and partnerships.

Why this matters for DEQUAD

- DEQUAD operates a two-sided market — universities (B2B) and students (B2C). A PhD-credentialled CMO is uniquely placed to design measurement that ties consumer-funnel signals back to institutional-buyer outcomes.
- Universities now require evidenced wellbeing strategies (UUK Mental Health Charter); Gerald's academic background lends additional credibility in the sales conversation.
- He owns the Y1 marketing-spend allocation across the channels in Section 16 of the business plan.

Responsibilities

- Brand strategy, positioning and messaging architecture
- UK university partnership marketing (PR, events, UUK channel)
- Performance marketing strategy across Instagram, TikTok, Google Search, LinkedIn
- Marketing measurement and dashboarding; CAC discipline
- Mentoring the first marketing hire (Q3 Y2)

N.2 — Adedapo Ajuwon · Senior Software Engineer

Field	Value
Role at DEQUAD	Senior Software Engineer (founding team member)
Working pattern Y1	Part-time / contributor with the CTO; full-time and salaried from Q3 Y1 once pre-seed lands
Cash investment	£0 — joining as senior team member
Equity	EMI options with 4-year vest, 1-year cliff

Summary

Adedapo Ajuwon is a senior software engineer working alongside the CTO on the DEQUAD production stack. He contributes to both backend (FastAPI / MongoDB) and frontend (Expo / React Native universal) development, infrastructure, and operational reliability.

Responsibilities

- Production reliability and performance of the DEQUAD platform

- Feature delivery in collaboration with the CTO — peer matching, mood tracker, safeguarding webhook, admin tooling
- Code review and engineering standards across the team
- Mentoring the next backend engineer hire (Q1 Y2)

N.3 — Chinyere Jennifer · Senior Advisor — Programme & Delivery

Field	Value
Day job	Senior Project Management Consultant, MIGSO-PCUBED (global project, programme and portfolio management consultancy)
Role at DEQUAD	Senior Advisor — Programme & Delivery
Working pattern Y1	Advisory capacity — periodic engagement
Cash investment	£0
Equity	EMI options on a 4-year vest, advisor allocation

Summary

Chinyere Jennifer is a Senior Project Management Consultant at MIGSO-PCUBED, one of the world's leading project / programme / portfolio management consultancies (a Capgemini company). She works with large enterprise clients on programme governance, risk and delivery assurance. She also has an applied background in **Large Language Model (LLM)** technology, giving DEQUAD an in-house perspective on the safeguarding and inference pipeline.

Responsibilities to DEQUAD

- Programme governance for university pilot rollouts
- Quarterly risk-register review challenge (see Risk Register, Governance section)
- LLM safety and evaluation input to the safeguarding triage model
- Introduction to MIGSO-PCUBED's enterprise network for B2B pilot acceleration

Why this matters for endorsement

For Envestors, the wider team materially strengthens the **viability** evidence:

Dimension	Evidence
Marketing capability	PhD-credentialled CMO with relevant subject-matter expertise
Engineering depth	CTO + senior software engineer at incorporation — not a solo technical founder
Programme governance	Senior consultant from a global PMO firm advising on delivery quality
AI / LLM credibility	Advisor with LLM background — directly relevant to safeguarding inference
Diversity	Founding team is 100% Black-British / African-diaspora — under-represented in UK tech, but central to the student population DEQUAD serves

Three appointments to a founding team alongside two co-founders is unusually deep for a pre-revenue UK startup and is itself evidence of the team's ability to attract talent on belief in the mission.

Prepared for Envestors as Appendix N to the Innovator Founder visa endorsement application — February 2026.
