The numbers you must know cold

Question they'll probe	Your answer
Founder capital invested	£6,000 total — £3,000 each founder, evidenced by Form SH01 at incorporation
Business start date	15 June 2026 (incorporation; trading month M1 = June 2026)
Revenue forecast	Y1 £11,988 → Y2 £185,808 → Y3 £699,280
University price point	From £12,000/yr SaaS (vs Togetherall ~£40k, TalkCampus ~£25k)
Premium price	£4.99/month via Stripe — live and processing today
Gross margin	88% (Y1) → 92.3% (Y3)
Pre-seed raise	£150,000 in Dec 2026 (M7) at £1.2m post-money (12.5%) — timed AFTER pilot completes
Seed raise	£750,000, Q2 Y2 at £6m post
Pilot dates	Sep–Nov 2026 (M4–M6) , 12-week no-fee pilot at University of Bedfordshire; conversion talks from Dec 2026 (M7)
Profitability	Operating profit positive from Q3 Year 3 (£61,520 Y3 operating profit)
UK jobs	2 → 6 → 12 across three years, all UK-based, EMI options
Market size	TAM £86m/yr UK · SAM £28m · SOM £3.4m ARR by Y5
In-kind support	NatWest Accelerator: £31,100/yr (office, legal, accountancy) — why £6k lasts 6 months
Y1 monthly burn	£750–£1,400/mo pre-seed; positive closing cash every month of Y1

The three criteria — 30-second answers

INNOVATION — "DEQUAD is the only UK platform combining `.ac.uk`-verified peer matching, daily wellbeing telemetry and machine-assisted safeguarding triage that escalates to the university's safeguarding lead via webhook. Togetherall is anonymous, TalkCampus has no triage, UniBuddy is pre-enrolment, Bumble/Discord have no verification or safeguarding. I designed the triage myself — I file real safeguarding referrals weekly as a Recovery Coordinator at Change Grow Live."

VIABILITY — "The product is already live at dequad.co.uk with ~50 beta users across 3 universities — build risk is retired. Two banks validated us competitively: Santander Pre-Incubator (2025) and NatWest Accelerator (March 2026). Our anchor pilot is Bedfordshire, where I was SU President for two years managing a £900k budget. Cash is positive every month of Y1 on £6k."

SCALABILITY — "Software-only, 92% gross margin. Each university onboards in 6 weeks; we model just 14 of 285 UK institutions by Y3 — under 5% penetration. Then 42 NHS ICBs at £20k+, and internationally the model maps to .edu and .edu.au domains — £180m TAM."

Hard questions & honest answers

- **"Only £6,000 — is that serious?"** → "The expensive part — engineering — is done and contributed as founders' work-product. NatWest covers office/legal/accountancy (£31k in-kind). £6k covers incorporation, IP and hosting for 6 months with positive cash every month. The £150k pre-seed lands only after the pilot delivers evidence."
 - **"What if Bedfordshire doesn't convert?"** → "Y1 assumes ONLY 0.5 institutions convert; every other pilot is modelled at 0%. Premium subscriptions (£5,988 Y1) are independent of B2B. Two further pilots are scoped as pure upside."
 - **"What if Togetherall copies you?"** → "They'd have to abandon anonymity — their core product architecture. Our moat is verification + institutional webhook + practitioner-designed triage, and 12–18 months of head start."
 - **"Safeguarding incident risk?"** → "Every automated flag routes through human review; escalation policy is modelled on UUK Suicide-Safer Universities and my daily CGL practice. Full playbook in the Risk Register (Appendix L). OSA-2023 risk assessment and DPIA are already written and shipped."
 - **"Are you full-time?"** → "Yes — full-time on DEQUAD as my sole UK business upon endorsement, with a signed commitment undertaking (Appendix C). My co-founder Yusuff Adeagbo (CTO, MSc IT) is equally committed."
 - **"Who's on the team beyond you two?"** → "Dr Gerald Marfo (CMO, PhD Digital Marketing), Adedapo Ajuwon (Senior Engineer), Chinyere Jennifer (Advisor, MIGSO-PCUBED) — all equity-only. Nobody draws a salary until the pre-seed."
