

UKES Submission Cover Email

This is the **cover email** that accompanies the formal endorsement-application submission to **UK Endorsement Services Ltd (UKES)** for the Innovator Founder visa route. It is sent the moment the assessment fee is paid and the full document pack is uploaded to the UKES portal (or attached to the email, depending on UKES's stated submission method at the time of filing).

Send from `quadri.yusuf@dequad.com` — the company's UK business domain. Use plain UK English, no marketing tone, no hype words. Brief and verifiable.

Cover Email — Formal Submission

To: info@ukendorsement.com **CC:** yusuff@dequad.com (CTO co-founder) **Subject:** Innovator Founder endorsement submission — DEQUAD Ltd (Yusuf Quadri, lead applicant)

Dear UK Endorsement Services team,

I am writing to formally submit my application for an **Innovator Founder endorsement** under your assessment.

Applicant: Yusuf Quadri (lead applicant) **Co-applicant:** Yusuff Adeagbo (CTO) **Business:** DEQUAD Ltd — UK-headquartered student-wellbeing software platform **Live product:** <https://dequad.co.uk> **Business start date:** 18 August 2026 (incorporation, Company No. 17405964) **Applicant contact:** quadri.yusuf@dequad.com · 07928132617 · <https://www.linkedin.com/in/quadri-yusuf/> **Submission date:** [insert date] **Assessment fee:** Paid in full — payment reference [insert reference]

How DEQUAD meets the three Home Office criteria

1. **Innovation.** DEQUAD is the only UK platform combining `.ac.uk` -verified peer matching, daily wellbeing telemetry and machine-assisted safeguarding triage in a single product. The safeguarding webhook escalates risk signals to a university's Designated Safeguarding Lead in under 60 seconds — a capability no incumbent (Togetherall, TalkCampus, UniBuddy) offers.

2. **Viability.** The MVP is already live in production with 20 verified beta users at the University of Bedfordshire (10 daily-active). The safeguarding pipeline was designed by the lead applicant, a practising safeguarding professional — currently a Recovery Coordinator at Change Grow Live (safeguarding referrals, dynamic risk assessment, multi-agency working) with concurrent NHS mental-health experience at East London NHS Foundation Trust. I am in early, informal conversation about a possible pilot at the **University of Bedfordshire** — no agreement, LOI or date is signed, and nothing is guaranteed; a 12-week window has been proposed for **M4–M6** as a target only. The 3-year plan is entirely self-funded: £6,000 of founder capital plus revenue, with no institutional revenue assumed in Year 1 and no pre-seed, seed or other external investment assumed anywhere. Cash flow remains positive every single month of Year 1 on that basis alone, supported by £31,100 of in-kind benefits from the NatWest Accelerator (London) in Year 1.
3. **Scalability.** Three-year UK revenue forecast £0.15k → £16k → £48k, deliberately conservative and self-funded, growing from 2 unpaid founders to 3 people (c.2.5 FTE) by Year 3 in the base case — no external funding round is assumed to enable this growth. Job-creation target: 5 people (3 full-time hires, average salary £25,000/year, each sustained at least 12 months) once institutional revenue scales after pilot conversion, funded entirely from that revenue and meeting the Innovator Founder settlement job-creation criterion. University pricing is a simple **£2 per enrolled student per year** — roughly half the effective per-student cost of the closest incumbent. The business model is software-only (gross margin reaching ~87% by Year 3) and addresses a £28m UK SAM, with international expansion (£180m TAM) treated as a longer-term ambition beyond this 3-year plan, not an assumption within it.

Document pack enclosed

The full submission pack is attached as a single merged PDF

([DEQUAD_UKES_FULL_SUBMISSION.pdf](#)), together with the individual files referenced in the table of contents and the financial model in Excel format. Specifically:

#	Document	File
1	UKES Business Plan (full, 19 sections, v5.0 — self-funded 3-year revision, August 2026)	DEQUAD_UKES_Business_Plan.pdf
2	Decision-Maker Brief (17-page short-track companion)	DEQUAD_UKES_Decision_Brief.pdf
3	Pitch Deck (13 slides)	DEQUAD_Pitch_Deck.pdf
4	Financial Model (14-sheet Excel workbook, self-funded 3-year model plus illustrative job-creation upside case)	DEQUAD_Financial_Model.xlsx
5	Risk Register	DEQUAD_Risk_Register.pdf
6	Founder CVs (Yusuf Quadri, Yusuff Adeagbo)	B_founder_cv.pdf , B_cofounder_cv.pdf
7	Wider team CVs (Dr Gerald Marfo, Adedapo Ajuwon, Chinyere Jennifer)	N_wider_team_cvs.pdf
8	Safeguarding certifications	O_safeguarding_certifications.pdf
9	Founder academic certificates	A_founder_academic_certificates.pdf
10	Personal commitment & undertaking	C_personal_commitment_undertaking.pdf
11	Wellbeing baseline methodology	D_wellbeing_baseline_methodology.pdf
12	Data Protection Impact Assessment	E_dpia.pdf
13	Online Safety Act 2023 compliance memo	I_online_safety_act_compliance.pdf
14	Architecture diagram	J_architecture_diagram.pdf
15	Product screenshots	K_product_screenshots.pdf
16	Job description (base-case hire) plus the plan's three-hire job-creation target, Year 3	G_job_descriptions.pdf
17	University Letter of Interest template	H_university_letter_of_interest_template.pdf

Validation evidence

- **Santander Universities Pre-Incubator** — completed 2025.
- **NatWest Accelerator (London cohort)** — joined 16 March 2026, currently active.

- **University of Bedfordshire** — early, informal pilot conversation only; nothing signed.
Lead founder is the institution's former Student Union President (2021–2023).

Live product access

The DEQUAD platform is live at <https://dequad.co.uk>. I am happy to provide a read-only admin demo account to the assessment team on request so you can interact with the safeguarding pipeline, mood-tracker and admin verification queue first-hand.

What I am requesting

A written endorsement decision under UKES's published assessment process. I have priced the assessment fee in to this submission and will respond to any clarification questions promptly. My preferred channel for follow-up is email; I can also dial in for a video call at any time UK business hours.

I am fully UK-resident, hold the right to remain pending the Innovator Founder visa decision, and will commit to DEQUAD full-time as my sole UK business.

Thank you for considering this submission.

Kind regards,

Yusuf Quadri Founder & CEO, DEQUAD Ltd quadri.yusuf@dequad.com ·
<https://dequad.co.uk> 07928132617 · <https://www.linkedin.com/in/quadri-yusuf/>

Notes for the applicant (do not send)

- Replace [insert date] and [insert reference] immediately before sending — these are the ONLY two placeholders left in this email.
- Send from quadri.yusuf@dequad.com (not a personal gmail address — UKES screens for business-domain alignment).
- Attach [DEQUAD_UKES_FULL_SUBMISSION.pdf](#) (the merged master) plus [DEQUAD_Financial_Model.xlsx](#) . Individual PDFs only on request to keep the submission email under 25 MB.
- If UKES's portal accepts uploads, paste the table of contents into the cover note field and upload all files individually so the assessor can navigate them.
- Keep the body to one screen. UKES assessors do not need to be persuaded a third time after reading the Business Plan and Decision Brief — this email is a clean handoff.

DEQUAD — Decision-Maker Brief

UKES Endorsement (Innovator Founder Visa) · Short-Track Review

17-page brief. Companion to the full Business Plan ([DEQUAD_UKES_Business_Plan.pdf](#)) and the Financial Model ([DEQUAD_Financial_Model.xlsx](#)). Use this document to assess endorsement readiness in 20 minutes.

At-a-glance

Business start date	18 August 2026 (incorporation)
Entity	DEQUAD Ltd (Company No. 17405964, incorporated in England & Wales)
Founders	Yusuf Quadri (CEO) + Yusuff Adeagbo (CTO)
Wider founding team	Dr Gerald Marfo (CMO, PhD Digital Marketing) · Adedapo Ajuwon (Senior SWE) · Chinyere Jennifer (Senior Advisor — MIGSO-PCUBED PM)
HQ	London — NatWest Accelerator (joined 16 March 2026)
Prior validation	Santander Universities Pre-Incubator — completed 2025
Founder anchor	Yusuf Quadri served as University of Bedfordshire SU President 2021–2023
MVP	Live in production at https://dequad.co.uk
Beta users	20 verified accounts at University of Bedfordshire (10 daily-active, 6-week retention)
Pilot status	Early, informal conversation with University of Bedfordshire — nothing signed, nothing guaranteed
Starting cash	£6,000 (£3,000 from each of 2 founders) — the only funding assumed anywhere in this plan
In-kind support	£31,100/yr from NatWest Accelerator (office, legal, accountancy, mentoring), Y1 only
External funding ask	None. This is a self-funded 3-year plan; no pre-seed, seed or other investment is required or assumed
3-yr revenue	£0.15k → £16k → £48k
3-yr UK jobs	Base case: 2 (unpaid founders) → 2 (unpaid founders) → 3 people / c.2.5 FTE, entirely self-funded. Job-creation target: 5 people (3 full-time hires, avg. £25,000/yr, each 12+ months) once revenue scales after pilot conversion — meets the Innovator Founder settlement job-creation criterion
Profitability	Modest trading loss in Y1 (£4.1k), profitable from Y2 — no break-even "event" needed since no external funding is assumed
Endorsement criteria met	✅ Innovation · ✅ Viability · ✅ Scalability

Page 1 — The 60-second pitch

One sentence: DEQUAD is the closed-network student wellbeing platform that gives UK universities early warning before students fall through the cracks — verified `.ac.uk` peer matching, daily mood tracking and machine-assisted safeguarding triage in a single product.

Why now:

1. **Loneliness is the new student health crisis** — 54% of UK undergrads report frequent loneliness (ONS 2023). Post-pandemic levels remain 18 ppt above baseline.
2. **The Office for Students introduced a statutory student-mental-health condition in 2023** — every UK university now has to evidence proactive prevention. Existing tools (Togetherall, TalkCampus) are reactive.
3. **The Online Safety Act 2023 is in force** — any platform with student users needs compliant risk-assessment and reporting flows. DEQUAD ships with these built in.

Why us:

1. **MVP is already shipped** — production deployment at `dequad.co.uk`, identity verification live, safeguarding webhook live, mood tracker live, Stripe billing live.
2. **Two independent UK-bank validations.** Completed the **Santander Universities Pre-Incubator** programme in 2025 and joined the **NatWest Accelerator (London cohort) on 16 March 2026**. Two competitive selection processes have separately admitted DEQUAD's team and thesis.
3. **Founder-institution fit.** Yusuf Quadri served as **University of Bedfordshire Student Union President for two consecutive years (2021–2023)**, representing the student body at senior-management level. He is in early, informal conversation about a possible pilot with the same university — **no agreement is signed and nothing is guaranteed.**
4. **Two complementary founders** — product/safeguarding lead (Yusuf Quadri) + engineering lead (Yusuff Adeagbo). Both UK-resident, full-time, self-funding the business without external investment.

Page 2 — How we meet the three Home Office criteria

Innovation

DEQUAD is the **only UK product** combining:

- `.ac.uk` student-domain identity verification (with a human admin queue for ambiguous cases),
- intent-based peer matching (friendship / study / peer-support — *not* dating),
- continuous mood telemetry tied to engagement,
- and **machine-assisted safeguarding triage with a real-time webhook to university DSLs**.

No competitor — Togetherall, TalkCampus, UniBuddy, Bumble BFF or Discord — combines more than two of these (see comparison table on Page 4). This is not a founder assertion: in the primary buyer research underpinning this plan, 9 of 11 university safeguarding and student-services leads named identity-verified peer networks as their single biggest unmet need. And it is not easily copied — the founders' own Risk Register treats a competitor copying the `.ac.uk` layer as a live, scored risk (not a hypothetical), and names the moats that survive it: the safeguarding webhook, the graded-alert taxonomy and the insights dashboard, none of which can be replicated without also rebuilding practitioner-designed triage logic.

Viability

- Production MVP is live, in beta with real students.
- **Prospective pilot with University of Bedfordshire — proposed, not signed.** The founder's former institution, where he served two terms as SU President (2021–2023). A 12-week pilot has been proposed for **M4–M6**; this is a target only, contingent on the university's decision, and may not happen.
- Two independent UK-bank programme validations: **Santander Universities Pre-Incubator (2025) + NatWest Accelerator (joined 16 March 2026)**.
- £6,000 founder cash (£3k each) + £31,100 in-kind NatWest support **carries the business through Y1–Y3 with positive closing cash balances, without requiring the pilot to convert or any external funding** (see Page 9).
- B2B SaaS revenue model is proven in the adjacent market — Togetherall serves 60+ UK universities at ~£40k/year.

Scalability

- **Revenue grows sharply (£150 → £48,000, Y1 to Y3) while the core team grows from 2 to just 3 people.** That gap between revenue growth and headcount growth is the scalability case made concrete, not asserted.
- Software-only marginal cost → gross margin reaches ~87% by Y3.
- Within-institution network effects accelerate intra-uni adoption.

- 6-week implementation per new university enables a repeatable rollout process, deliberately modelled conservatively at c.1.5 paying institutions by Y3 (out of 285 total UK) so the plan does not depend on rapid conversion.
- International optionality is architectural, not aspirational: the `.ac.uk` verification engine is a configurable domain allow-list, so the same mechanism maps cleanly to `.edu` / `.edu.au` / EU domains post-Y3 → **£180m TAM** in EN-language HE markets, as a longer-term opportunity beyond this 3-year plan.

Page 3 — Product

Modules (all in production)

	What it does
Verified peer matching	Match <code>.ac.uk</code> -verified students by intent (friend / study / support). Profile cards with university, course, year, interests.
Daily wellbeing tracker	30-second mood, sleep, stress and connection check-in. Personal trend dashboard.
Machine-assisted safeguarding	LLM classifier on mood + chat metadata flags risk signals; webhook to designated university safeguarding lead in < 60s.
University Insights Dashboard	Anonymised, aggregated wellbeing analytics for HE staff — cohort mood trends, engagement, hotspots.

Tech stack (already running)

- **Frontend:** Expo / React Native (iOS, Android, web at dequad.co.uk) — universal codebase.
 - **Backend:** FastAPI (Python), MongoDB (Motor), real-time WebSockets.
 - **AI:** OpenAI / Anthropic LLMs via Emergent integrations (text classification, safeguarding triage).
 - **Payments:** Stripe (B2C subs + B2B invoicing).
 - **Infra:** Cloudflare CDN + Render Pro; Online Safety Act-compliant reporting flows.
 - **Auth:** Custom email/password + Google OAuth + admin portal (dual auth).
-

Page 4 — Competition

Feature	DEQUAD	Togetherall	TalkCampus	UniBuddy	Bumble BFF	Discord
.ac.uk student verification	✓	✗	✗	✓	✗	✗
Intent-based peer matching	✓	✗	Ltd	✗	Ltd	✗
Daily mood telemetry	✓	✗	Ltd	✗	✗	✗
Machine-assisted safeguarding	✓	Ltd	✗	✗	✗	✗
University insights dashboard	✓	✓	✓	Ltd	✗	✗
Safeguarding webhook to uni team	✓	✗	✗	✗	✗	✗
Online Safety Act 2023 ready	✓	✓	✓	✓	Partial	✗
UK universities served	0 signed (in conversation)	~60	~30	200+	n/a	n/a
ASP per uni	£2/enrolled student/yr (~£20k for a 10k-student uni)	£40k+	£25k	£18k	n/a	n/a

DEQUAD would displace Togetherall and TalkCampus (price/feature) on the B2B side, and **co-exist** with UniBuddy (orthogonal pre-enrolment market), if and when institutional conversations convert. Consumer competitors (Bumble BFF, Discord) lack institutional features entirely.

Page 5 — Market

UK addressable market

Tier	Definition	Size
TAM	All UK universities + ICBs + UK student premium subs	£86m/yr
SAM	Russell-Group + post-92 unis > 10k students + their ICBs	£28m/yr
SOM (5-yr, long-term reference only)	12% SAM capture	£3.4m ARR by Y5

The SOM above is a long-term market-opportunity reference point, not a forecast — the committed 3-year plan (Page 10) targets a far smaller, self-funded base of c.£48k revenue by Y3.

Demand signals

- **2.86m UK higher-ed students** (HESA 2023/24) — addressable consumer base.
- **285 UK higher-ed institutions** — addressable B2B base.
- **54% of UK undergrads** report frequent loneliness (ONS 2023).
- **34% of UK undergrads** experience a clinically-significant MH issue (Student Minds 2024).
- **6.1 weeks** average wait for a university counsellor — appetite for prevention.
- **100+ UK universities** signed to UUK Mental Health Charter — must evidence wellbeing strategies.

Page 6 — Go-to-market

Three channels, three audiences

Audience	Headline message	Primary channel	Conversion lever
Students	"Verified UK uni students. Real connections. Wellbeing built in."	IG + TikTok + university student-rep ambassadors	Free product + premium upsell
Universities	"See loneliness early. Act before it becomes a crisis."	Direct DSS outreach + UUK Charter webinar + NatWest network intros	12-week free pilot → paid SaaS (target, not guaranteed)
NHS ICBs	"Population-level student wellbeing data, anonymised and audit-ready."	Direct outreach to MH commissioners	Not part of this 3-year plan

B2B pilot conversations (early-stage, nothing signed)

- **University of Bedfordshire** — early, informal conversation only. Lead founder served two terms as SU President there (2021–2023); direct relationships with student services and safeguarding leads. No agreement, LOI or date is confirmed.
- **Two further peer institutions** — early-stage pilot scoping (anonymised for now); equally unconfirmed.
- **Beta cohort active** — the existing 20-person University of Bedfordshire beta cohort uses DEQUAD, independent of any formal pilot or contract.

Y1 marketing spend: £900

Deliberately minimal and founder-led — no paid-acquisition budget in Y1. Institutional outreach relies on (a) founder organic outreach and (b) NatWest network introductions to university IT/wellbeing leads, at near-zero cash cost.

Page 7 — Founders

Yusuf Quadri — CEO / Product & Safeguarding Lead

- UK-resident, full-time on DEQUAD.

- **University of Bedfordshire Student Union President 2021–2023** (two consecutive terms). Represented the student body at senior-management level on student-services, safeguarding and welfare policy. This is the basis of DEQUAD's prospective pilot conversation with the same university.
- Completed the **Santander Universities Pre-Incubator programme** in 2025; admitted to the **NatWest Accelerator (London cohort)** on 16 March 2026.
- **Seven safeguarding & clinical-awareness certifications** including Oliver McGowan Learning Disabilities & Autism, Adult Safeguarding Partnership Working, Suicide Prevention (2026), Data Protection & Information Security, and Safe Response to Challenging Situations (see Appendix O).
- Built and shipped the entire MVP at dequad.co.uk.
- Owns the safeguarding policy (Appendix E — DPIA, Appendix I — OSA-2023 compliance).
- Owns university partnerships and the NatWest Accelerator relationship.
- Co-founder cash contribution: **£3,000** of the £6,000 founder capital.

Yusuff Adeagbo — Co-Founder / CTO / Engineering & IT Lead

- UK-resident, full-time on DEQUAD.
- **MSc Information Technology with Project Management — University of the West of Scotland.**
- **Higher National Diploma in Computer Science** (prior).
- Multi-disciplinary skill set: full-stack engineering, IT support, UI/UX design, graphic design, digital marketing (e-commerce), IT business analysis.
- Will own the engineering hiring pipeline, infrastructure security, and the R&D claim leadership.
- Co-founder cash contribution: **£3,000** of the £6,000 founder capital.
- Full CV at Appendix B-2 ([B_cofounder_cv.pdf](#)).

Wider founding team — joining at incorporation (EMI options, unpaid)

- **Dr Gerald Marfo — Chief Marketing Officer** · PhD in Digital Marketing; owns Y1 marketing strategy and measurement. **Equity-only**; a cash salary is not funded within this 3-year self-funded plan.
- **Adedapo Ajuwon — Senior Software Engineer** · supports CTO on platform engineering, infrastructure, reliability. **Equity-only**, same basis.
- **Chinyere Jennifer — Senior Advisor (Programme & Delivery)** · Senior PM Consultant at **MIGSO-PCUBED** with LLM background. **Advisor on EMI options**; MIGSO-PCUBED remains her primary employer.

Full CVs in Appendix N ([N_wider_team_cvs.pdf](#)).

Founder compensation under this plan

- £0 in Y1 and Y2 — both founders fund living costs from existing employment/freelance income.
 - £500/month each from **Y3**, funded entirely by Y3 revenue — not by any external funding round, none of which is assumed.
 - Materially below market throughout — signals genuine founder commitment.
-

Page 8 — Funding: self-funded, no external round assumed

Source	Timing	Amount	Use of funds
Founder equity (£3,000 × 2)	Day 1	£6,000	Incorporation, domains, IP filings, hosting — the only funding in this plan.

No pre-seed, seed, Series A, grant or R&D tax credit is assumed anywhere in this 3-year plan. The full financial model (Page 10; main Business Plan Sections 11–14) is funded entirely by this £6,000 plus revenue generated in the period, and remains solvent even if institutional revenue is £0 throughout. If institutional traction significantly exceeds this conservative forecast, the founders may explore external investment beyond Year 3 — that is a future option, not a plan dependency.

Page 9 — Year-1 cash flow (the critical view)

Closing cash balance is positive every single month of Year 1 — with no institutional revenue or external funding assumed

Month	Inflows	Outflows	Closing balance
M1 — incorporation, laptops, initial setup	£6,000 founder	(£1,035)	£4,965
M2	—	(£135)	£4,830
M3	—	(£243)	£4,587
M4 — proposed pilot window opens, if agreed (not signed)	—	(£283)	£4,304
M5	—	(£293)	£4,011
M6 — proposed pilot window closes, if it happened	—	(£303)	£3,708
M7 — Stripe premium billing goes live	£10 sales	(£323)	£3,395
M8	£15 sales	(£333)	£3,077
M9	£20 sales	(£343)	£2,754
M10	£25 sales	(£353)	£2,426
M11	£35 sales	(£363)	£2,098
M12 — Y1 close	£45 sales	(£673)	£1,470

Cash never dips below c.£1,400 across all of Year 1, and this holds true whether or not the Bedfordshire pilot conversation goes anywhere — no institutional revenue, no pre-seed and no other external funding is assumed in this schedule. The founders' relationship with the university (via the former SU presidency) is a genuine upside opportunity, but the business does not depend on it to survive Year 1.

The full monthly schedule is in `DEQUAD_Financial_Model.xlsx`, sheet "Cash Flow Y1 (mo)".

Page 10 — Three-year P&L summary (self-funded)

	Y1	Y2	Y3
Revenue	£150	£16,000	£48,000
Cost of Sales	(£1,400)	(£3,100)	(£6,100)
Gross Profit / (loss)	(£1,250)	£12,900	£41,900
Gross margin %	n/a	80.6%	87.3%
Total overheads (incl. payroll)	(£2,680)	(£6,000)	(£32,000)
EBITDA	(£3,930)	£6,900	£9,900
Operating profit / (loss)	(£4,080)	£6,500	£9,200

Y1 is the only loss-making year, and the loss (£4.1k) is fully absorbed by the £6,000 founder capital — no equity round funds it. Y2 turns modestly profitable on minimal overheads and a small (contingent) institutional contract; Y3 profit funds the plan's only hire and modest founder pay. **No break-even "event" is needed** because no external funding is assumed at any point — the business is solvent throughout.

Page 11 — Job creation and economic impact

Headcount

	Y1	Y2	Y3
Founders	2 (unpaid)	2 (unpaid)	2 (modest pay)
Safeguarding & Trust Lead (part-time)	0	0	1
Total UK jobs	2	2	3 (c.2.5 FTE)

Conservative base case — all self-funded from revenue, no external funding round assumed.

Job-creation target (upside case): once institutional revenue scales beyond this base case via pilot conversion, headcount grows to **5 (2 founders + 3 full-time hires)** — each of the 3 hires sustained for at least 12 months at an average salary of £25,000/year, funded entirely from revenue generated after piloting, meeting the Innovator Founder settlement job-creation criterion.

Beyond direct jobs

- **University safeguarding capacity:** any institution that does onboard gains an early-warning system that increases the practical reach of its existing wellbeing team.
 - **Student-rep / ambassador programme:** a small, informal incentive for beta-cohort students (Section 16); not a formal paid role in this plan.
-

Page 12 — R&D activity

R&D is delivered as unpaid founder time throughout Y1–Y2, plus modest paid capacity from Y3, focused on three bets:

1. **Identity-and-intent verification engine** — `.ac.uk` classifier, attestation, admin queue, future OCR student-ID flow.
2. **Wellbeing inference & safeguarding triage** — PHQ-9-lite mood model + risk-signal NLU + federated learning roadmap.
3. **Privacy & compliance infrastructure** — DPIA pipeline, OSA-2023 reporting, hash-based de-identification.

No SME R&D tax credit is assumed as an inflow in this plan — qualifying PAYE spend is minimal while founders are unpaid. It is treated as a possible future upside, to be explored with NatWest's in-kind accountancy support once qualifying costs exist, not something the plan relies on.

Page 13 — NatWest Accelerator — why this matters for endorsement

The accelerator membership is **independent third-party validation** of DEQUAD's quality. NatWest's selection panel reviewed the team and the product before admission.

Quantified in-kind value (Y1)

In-kind item	Annual value
London office co-working (3 desks)	£12,000
Legal advice (Mishcon de Reya, DLA Piper panels)	£4,500
Accountancy support (PwC alumni network)	£3,600
Banking & business introductions	£2,000
Investor pitch coaching & mentoring	£5,000
Programme demo day & PR placement	£4,000
Total in-kind value (Y1)	£31,100
Cash cost to DEQUAD	£0

The £31k of in-kind support is **the reason £6,000 of founder cash is sufficient** to carry the business through Year 1. Without the accelerator, the same operating profile would require materially more cash investment up front.

Page 14 — Risk register (summary)

The key risks the founders have identified and their mitigations:

#	Risk	Impact	Mitigation
R1	Bedfordshire pilot conversation never converts — nothing is signed	Medium	The plan is solvent at zero institutional revenue throughout Y1–Y3 (Page 9–10); no cost line depends on this converting. Two further pilot conversations scoped as independent upside.
R2	Co-founder hire delayed	High	Y1 build is solo-doable; founder personally covers technical work until co-founder onboarded.
R3	Institutional/premium revenue falls short of plan targets	Medium	No funding round is required at any point; the only consequence is that the base-case Y3 hire and modest founder pay are delayed, not that the business fails. The upside-case 3-hire job-creation target simply does not trigger (see Risk Register R17).
R4	Safeguarding incident (false negative)	High	Human-in-the-loop for all high-risk flags; insurance in place; clinical advisory board recruited Q2 Y2.
R5	Togetherall/TalkCampus copy .ac.uk verification	Medium	First-mover land grab; safeguarding webhook + insights dashboard are deeper moats.
R6	OfS / Online Safety Act non-compliance	Medium	OSA risk assessment and reporting flows already shipped; ICO DPIA drafted; legal review via NatWest Mishcon panel.
R7	Cyber breach	Medium	Cyber Essentials in progress; pen-test scheduled Q2 Y2; insurance £1m.
R8	Cost-of-living squeeze on premium subscriptions	Medium	Costs are scoped to survive on premium revenue alone if institutional revenue is delayed.
R9	Negative PR from a misidentified case	Medium	Reactive media plan; clinical advisory board; transparent reporting.
R10	International expansion delayed	Low	Not part of this 3-year plan; UK-only focus is deliberate and does not depend on any funding round.
R11	LLM cost spike (model price changes)	Low	Multi-provider abstraction in place; can swap OpenAI ↔ Anthropic ↔ Gemini in < 1 day.
R12	Tighter immigration regime affecting talent	Low	Both co-founders are already UK-resident; the plan's only hire is UK-based.

Full risk register in [DEQUAD_Risk_Register.pdf](#) .

Page 15 — Decision summary

DEQUAD is a **production-ready, accelerator-validated, self-funded** UK software business that meets the **innovation, viability** and **scalability** criteria for Innovator Founder endorsement.

Three things this submission demonstrates

1. **Real product, real users** — the MVP is live, has real beta users at the University of Bedfordshire, and is governed by a DPIA-cleared safeguarding policy that ships before public launch.
2. **Capital efficiency and self-sufficiency** — the business survives all three years on **£6,000 of founder cash plus revenue alone**, with no external funding assumed, committed, or required at any point. The NatWest Accelerator in-kind support and an extended no-salary founder commitment (Y1–Y2) make this possible.
3. **Credible, honestly-scoped UK growth** — 2 unpaid founders (Y1–Y2) growing to 3 people / c.2.5 FTE by Y3 in the conservative base case, all self-funded from revenue; 0 to c.1.5 average paying universities by Y3, modelled as a target, not a guarantee. **Job-creation target:** 5 people (3 full-time hires, avg. £25,000/yr, each 12+ months) once revenue scales after pilot conversion, meeting the Innovator Founder settlement job-creation criterion.

What endorsement enables

- The lead applicant retains UK residency to continue building DEQUAD full-time.
 - The co-founder (UK-resident already) joins formally as CTO at incorporation.
 - The company operates and grows on its own means from day one — no external capital is required to make the 3-year plan happen.
 - A measurable, defensible improvement in UK student wellbeing infrastructure, scaled honestly to what £6,000 and organic growth can actually deliver.
-

1. Executive Summary

DEQUAD is a UK-built software platform that helps university students form genuine, verified peer connections, track their daily wellbeing, and receive proactive safeguarding — inside a closed network open only to identity-verified UK higher-education students.

The product is not a concept. It is **live in production at dequad.co.uk**, with a working matching engine, daily mood telemetry, machine-assisted safeguarding triage and a university-facing insights dashboard.

The problem we solve

UK universities face a structural student-wellbeing crisis:

- **54%** of UK undergraduates report frequent loneliness (ONS, 2023).
- **34%** experience a clinically-significant mental-health issue during their degree (Student Minds, 2024).
- The average wait to see a university counsellor is **6.1 weeks**; only **23%** of UK universities offer 24/7 crisis support.
- The Office for Students now imposes a statutory condition on student mental health — institutions must **evidence prevention**, not just reaction.

Existing tools each solve a fragment: anonymous forums (Togetherall), peer-chat apps (TalkCampus), pre-enrolment chat (UniBuddy), or generic social apps with zero safeguarding (Bumble BFF, Discord). None connects **verified student identity → real peer connection → wellbeing telemetry → institutional safeguarding action** in one loop. DEQUAD does.

The founder-market fit that most applications cannot claim

The lead founder, **Yusuf Quadri**, is a **practising frontline safeguarding professional** — currently a Recovery Coordinator at Change Grow Live managing safeguarding referrals, dynamic risk assessments and multi-agency casework for vulnerable adults, with parallel NHS mental-health experience at East London NHS Foundation Trust. He also served **two consecutive terms as University of Bedfordshire Students' Union President (2021–2023)**, representing 10,000+ students and managing a £900,000 budget. DEQUAD's safeguarding pipeline was not designed from a textbook; it was designed by someone who files real safeguarding referrals every week.

Why this business is endorsable now

Evidence	Detail
Working product — fully featured	Production deployment at dequad.co.uk. Closed beta: 20 verified student accounts at the University of Bedfordshire (10 daily-active over 6 weeks). As at August 2026, the platform ships: verified peer matching (60+ categorised interests), daily mood telemetry, lecture feedback, graded safeguarding alerts, AI-powered per-institution wellbeing analysis, university insights dashboard with growth KPIs, and per-university CSV exports. Engineering build cost in Y1: zero — the MVP and all Y1 features are already built.
Founding team	Yusuf Quadri (CEO — safeguarding professional, MBA with Data Analytics, 2× SU President) + Yusuff Adeagbo (CTO — MSc IT with Project Management), supported by Dr Gerald Marfo (CMO, PhD Digital Marketing), Adedapo Ajuwon (Senior Software Engineer) and Chinyere Jennifer (Senior Advisor, MIGSO-PCUBED) — all wider team on equity-only terms.
Two independent validations	Santander Universities Pre-Incubator (completed 2025) and NatWest Accelerator London (joined 16 March 2026). Two UK high-street banks independently selected this team through competitive processes.
Pilot conversations under way — nothing signed	Early-stage conversations with the University of Bedfordshire Director of Student Services — the institution whose students the founder represented for two years. No pilot agreement, LOI or date is confirmed; the platform is already built and ready to onboard as soon as (and if) an agreement is reached.
In-kind runway	NatWest Accelerator provides London office, legal and accountancy support worth £31,100/yr in-kind through Y1, reducing DEQUAD's cash overheads.
Self-funded, conservative forecast	Y1 revenue ~£150 → Y2 ~£16,000 → Y3 ~£48,000, funded entirely by the founders' £6,000 opening capital plus revenue generated in the period. No pre-seed, seed or other external investment is assumed anywhere in this plan. The base case assumes zero institutional revenue in Y1 (no pilot is yet signed); one paying university is modelled as a Y2 upside contingent on conversion, rising to c.1.5 by Y3.
UK jobs	Conservative base case: 2 founders (Y1–Y2, unpaid) → 3 people / c.2.5 FTE by Y3. Job-creation target: 5 people (2 founders + 3 full-time hires) once institutional revenue scales via pilot conversion — each of the 3 hires sustained at least 12 months at an average salary of £25,000/year, funded from revenue generated after piloting, meeting the Innovator Founder settlement job-creation criterion.

We evidence all three Home Office endorsement criteria — **innovation, viability, scalability** — with a shipped product, a frontline-qualified founding team, third-party programme validation, and a deliberately conservative financial model.

2. Description of Products and Services

2.1 The DEQUAD platform

DEQUAD ships as a cross-platform application (iOS, Android and web at dequad.co.uk) on a FastAPI / MongoDB backend. Four modules are live in production today:

Module	What it does	Why it is different
Verified peer matching	Matches students with compatible peers for friendship, study groups and peer support — exclusively within <code>.ac.uk</code> student-email-verified accounts, with distance-based and interest-based filters. Students select from 60+ categorised interests across 6 life-domains (Academic, Creative, Tech, Lifestyle, Social, Entertainment) — up to 15 interests per profile — enabling richer compatibility scoring than any generic app.	Closed-network identity plus intent-based matching. Not offered by Bumble BFF, Hinge or Facebook Groups.
Daily wellbeing tracker	30-second daily check-in (mood, sleep, stress, connection) feeding a personal trend dashboard.	Anonymised, opt-in, DPIA-cleared. Combined with connection data to flag emerging isolation before crisis.
Machine-assisted safeguarding	LLM-based classifier over mood and chat signals flags suicide-risk, harassment, hate-speech and disordered-eating indicators to university safeguarding leads via webhook, with human review. Low-mood streaks (mood ≤ 3 for 3+ consecutive days) and low lecture-engagement patterns trigger separate, graded safeguarding alert channels.	The first UK student platform pairing <code>.ac.uk</code> identity verification with proactive safeguarding triage — designed by a practising safeguarding professional.
University Insights Dashboard	Anonymised, aggregated cohort wellbeing analytics for university staff: mood trends, engagement rates, platform growth KPIs (DAU/WAU/MAU, retention cohorts), and AI-powered per-institution wellbeing analysis that surfaces key concerns, positive indicators and prioritised intervention recommendations.	Population-scale early warning without breaching individual privacy. The AI analysis layer (GPT-4o-mini via structured JSON output) interprets multi-signal patterns and delivers human-readable recommendations — not raw numbers — to non-technical safeguarding staff.
Institutional data exports	CSV export of feedback history, student data, mood entries and safeguarding alerts — with per-university filtering so each institution receives only its own cohort's data.	Closes the audit-trail requirement for OfS Condition B3 compliance; no comparable export tool exists in Togetherall or TalkCampus.

2.2 What each customer buys

Customer	What they receive	Price
UK university	Site licence to the Insights Dashboard, branded safeguarding webhook into their existing safeguarding team, dedicated success manager.	£2 per enrolled student per year — a 10,000-student university pays £20,000/yr. Simple, transparent, headcount-based.
NHS Integrated Care Board (ICB)	Population-level anonymised wellbeing data for funded institutions; joint safeguarding referral pathway.	Annual contract from £20,000/yr per ICB.
Student (consumer)	Free core product. Optional DEQUAD Premium : advanced match filters, unlimited chats, profile boost.	£4.99/month via Stripe (integrated and test-verified; first live revenue expected from M7 from the existing beta cohort, independent of whether any university pilot converts).

The dual-sided model matters: students adopt because the core product is free and genuinely useful; universities pay because DEQUAD gives their safeguarding teams the early-warning layer regulators now require.

3. Innovation, Viability and Scalability

3.1 Innovation

DEQUAD's innovation claim is not any single feature — every individual element below can be found somewhere in the market. It is the **combination**, shipped as one product, that does not exist anywhere else in the UK today. This is also, independently, what the market itself says it wants: in the primary buyer research at Section 5.2, 9 of 11 university safeguarding and student-services leads interviewed named *identity-verified peer networks* as their single biggest unmet need — not a founder assertion, a validated gap.

1. **Closed-network identity verification.** DEQUAD is the only UK student platform enforcing `.ac.uk` student-domain verification with an explicit student-status attestation, a curated UK-student-domain allow-list, and a human admin review queue for ambiguous accounts — with an OCR-based student-ID check already scoped as the next hardening step (Section 4.1; architecture at Appendix J). Generic social apps cannot retrofit this without

abandoning their open-network model; it has to be built in from day one, which is exactly what DEQUAD did.

2. **The verification → connection → telemetry → safeguarding loop.** Each element exists somewhere in the market; the **integrated loop** exists nowhere else. Wellbeing signals are only actionable when tied to a verified identity inside an institution that can respond — which is exactly the configuration DEQUAD ships.
3. **Practitioner-designed safeguarding.** The triage thresholds, referral pathways and escalation policy were authored by a founder who performs statutory-adjacent safeguarding work weekly at Change Grow Live, modelled on UUK Stepchange and Suicide-Safer Universities guidance. Competing products bolt moderation on; DEQUAD is built outward from the safeguarding case-file. The graded-alert system distinguishes mood-based signals (routed with user context for counselling follow-up) from lecture-engagement signals (routed anonymously for academic support) — a nuance no competitor has attempted.
4. **AI-powered per-institution wellbeing intelligence.** The University Insights Dashboard now incorporates a GPT-4o-mini inference layer that reads multi-signal cohort data and generates a structured wellbeing analysis: a 0–100 wellbeing score (colour-coded with trend arrows), a ranked list of key concerns, a list of positive indicators, and prioritised, actionable recommendations — all rendered in human-readable English for safeguarding staff who are not data analysts. This converts a raw-numbers dashboard into a decision-support tool — a capability no university wellbeing platform currently provides.
5. **Compliance as a feature.** Online Safety Act 2023 risk assessment, in-app reporting, UK GDPR DPIA and lawful-basis register shipped **before** first institutional sale — turning the sector's biggest procurement objection into our opening slide. Per-institution CSV data exports with GDPR-safe university-scoped filtering are included by default, satisfying the OfS Condition B3 evidence obligation out of the box.

Why this is hard to copy, not just hard to imagine. The feature-by-feature comparison in Section 6 already shows no competitor holding more than two of these ten capabilities at once. The harder question — could Togetherall or TalkCampus simply copy the `.ac.uk` layer? — is addressed head-on rather than assumed away: the founders' own Risk Register (Appendix L, R8) treats this as a live, scored risk, not a hypothetical, and names the actual moats that survive a copied email-domain check — the safeguarding webhook, the graded-alert taxonomy, and the university insights dashboard, none of which can be replicated without also rebuilding practitioner-designed triage logic, the thing an incumbent moderation product is least likely to have.

3.2 Viability

- **The product is built and live.** The largest single risk in most early-stage plans — can they ship? — is already retired. dequad.co.uk is in production with 20 verified beta users at the University of Bedfordshire (10 daily-active, 6-week retention window), Stripe billing integrated (test-mode; converting to live on first paid contract), and all safeguarding alert flows exercised end-to-end.
- **The founder does this job professionally.** Safeguarding-first is not a marketing phrase: the CEO manages safeguarding caseloads at Change Grow Live and has NHS mental-health ward experience. This is decisive credibility in university procurement conversations, which are led by safeguarding and student-services professionals.
- **A trusted route into a prospective anchor customer.** Two years as Bedfordshire SU President gives DEQUAD direct, warm relationships with the Director of Student Services, safeguarding leads and senior leadership. A 12-week pilot has been **proposed** for **M4–M6** — this is a target timeline only; no agreement is signed, and the pilot may be delayed, altered or may not proceed.
- **Two independent third-party validations.** Santander Universities Pre-Incubator (completed 2025) and NatWest Accelerator London (admitted 16 March 2026) — both competitive selection processes assessing team and product quality.
- **Proven willingness to pay.** Togetherall and TalkCampus charge UK universities £15k–£60k/yr and hold 100+ UK customers between them, for products missing DEQUAD's verification and triage capabilities.
- **A cash plan that survives scrutiny — and needs no pilot to succeed.** £6,000 founder capital plus £31,100 of NatWest in-kind support delivers positive month-end cash in every month of Y1 (Section 12), with zero founder salary throughout Y1. The plan does not depend on any pilot converting, any investor closing, or any date being met.

3.3 Scalability

DEQUAD scales the way a software business is supposed to: revenue grows far faster than cost or headcount, because the product — not additional people — carries the growth.

- **Revenue grows sharply while the core team barely grows at all.** Total revenue rises from a deliberately small £150 in Y1 — reflecting a self-funded, pre-institutional-revenue starting point — to £48,000 by Y3, while the founder-led core team grows from 2 unpaid founders to just 3 people (c.2.5 FTE) over the same period (Section 18). That gap between revenue growth and headcount growth *is* the scalability case, made concrete rather than asserted.

- **Software-only marginal cost.** An incremental student costs ~£0.05/month in hosting; gross margin reaches **87.3%** by Y3.
- **Intra-institution network effects.** Every additional verified student raises the platform's value for every other student at the same university — driving the organic growth that keeps CAC falling (Section 16).
- **Repeatable institutional rollout.** Each new university onboards through a templated 6-week implementation. This 3-year plan conservatively models c.1.5 average paying institutions by Y3 (Section 11) — a deliberately small, achievable slice of the 285 UK institutions, chosen so the business does not depend on rapid multi-university conversion to remain solvent. The templated rollout process is what makes faster scaling possible in later years, if and when it happens.
- **International optionality is architectural, not aspirational.** The `.ac.uk` verification engine (Section 3.1) is built as a configurable domain allow-list, not a hard-coded UK rule — the same mechanism maps directly onto `.edu` (US), `.edu.au` (Australia) and EU academic domains without re-architecting the product, addressing a £180m English-language HE TAM post-Y3. This is flagged as a longer-term opportunity beyond the 3-year plan, not a commitment within it.
- **Team scale plan in place, sequenced to revenue.** Conservative base case: headcount grows 2 (unpaid founders) → 2 → 3 (c.2.5 FTE) across the 3-year forecast, all UK-based. **Job-creation target:** 5 people (2 founders + 3 full-time hires, each sustained 12+ months at an average salary of £25,000/year) once institutional revenue scales via pilot conversion (§10.4) — funded from revenue generated after piloting, meeting the Innovator Founder settlement job-creation criterion.

4. Research and Development Activity

R&D is the core of the innovation proposition: DEQUAD's defensibility rests on the verification engine and the safeguarding-inference pipeline, both of which are original engineering rather than assembled off-the-shelf parts.

Y1 R&D is delivered entirely as unpaid founder time (no cash cost, and no salary is drawn) plus modest tooling and safety-testing spend included in Section 11.2/12.1. From Y3, a small amount of paid part-time capacity is added once revenue supports it. No SME R&D Tax Credit inflow is assumed in the cash flow forecast (Section 12) — the pre-revenue/bootstrap structure means qualifying PAYE spend is minimal in Y1–Y2; the founders will explore claiming R&D tax relief with NatWest's in-kind accountancy support once qualifying costs exist, as a possible upside not relied upon here.

4.1 Identity-and-intent verification engine

Activity	Status	R&D tax-relief eligible
.ac.uk student-subdomain classifier (allow-list, block-list, attestation flow)	Shipped Feb 2026 (uk_student_email verification module)	Yes
Admin "Pending Verification" queue with audit trail	Shipped Feb 2026	Yes
Optical student-ID OCR with on-device redaction	Planned Q3 Y1	Yes

4.2 Wellbeing inference and safeguarding triage

Activity	Status	R&D tax-relief eligible
Mood × engagement × text-signal classifier (PHQ-9-lite scoring + risk-signal NLU)	Prototype Feb 2026; production Q2 Y2	Yes
Graded-alert pipeline: low-mood streak detector (≤ 3 , 3+ consecutive days) → admin safeguarding alert	Shipped Aug 2026	Yes
Low lecture-engagement signal → anonymous academic-support alert	Shipped Aug 2026	Yes
AI-powered per-institution wellbeing analysis (GPT-4o-mini structured JSON — wellbeing score, concerns, recommendations)	Shipped Aug 2026	Yes
Real-time safeguarding webhook with adapter library for university SIS/CRM systems	Production Q3 Y1	Yes
Federated learning so per-institution models improve without raw data leaving the platform	Planned Q4 Y2	Yes

The triage models are trained and threshold-tuned against the safeguarding decision frameworks the CEO applies professionally (CGL risk-assessment practice; UUK Suicide-Safer Universities), with every automated flag routed through human review — a deliberate safety-case design documented in Appendix D.

4.3 Privacy and compliance infrastructure

Activity	Status
DPIA-cleared mood-data pipeline; ICO Code of Practice alignment	Drafted Feb 2026 (Appendix E)
Online Safety Act 2023 risk assessment and in-app reporting	Shipped Feb 2026 (Appendix I)
Cryptographic data minimisation (hash-based de-identification of mood records for institutional reporting)	Planned Q2 Y2

5. Market Analysis

5.1 Market Research — evidence base

The claims in this section are grounded in **primary field research conducted directly by the founding team between May 2024 and January 2026**, triangulated with peer-reviewed secondary sources. Nothing here is theoretical: every buyer, user and pricing signal below has been tested with a real counterparty on the record.

Primary research undertaken (May 2024 – Jan 2026):

Method	Participants	What we tested	Where we did it
Structured student interviews	48 UK undergraduates across 6 universities (Bedfordshire, Manchester, Leeds, Warwick, Bristol, Birmingham)	Onboarding friction, verification trust, wellbeing willingness-to-share, £4.99/mo premium price test	45-min Zoom + on-campus (Union buildings)
Anonymous quantitative survey	312 completed responses (target n=300); recruited via SU mailing lists and Instagram at 2 anchor universities	Loneliness prevalence, existing app usage (Bumble BFF, Hinge, Discord), safeguarding-app trust deltas, price elasticity at £2.99 / £4.99 / £7.99	Google Forms, incentivised via £5 Amazon vouchers (10 randomly drawn)
Semi-structured buyer interviews	11 university staff — 4 Directors of Student Services, 3 Wellbeing/Safeguarding Managers, 2 Heads of Digital, 2 Deputy Vice-Chancellors (Student Experience)	Procurement path, budget owner, integration needs (SSO, LMS webhook), price-per-student anchor, compliance triggers (OfS, OSA 2023, UUK Charter)	60-min recorded video calls; transcripts on file
Discord / Reddit ethnographic scan	14 UK-university Discord servers, r/UniUK (287k members), r/UKUni	Where students actually meet peers today; unmet needs mentioned in unmoderated threads	Passive observation over 8 weeks
Comparable-product pricing scrape	Togetherall, TalkCampus, UniBuddy, Kooth, Silvercloud, Big White Wall archives	Real UK ASPs, per-student rates, contract length norms	FOI requests + public press releases + Crunchbase
Closed beta at the University of Bedfordshire	20 verified students onboarded, 10 daily-active over 6 weeks	Retention, mood-check completion, match-to-chat conversion, escalation false-positive rate	Live product, not prototype

Secondary sources triangulated with the above:

- **HESA 2023/24** — UK student headcount and course-level segmentation
- **ONS 2023 Student Wellbeing Survey** — loneliness prevalence baseline (54% frequent, 26% chronic)
- **Student Minds "Insight Briefing 2024"** — 34% of undergraduates report a clinically significant mental-health issue during their degree

- **Universities UK (UUK) 2024 report** — average per-student services budget (£123/yr), average wait for counselling (6.1 weeks), Mental Health Charter signatory list (100+)
- **Office for Students** — 2023 statutory condition on student mental health; regulatory advice notes
- **Online Safety Act 2023 / Ofcom implementation timelines** — user-to-user services duties, illegal-content risk assessment obligations
- **HEPI (Higher Education Policy Institute)** — 2024 report "*How can universities and students respond to student mental ill health?*" — corroborates our safeguarding-first hypothesis
- **Crunchbase + Companies House filings** — competitor revenue trajectories (Togetherall, TalkCampus)

5.2 Key findings from primary research

The five findings below were consistent across **both** the 312-response quantitative survey and the 48 in-depth interviews, and are what the DEQUAD product is built around:

1. **Loneliness is near-universal, but shame is the barrier — not desire.** 71% of surveyed students agreed with "I want to make more real friends at university" while only **19%** used an existing app (Bumble BFF, Hinge, Discord) to try. Verified **.ac.uk** -only was the **#1 unlock**: 68% of respondents said they would try a friendship app *if they knew everyone else was a verified student at a real UK university*. This is exactly the trust gap DEQUAD closes and no incumbent addresses.
2. **£4.99/month is the price ceiling for students.** In the Van Westendorp price-sensitivity block: median "cheap" price = £2.99, median "expensive" = £7.99, **optimal price point = £4.99** for premium features (advanced filters, unlimited likes, distance filter). This confirmed our student-side price without further guesswork.
3. **Universities buy on safeguarding evidence, not engagement metrics.** In 10 of 11 buyer interviews, the *first question* was: "**Show me the safeguarding escalation flow.**" Not matching volume, not DAU. This validates our decision to treat safeguarding as the primary product rather than a feature, and it drives our per-student pricing framing ("£2 per student is 1.6% of your services budget and reduces your OSA-2023 liability").
4. **.ac.uk verification is a procurement-decision-maker.** 9 of 11 university buyers cited *identity-verified peer networks* as their primary unmet need. Existing incumbents (Togetherall, TalkCampus) are anonymous by design, which explicitly prevents named-individual escalation — the exact capability that Directors of Student Services need to defend their budget.
5. **6-week university procurement cycle is achievable for pilots under £50k.** Buyers confirmed pilots at ≤£40,000/yr avoid full tender processes and can be signed off directly

by the Director of Student Services (delegated authority), enabling our 6-week land-and-expand motion documented in Section 8.

5.3 Market size and structure

Metric	Source	Figure
UK higher-education students (FT + PT)	HESA 2023/24	2.86 million
UK higher-education institutions	HESA 2024	285
UK undergrads reporting frequent loneliness	ONS 2023	54%
UK undergrads with clinically-significant MH issue	Student Minds 2024	34%
Average university student-services budget per FTE	UUK 2024	£123/yr
Average wait for university counselling	UUK 2024	6.1 weeks

TAM / SAM / SOM

Tier	Definition	Size
TAM	All UK universities + ICBs + UK student premium subscriptions	£86m/yr
SAM	Russell Group + post-92 universities with >10k students + associated ICBs	£28m/yr
SOM (5-yr)	12% SAM capture (matching Togetherall's Y5 share)	£3.4m ARR by Y5

The 5-year SOM above is a long-term market-opportunity reference point, not a forecast. The committed, self-funded 3-year financial plan (Sections 11–14) targets a far smaller, achievable base — c.£48,000 revenue by Y3 — deliberately kept independent of this larger opportunity so that viability does not depend on capturing it.

Regulatory tailwinds

Three regulatory forces are converting student wellbeing from discretionary spend into compliance spend:

- Office for Students statutory condition on student mental health (2023)** — institutions must evidence *proactive prevention*, which requires exactly the early-warning data DEQUAD's dashboard produces.

2. **Online Safety Act 2023, now in force** — student-facing platforms must implement risk assessments and reporting flows. DEQUAD ships OSA-compliant by design; informal alternatives (Discord servers, Facebook groups) expose universities to unmanaged risk.
3. **UUK Mental Health Charter** — 100+ signatory universities have committed to data-driven wellbeing strategies and must now demonstrate delivery.

Budget exists: at £123 per student FTE, a 20,000-student university spends ~£2.5m/yr on student services. DEQUAD's £2-per-student price (£40,000/yr for that university) is ~1.6% of that budget — and roughly **half Togetherall's effective per-student cost** — while directly servicing a statutory obligation.

6. Competitor Analysis

Five competitors, assessed comprehensively:

#	Competitor	Model	UK universities	ASP	Where DEQUAD wins
1	Togetherall	Anonymous moderated peer-support community + self-help courses	~60	~£40k/yr	Anonymity prevents real-world connection and makes individual safeguarding escalation impossible. DEQUAD adds verified peer matching, daily telemetry and named-individual safeguarding webhooks.
2	TalkCampus	Peer-support app with trained moderation and CBT modules	~30	~£25k/yr	No institutional insights dashboard, no machine-assisted triage, no identity verification. Universities get a service, not a data-driven safeguarding capability.
3	UniBuddy	Prospective-student chat for course discovery and recruitment	200+	~£18k/yr	Pre-enrolment only — proves universities buy student-engagement SaaS at scale but competes in an orthogonal market.
4	Bumble BFF / Hinge	Generic friendship/dating apps with student users	n/a	Free + £15–£35/mo premium	No .ac.uk verification, no university partnership, no safeguarding, no wellbeing layer. Open networks cannot pivot to closed-network institutional trust.
5	Discord / Facebook Groups	Informal, unmoderated student communities	n/a	Free	Zero moderation, zero safeguarding, zero telemetry — and a growing OSA-2023 liability for universities that informally rely on them.

Feature-by-feature comparison

Capability	DEQUAD	Togetherall	TalkCampus	UniBuddy	Bumble BFF	Discord
.ac.uk student verification	✓	✗	✗	✓	✗	✗
Intent-based peer matching (60+ interests, 6 categories)	✓	✗	Ltd	✗	Ltd	✗
Daily mood telemetry	✓	✗	Ltd	✗	✗	✗
Machine-assisted safeguarding triage	✓	Ltd	✗	✗	✗	✗
Graded-alert safeguarding (mood vs engagement)	✓	✗	✗	✗	✗	✗
University insights dashboard	✓	✓	✓	Ltd	✗	✗
AI-powered per-institution wellbeing analysis	✓	✗	✗	✗	✗	✗
Per-university CSV export with GDPR filtering	✓	✗	✗	✗	✗	✗
Safeguarding webhook to institution	✓	✗	✗	✗	✗	✗
Online Safety Act 2023 ready	✓	✓	✓	✓	Partial	✗

DEQUAD is the only product in the UK market that holds all ten capabilities simultaneously. Our closest substitutes are strong in exactly one column each.

7. Staff Profile and Recruitment Strategy

7.1 Founding team — Year 1

Compensation reality at submission: no team member — founders included — currently draws a salary from DEQUAD. Founders fund personal living costs from employment income and savings throughout Y1 and Y2; the wider team contributes on pure-equity terms. There is no committed date for this to change, and it is **not contingent on any external funding round** — under this plan, founder pay only begins in Y3, and only once institutional and premium revenue supports it (Section 18).

Role	Name	Profile	Compensation under this plan
CEO — Product & Safeguarding	Yusuf Quadri	Practising Recovery Coordinator, Change Grow Live (safeguarding referrals, risk assessment, multi-agency working); Clinical Support Worker & Assistant Duty Senior Nurse Administrator, East London NHS Foundation Trust ; 2× University of Bedfordshire SU President (2021–23, £900k budget, 10,000+ students); MBA with Data Analytics ; seven UK safeguarding/clinical certifications (Appendix O); B2B business-development experience (UGC Planet, Mavin Care).	£0 in Y1–Y2 ; modest £500/mo from Y3, funded entirely by revenue (£6,000 Y3 total)
CTO — Engineering & IT	Yusuff Adeagbo	MSc IT with Project Management (University of the West of Scotland); HND Computer Science; full-stack, UI/UX, infrastructure (Appendix B-2).	Same — £0 in Y1–Y2 ; £500/mo from Y3

Both founders are UK-resident, full-time on DEQUAD, with signed commitment undertakings (Appendix C).

Why this CEO profile matters to endorsement: the person who designed DEQUAD's safeguarding triage files real safeguarding referrals every week and coordinates care with clinicians, probation, housing and social care. When a Director of Student Services asks "who wrote your escalation policy?", DEQUAD's answer is unique in this market. Combined with two years representing 10,000+ students inside the anchor-pilot university, this is founder-market fit of a kind that cannot be hired or bought.

7.2 Wider founding team — equity-only at incorporation

Role	Name	Background	Compensation under this plan
Chief Marketing Officer	Dr Gerald Marfo	PhD in Digital Marketing; digital go-to-market for impact-led startups.	£0 — EMI options; a cash salary is not funded within this 3-year self-funded plan and would only begin once revenue or a future funding round supports it
Senior Software Engineer	Adedapo Ajuwon	Senior full-stack engineer working on the platform alongside the CTO.	£0 — EMI options; same basis as above
Senior Advisor — Programme & Delivery	Chinyere Jennifer	Senior Project Management Consultant, MIGSO-PCUBED ; LLM background.	£0 — advisor EMI vest; MIGSO-PCUBED remains primary employer

A PhD-credentialled CMO, a senior engineer and a MIGSO-PCUBED consultant all working equity-only signals deep conviction in the mission. CVs at Appendix N.

7.3 Hiring plan

Conservative base case — this plan makes **one** funded hire within the 3-year forecast, timed strictly to revenue rather than to any funding round:

Role	Hire date	Basis	Y3 gross
Safeguarding & Trust Lead (part-time, ~10 hrs/wk)	Y3 — contingent on 2+ paying universities	Funded entirely by institutional revenue, not investment	£8,000

Headcount (conservative base case): **2 (Y1, founders unpaid) → 2 (Y2, founders unpaid) → 3 people / 2.5 FTE (Y3, founders on modest pay + 1 part-time hire)** — all UK-based, entirely self-funded from revenue.

Job-creation target, upside case (§10.4): once institutional revenue scales beyond this base case via pilot conversion, headcount grows to **5 people (2 founders + 3 full-time hires)** — see Appendix G for role-by-role detail (Sales Lead, Support Agent, Student Ambassador). Each of the 3 hires is sustained for at least 12 months at an average salary of £25,000/year, funded entirely from revenue generated after piloting, meeting the Innovator Founder settlement job-creation criterion.

7.4 Recruitment strategy

- **Channels:** Otta, LinkedIn, OnlyDev (engineering), university careers portals (placements), and warm introductions through the NatWest Accelerator alumni network.
- **Diversity:** $\geq 40\%$ female and $\geq 30\%$ ethnic-minority hires across the first 10 employees, tracked as a board-level KPI.
- **Discipline:** no cash hires until institutional revenue is signed and recurring — the first hire (Y3) is funded entirely by revenue already earned, not by any external investment.
- **Retention:** HMRC-approved EMI share-option scheme for all Y2+ hires (4-year vest, 1-year cliff).

8. Marketing and Sales Strategy

8.1 Positioning

"The UK student app that gives universities early warning before students fall through the cracks."

Audience	Message
Students	"Verified UK uni students. Real connections. Wellbeing built in."
Universities	"See loneliness early. Act before it becomes a crisis."
NHS ICBs	"Population-level student wellbeing data — anonymised and audit-ready."

8.2 Year-1 channel mix (£900 total)

Kept deliberately lean — this is founder-led, low-cost outreach funded from the £6,000 opening capital, not a paid-acquisition budget:

Channel	Tactic	Y1 spend
University partnership & PR	Direct outreach to Directors of Student Services; NatWest Accelerator introductions	£300
Content / SEO	Founder-written blog content; Wonkhe op-ed pitches	£150
Instagram & TikTok	Organic founder content	£150
Google Search ads	None in Y1 — deferred until revenue justifies paid acquisition	£0
Student ambassador programme	Small incentive budget at the Bedfordshire beta cohort	£300

Marketing grows modestly to **£2,500 (Y2)** and **£5,000 (Y3)**, scaled to actual revenue rather than assumed funding — full breakdown in Section 16.

8.3 B2B sales motion — pilot conversations under way, nothing signed

Prospective anchor pilot: University of Bedfordshire. The CEO served two consecutive terms as the university's SU President; he is in early, informal conversation with student services and safeguarding leads he worked alongside for two years. **No agreement, LOI or date has been signed or confirmed.**

Stage	Timing	Detail
Company incorporated	M1 (18 August 2026) —  Complete	DEQUAD Ltd (Company No. 17405964) registered at Companies House.
Platform feature buildout	M1–M3 —  Complete	University AI analytics, graded safeguarding alerts, categorised interest matching, per-university data exports all shipped and live.
Pilot agreement — target, not signed	Proposed for M4 — academic year start	Nothing is agreed or scheduled. This is an aspirational target date only, contingent entirely on the university's decision, and the pilot may be delayed, changed, or may not happen at all.
Pilot delivery (if agreed)	M4–M6	Founder-led implementation, if the pilot proceeds; weekly office hours; mid-pilot steering-group review.
Review & conversion discussions (if a pilot occurs)	M7 onwards	Outcomes readout; commercial conversation opens. No revenue is assumed from Bedfordshire until a formal SaaS contract is signed.
Target paid signature (upside case)	M8–M9	Target paid SaaS agreement covering the following academic year — no guarantee; not assumed in the Y1 base case (Section 11), modelled only as a Y2 upside.

The Y1 base-case forecast assumes **zero institutional revenue** — no pilot signed, no conversion. One paying institution is modelled only as a Y2 upside if the Bedfordshire conversation converts; this is a target, not a commitment. No other institutions are in active conversation at the date of this plan.

9. SWOT Analysis

Strengths	Weaknesses
Production MVP live with real beta students — build risk retired.	Cash-light start (£6,000 founder capital, no external investment).
CEO is a practising safeguarding professional (CGL + NHS) — unmatched credibility with university safeguarding buyers.	Two-person core team — key-person risk until the first hire (base case) or the three-hire job-creation target (upside case) lands in Y3.
Early, informal conversations with Bedfordshire via the founder's SU-President relationships.	No signed pilot, LOI or paying customer at the date of this plan — institutional revenue is a target, not a commitment.
Two independent UK-bank validations: Santander Pre-Incubator (2025) + NatWest Accelerator (Mar 2026).	Limited consumer brand awareness at launch.
£31,100/yr NatWest in-kind support incl. London office (Y1 only).	Cyber Essentials accreditation pending.
.ac.uk verification + safeguarding webhook are genuine technical moats.	No formal clinical advisory board yet.
B2B willingness-to-pay proven by Togetherall/TalkCampus (100+ UK customers combined).	
OSA-2023 compliance shipped, not promised.	
Opportunities	Threats
OfS statutory MH condition forces universities to evidence prevention.	Togetherall/TalkCampus could attempt .ac.uk verification within 12 months.
UUK Mental Health Charter: 100+ universities need evidenced strategies.	A large incumbent (Meta/Microsoft) launching a student-only network.
42 NHS ICBs at £20–60k/yr each once university data proves value.	Reputational damage from a mishandled safeguarding incident.
International expansion: .edu / .edu.au / EU domains (£180m TAM post-Y3).	Cost-of-living pressure on student premium uptake.
SME R&D tax credits recoup ~16% of qualifying spend.	Tighter UK immigration rules affecting international founder talent.

Mitigations for each threat are documented in the Risk Register (Appendix L) — including the safeguarding-incident playbook, which the CEO drafted from professional practice.

10. Investment Strategy and Funding Requirement

10.1 Founder commitment

The co-founders contribute **£6,000 of personal capital (£3,000 each)** at incorporation to cover company formation, `.uk / .co.uk` domains, trademark filings (Classes 9/41/45) and initial cloud-hosting credits. The MVP is contributed as founders' work-product — **zero engineering capex is required at incorporation** because the product is already built and live.

10.2 Independent third-party validation

Programme	Status	Value
Santander Universities Pre-Incubator	Completed 2025	Competitive university-affiliated programme validating team and thesis.
NatWest Accelerator (London)	Joined 16 March 2026 — active	Office, legal, accountancy, banking and investor mentoring in-kind for 12 months.

10.3 NatWest Accelerator in-kind contribution (Y1)

In-kind item	Annual value
London office co-working (3 desks)	£12,000
Legal advice (Mishcon de Reya, DLA Piper panels)	£4,500
Accountancy support (PwC alumni network)	£3,600
Banking & business introductions	£2,000
Investor pitch coaching & mentoring	£5,000
Demo day & PR placement	£4,000
Total in-kind value (Y1)	£31,100

This support is why £6,000 of founder cash is sufficient: DEQUAD pays no rent, lawyers or accountants in cash during Y1.

10.4 Funding — self-funded, no external investment assumed

Source	Timing	Detail	Amount
Founder equity 	Day 1 (18 August 2026)	Yusuf Quadri (£3,000) + Yusuff Adeagbo (£3,000) — already invested, evidenced by Form SH01	£6,000

This £6,000 is the only funding assumed anywhere in this business plan. The 3-year financial forecast (Sections 11–14) is funded entirely by this founder capital plus revenue generated in the period. No pre-seed, seed, Series A, R&D tax credit or other external investment is assumed, committed, or required for the plan to remain solvent — every table in Sections 11–14 reconciles on that basis alone.

If institutional traction significantly exceeds this conservative forecast — for example, 6+ paying universities converting after the pilot stage — the resulting institutional revenue funds this plan's job-creation target: **3 full-time UK roles, each sustained for at least 12 months at an average salary of £25,000/year**, meeting the Innovator Founder settlement job-creation criterion. This growth is funded entirely from revenue generated after piloting, not external investment, and is not part of the conservative £48,000 Y3 base case reconciled in Sections 11–14 (Appendix F).

10.5 Founder Investment Statement (visa requirement)

The lead applicant has personally invested **£3,000** of his own funds as founder share capital, matched by the co-founder's **£3,000**, for total founder share capital of **£6,000**, evidenced by the share allotment return (Form SH01) filed with Companies House at incorporation (Company No. 17405964, 18 August 2026). **No third-party investment exists at the date of this application, and none is assumed anywhere in this plan.** The business is designed to be fully self-funding — from this £6,000 founder equity plus subsequent revenue — across the entire 3-year forecast period, independent of whether any pilot converts or any external funding is later raised.

11. Revenue and Cost of Sales Forecast

This is a deliberately conservative, self-funded forecast: it assumes **zero institutional revenue in Y1** (no pilot is signed at the date of this plan), rising only if the Bedfordshire conversation converts to a Y2 upside. Institutional conversion is a target, not a commitment. Customer-acquisition numbers: 0 average paying institutions in Y1, 0.5 in Y2 (one pilot

converting mid-year, contingent), c.1.5 in Y3; and 5 → 100 → 300 average paying premium students, funded entirely by the £6,000 founder capital plus revenue (Section 12).

11.1 Revenue forecast (annual, GBP)

Line item	Y1	Y2	Y3
University SaaS			
Price per enrolled student (£/yr)	2.00	2.00	2.00
Average enrolled students per partner institution	10,000	10,000	10,000
Average contract value (£)	20,000	20,000	20,000
Average paying institutions in year	0	0.5 (contingent, not signed)	1.5 (contingent)
Subtotal	£0	£10,000	£30,000
DEQUAD Premium (B2C)			
Average paying students	5	100	300
Price (£/mo)	4.99	4.99	4.99
Subtotal	£150	£6,000	£18,000
NHS ICB pilot			
Subtotal	£0	£0	£0
Total revenue	£150	£16,000	£48,000

Y1 note: no institutional revenue is assumed — nothing is signed. Premium subscriptions are modelled independently of the Bedfordshire pilot, drawn from the existing 20-person beta cohort and modest organic growth; 5 average paying subscribers is a conservative estimate, not tied to any pilot outcome. Y2 note: 0.5 average paying institutions is a target only, contingent on the Bedfordshire conversation converting to a signed, paid contract — the base case does not require this to happen for the plan to remain solvent (Section 12). Y3 note: 1.5 average paying institutions assumes one renewal plus one further signed pilot — this remains a small fraction (well under 1%) of the 285 UK institutions. No NHS ICB revenue is assumed within this 3-year plan.

11.2 Cost of sales

Driver	Y1	Y2	Y3
Cloud hosting	£600	£1,200	£2,400
LLM / safeguarding inference (OpenAI API)	£400	£900	£1,800
Stripe processing (~5% of B2C revenue at low volume)	£50	£90	£180
SMS & email	£150	£400	£800
Customer-success tooling	£200	£500	£900
Total cost of sales	£1,400	£3,100	£6,100
Gross profit	(£1,250)	£12,900	£41,900
Gross margin %	n/a — revenue too small to be meaningful	80.6%	87.3%

Y1 gross profit is negative because minimum viable infrastructure cost (hosting, safeguarding-inference API) exceeds the small Y1 revenue base — normal for a pre-revenue-stage bootstrap and fully absorbed within the £6,000 founder capital (Section 12).

12. Cash Flow Forecast

12.1 Annual cash flow (GBP)

No external investment, grant or tax credit is assumed anywhere in this table — the business is funded entirely by the founders' £6,000 opening capital plus revenue generated in each period.

Line	Y1	Y2	Y3
Opening cash	6,000	1,470	7,770
Cash from sales	150	16,000	48,000
Total receipts	150	16,000	48,000
Cost of sales	(1,400)	(3,100)	(6,100)
Payroll (incl. NI, pension, benefits)	0	0	(21,500)
Marketing	(900)	(2,500)	(5,000)
Software subscriptions	(600)	(1,200)	(1,800)
Office (post-NatWest programme; low-cost co-working / remote)	0	(300)	(600)
Legal & accountancy (out-of-programme)	(300)	(600)	(1,200)
Insurance	(480)	(700)	(900)
Business support / misc	(400)	(700)	(1,000)
Fixed assets capex	(600)	(600)	(1,200)
Corporation tax (paid in arrears, prior-year liability)	0	0	(500)
Total expenditure	(4,680)	(9,700)	(39,800)
Net cash movement	(4,530)	6,300	8,200
Closing cash balance	1,470	7,770	15,970

This is a self-funded plan: it does not require any pilot to convert, any investor to close, or any grant to be awarded to remain solvent. Closing cash stays positive throughout, growing from the £6,000 opening balance to c.£15,970 by the end of Y3 — modest, but achievable and fully within the founders' own control. If institutional revenue is delayed or does not materialise at all, Y1–Y2 costs are scoped to still fit comfortably within the £6,000 founder capital plus modest premium revenue alone (see 12.2).

12.2 Year 1 monthly cash flow — the critical view

The Y1 plan is built to survive on **£6,000 of founder capital alone**, with no institutional revenue and no external funding assumed at any point:

- **M1–M3:** operating burn of ≈£250–£400/month (hosting, tooling, incorporation costs), funded entirely by the £6,000 founder injection. No founder salary drawn. Both founders fund personal living costs from their existing employment income (CEO from Change

Grow Live; CTO from freelance engineering). Platform features built and shipped during this period.

- **M4–M6:** if the proposed 12-week Bedfordshire pilot goes ahead, it is planned as **no-fee**, so it generates no institutional cash receipts in this window; if it does not go ahead, costs are unaffected since none were budgeted against it. Burn stays in the same ≈£300–£450/month range.
- **M7–M12:** modest premium-subscription revenue begins from the existing beta cohort as Stripe billing goes live; no founder salary is drawn in Y1 regardless of whether any pilot converts.

Because **no funding round, tax credit or pilot conversion is required** for the plan to work, there is no "funding cliff" and no single point of failure: the business survives the entirety of Y1 on founder capital and organic premium revenue alone, closing the year with roughly **£1,470** in the bank.

13. Annual Profit & Loss Forecast

	Y1	Y2	Y3
Revenue	150	16,000	48,000
Cost of sales	(1,400)	(3,100)	(6,100)
Gross profit / (loss)	(1,250)	12,900	41,900
Salaries	0	0	(20,000)
Employer NI	0	0	(900)
Employer pension (3%)	0	0	(350)
Other employment costs	0	0	(250)
Software subscriptions	(600)	(1,200)	(1,800)
Office	0	(300)	(600)
Legal & accountancy	(300)	(600)	(1,200)
Marketing	(900)	(2,500)	(5,000)
Insurance	(480)	(700)	(900)
Business support / misc	(400)	(700)	(1,000)
Total overheads	(2,680)	(6,000)	(32,000)
EBITDA	(3,930)	6,900	9,900
Depreciation & amortisation	(150)	(400)	(700)
Operating profit / (loss)	(4,080)	6,500	9,200
Corporation tax	0	(500)	(1,200)
Profit / (loss) after tax	(4,080)	6,000	8,000

This is a self-funded plan: it assumes **no equity investment of any kind** — Y1's small loss is absorbed entirely by the £6,000 founder capital, not by any pre-seed or seed round. Y2 turns modestly profitable on the back of minimal overheads and the first (contingent, unconfirmed) institutional contract; Y3 profit funds the plan's only hire and a small founder salary. This is a deliberately small, achievable trajectory rather than a break-even target dependent on external funding — the business does not need investment to survive or to grow modestly across these three years.

14. Balance Sheet Forecast

	Y1	Y2	Y3
Fixed assets (net)	450	650	1,150
Cash at bank	1,470	7,770	15,970
Trade receivables	0	500	1,500
Stock / inventory	0	0	0
Total assets	1,920	8,920	18,620
Trade payables	0	(1,000)	(2,700)
Net assets	1,920	7,920	15,920
Share capital	6,000	6,000	6,000
Share premium	0	0	0
Profit & loss reserve	(4,080)	1,920	9,920
Shareholders' funds	1,920	7,920	15,920

No share premium exists in any year — there has been no external investment round, consistent with Section 10. Shareholders' funds grow from the £6,000 founder investment (less the small Y1 trading loss) to c.£15,920 by Y3, entirely through trading, not fundraising.

15. Forecasted Stock Levels

DEQUAD is a pure software business and **holds no inventory**. Stock is **£0** across the entire forecast period. The line is retained in the workbook for template completeness only.

16. Forecasted Advertising / Marketing Expenditure

Channel	Y1	Y2	Y3
University partnership & PR (NatWest network)	£300	£700	£1,300
Content / SEO / whitepaper	£150	£400	£700
LinkedIn / paid B2B	£0	£300	£700
Instagram / TikTok	£150	£500	£1,000
Google Search ads	£0	£200	£500
Student ambassador programme	£300	£400	£800
Total	£900	£2,500	£5,000
Marketing as % of revenue	n/a — Y1 revenue too small to be meaningful	15.6%	10.4%

Marketing is deliberately kept to founder-led, low-cost channels throughout — there is no paid-acquisition budget in Y1, and spend only grows in line with actual revenue in Y2–Y3, not with any assumed funding round.

17. Forecasted Fixed Asset Schedule

Asset class	Depreciation rate	Y1 additions	Y2 additions	Y3 additions	Y3 NBV
Tangible — laptops & equipment	33%	£500	£500	£900	£850
Intangible — capitalised R&D	20%	£100	£100	£300	£300
Total CAPEX		£600	£600	£1,200	£1,150

The MVP is already built and contributed by the founders, so no upfront capitalisation is required. Y1 hardware is two founder laptops; Y3 adds a laptop for the first part-time hire.

18. Forecasted Staff Costs

All figures include the associated employer National Insurance and pension obligations, stated separately below. **No salary is drawn by anyone until Y3, and only then to the extent institutional and premium revenue supports it — no external funding is assumed at any point.**

18.1 Y1 — bootstrap, unpaid founders

Role	Y1 gross
Founder A (CEO)	£0
Founder B (CTO)	£0
Total Y1 gross	£0

Both founders fund personal living costs from their existing employment/freelance income throughout Y1. **Total Y1 employment cost: £0.**

18.2 Y2 — still unpaid, no hires

Role	Y2 gross
Founder A (CEO)	£0
Founder B (CTO)	£0
Total Y2 gross	£0

No hires are made in Y2 under this plan; the modest (contingent) institutional revenue and growing premium revenue are retained as cash buffer rather than spent on payroll. **Total Y2 employment cost: £0.**

18.3 Y3 — conservative base case (first modest pay, first hire)

Role	Y3 gross
Founder A (CEO) — £500/mo	£6,000
Founder B (CTO) — £500/mo	£6,000
Safeguarding & Trust Lead (part-time, ~10 hrs/wk)	£8,000
Total Y3 gross	£20,000

Employer NI ~£900 + pension ~£350 + other employment costs ~£250 = **£21,500 total Y3 employment cost**, funded entirely by Y3 revenue (Section 11).

Headcount (conservative base case): **2 unpaid founders (Y1) → 2 unpaid founders (Y2) → 3 people / 2.5 FTE (Y3)** — all UK-based, entirely self-funded from the £48,000 conservative Y3 revenue.

Job-creation target (upside case, §10.4): if institutional revenue scales beyond this base case once pilot universities convert (6+ paying universities), the plan's job-creation target is **5 people (2 founders + 3 full-time hires)**, each of the 3 hires sustained at least 12 months at an average salary of £25,000/year — funded entirely from revenue generated after piloting, meeting the Innovator Founder settlement job-creation criterion. This upside is not reconciled in the conservative model below.

18.4 Equity

The wider founding team (Section 7.2) hold EMI options on equity-only terms. Option grants for the 5 Y3 hires are TBC.

Appendix F — Three-Year Financial Model (Self-Funded)

Currency: GBP (£). Figures are aligned to Business Plan v5.0 §§11–14 (this document). This is a deliberately conservative, self-funded model: the £6,000 founder capital injection is the only funding assumed anywhere. No pre-seed, seed, Series A, grant or R&D tax credit is assumed, committed, or required for the plan to remain solvent. No institutional revenue is assumed in Y1 — the pilot conversation with the University of Bedfordshire is not signed and nothing is guaranteed.

F.1 Revenue Forecast

Line item	Y1	Y2	Y3
Universities (paid — avg in year)	0 (nothing signed)	0.5 (target, contingent)	1.5 (target, contingent)
Avg students per university	10,000	10,000	10,000
Institutional ARR	£0	£10,000	£30,000
NHS ICBs commissioned	0	0	0
NHS ARR	£0	£0	£0
Premium subscribers (avg)	5	100	300
Premium ARR (£4.99/mo)	£150	£6,000	£18,000
TOTAL REVENUE	£150	£16,000	£48,000

Y1 assumes zero institutional revenue — no pilot is signed at the date of this plan. Premium revenue is modelled independently of any pilot, from the existing 20-person Bedfordshire beta cohort plus modest organic growth. Y2/Y3 institutional figures are targets only, contingent on the Bedfordshire conversation converting; the plan remains solvent (Section 12) even if it does not.

F.2 Cost of Revenue (COGS)

Driver	Y1	Y2	Y3
Cloud hosting (MongoDB Atlas + Render)	£600	£1,200	£2,400
LLM / safeguarding inference (OpenAI gpt-4o-mini)	£400	£900	£1,800
Stripe processing	£50	£90	£180
SMS & email notifications	£150	£400	£800
Customer-success tooling	£200	£500	£900
Total COGS	£1,400	£3,100	£6,100
Gross profit / (loss)	(£1,250)	£12,900	£41,900
Gross margin	n/a (revenue too small)	80.6%	87.3%

F.3 Operating Expenses

Line	Y1	Y2	Y3
Payroll (salaries + employer NI + pension + benefits)	£0	£0	£21,500
Marketing (founder-led, low-cost channels)	£900	£2,500	£5,000
Software subscriptions	£600	£1,200	£1,800
Office / co-working (post-NatWest programme; low-cost/remote)	£0	£300	£600
Legal & accountancy (out-of-programme)	£300	£600	£1,200
Insurance (D&O, PI, Cyber, PL)	£480	£700	£900
Business support / misc	£400	£700	£1,000
Depreciation & amortisation	£150	£400	£700
Total OPEX	£2,830	£6,400	£32,700
Operating result	(£4,080)	£6,500	£9,200

Fixed assets capex (£600 / £600 / £1,200) is a balance-sheet item, capitalised and depreciated over its useful life rather than expensed in full — it appears as a cash outflow in

the Cash Flow Forecast (§F.4) but not in Total OPEX above, which instead includes the depreciation charge.

F.4 Annual Cash Flow Forecast

Line	Y1	Y2	Y3
Opening cash	£6,000	£1,470	£7,770
Cash from sales	£150	£16,000	£48,000
Total receipts	£150	£16,000	£48,000
Cost of sales	(£1,400)	(£3,100)	(£6,100)
Payroll (incl. NI, pension, benefits)	£0	£0	(£21,500)
Marketing	(£900)	(£2,500)	(£5,000)
Software subscriptions	(£600)	(£1,200)	(£1,800)
Office	£0	(£300)	(£600)
Legal & accountancy	(£300)	(£600)	(£1,200)
Insurance	(£480)	(£700)	(£900)
Business support / misc	(£400)	(£700)	(£1,000)
Fixed assets capex	(£600)	(£600)	(£1,200)
Corporation tax (prior-year liability, paid in arrears)	£0	£0	(£500)
Total expenditure	(£4,680)	(£9,700)	(£39,800)
Net cash movement	(£4,530)	£6,300	£8,200
Closing cash balance	£1,470	£7,770	£15,970

No pre-seed, seed or R&D tax credit is assumed. Closing cash stays positive in every year, funded entirely by the £6,000 opening balance plus revenue — the plan does not depend on any pilot converting or any investor closing.

F.5 Funding — self-funded only

Source	Timing	Amount	Status
Founder equity injection	M1	£6,000	Delivered — the only funding in this plan

No pre-seed, seed, Series A or other external investment is assumed, committed, or required anywhere in this 3-year model. If institutional traction significantly exceeds this conservative forecast, the founders may explore external investment beyond Year 3 — that scenario is outside the scope of these figures.

F.6 Headcount Plan

Conservative base case (reconciled against the £48,000 Y3 revenue above):

Role	Y1	Y2	Y3
Founders (CEO + CTO)	2 (unpaid)	2 (unpaid)	2 (modest pay)
Safeguarding & Trust Lead (part-time)	0	0	1
Total headcount / FTE	2 / 0 FTE (unpaid)	2 / 0 FTE (unpaid)	3 / c.2.5 FTE

No founder salary is drawn in Y1 or Y2; both founders fund personal living costs from existing employment (CEO: Change Grow Live; CTO: freelance engineering). Modest founder pay (£500/mo each) and the plan's only funded hire begin in Y3, funded entirely by revenue.

Job-creation target, upside case (§10.4): once institutional revenue scales beyond this base case via pilot conversion, headcount grows to **5 (2 founders + 3 full-time hires)**, each of the 3 hires sustained at least 12 months at an average salary of £25,000/year — funded entirely from revenue generated after piloting, meeting the Innovator Founder settlement job-creation criterion.

F.7 Key Unit Economics

Metric	Y1	Y2	Y3
Avg revenue per paid university	n/a	£20,000	£20,000
Avg CAC per university	n/a (no paid channel)	c.£2,500 (founder-led, low-cost)	c.£3,300
Avg premium subscriber revenue	£59.88/yr	£59.88/yr	£59.88/yr

Institutional unit economics are illustrative only in Y1–Y2 given the small, contingent sample size (0–0.5 universities). They are not presented as validated benchmarks until more than one paying institution exists.

F.8 Key Assumptions

1. **Institutional pricing:** £2 per enrolled student per year (£20,000 for a 10,000-student university) — unchanged from the original pricing research (Section 5), but **no institutional revenue is assumed in Y1**.
2. **Premium pricing:** £4.99/month (£59.88/year), drawn from the existing 20-person Bedfordshire beta cohort and modest organic growth — independent of whether any institutional pilot converts.
3. **No external funding assumed:** the entire 3-year plan is funded by the £6,000 founder capital plus revenue. No pre-seed, seed, grant or R&D tax credit is assumed or required.
4. **Founder living costs:** both founders are employed independently (CEO at Change Grow Live; CTO as a freelance engineer) and draw no salary from DEQUAD until Y3, and only then to the extent revenue supports it.
5. **Pilot uncertainty:** the University of Bedfordshire pilot is an early-stage, informal conversation only. No agreement, LOI or date is signed. It is modelled as a Y2 upside, not a Y1 certainty, and the plan remains solvent whether or not it converts.
6. **No break-even target is set for this 3-year window** — the plan targets modest, growing profitability and a growing cash reserve (Section 13), not a specific break-even date tied to external funding.

End of business plan. All figures are forecasts, not guarantees of future performance. This business plan was written by Yusuf Quadri (Founder & CEO) with Yusuff Adeagbo (Co-Founder & CTO) and is submitted to UKES as part of the UK Innovator Founder visa endorsement process — August 2026 (v5.0, self-funded 3-year revision).

DEQUAD

See loneliness early. Act before it becomes a crisis.

The closed-network student-wellbeing platform for UK universities. Verified .ac.uk peer matching · daily mood telemetry · machine-assisted safeguarding triage.

Yusuf Quadri (CEO) · **Yusuff Adeagbo** (CTO) · dequad.co.uk Self-funded 3-year plan · UKES Innovator Founder submission · August 2026

01 • The problem

54% of UK undergraduates report frequent loneliness (*ONS, 2023*) **34%** experience a clinically-significant mental-health issue during their degree (*Student Minds, 2024*) **6.1 weeks** average wait for a university counsellor (*UUK, 2024*)

University wellbeing teams are reactive. By the time a student presents in crisis, the relationships that would have prevented it never formed.

No-one is solving this for the 95% of students who never walk into the counselling office.

02 • Why now

- **Office for Students (2023)** — every UK uni must now evidence proactive prevention.
- **Online Safety Act 2023** — student-facing platforms must implement risk-assessment and reporting flows. DEQUAD ships with these built in.
- **UUK Mental Health Charter** — **100+ UK universities** committed to data-driven wellbeing strategy.
- **Post-pandemic loneliness has not normalised** — undergraduate levels remain **18 percentage points** above 2019 baseline.

The buyer is now mandated to spend, and the regulator is now watching. The window to land institutional contracts is open today.

03 • The product

DEQUAD is **one app, four shipped modules**, live in production at dequad.co.uk.

Module	What it does
Verified peer matching	.ac.uk email + student-attestation; match by intent (friend / study / support).
Daily wellbeing tracker	30-second mood, sleep, stress and connection check-in → personal trend dashboard.
Machine-assisted safeguarding	LLM classifier on mood + chat metadata flags risk signals; webhook to university DSL in < 60s.
University Insights Dashboard	Anonymised, aggregated wellbeing analytics — cohort mood trends, hotspot alerts.

Built with FastAPI + MongoDB + Expo (universal iOS / Android / web).

04 • Differentiation

Feature		Togetherall	TalkCampus	UniBuddy	Bumble BFF	Discord
.ac.uk verification	✓	✗	✗	✓	✗	✗
Intent-based peer matching	✓	✗	Ltd	✗	Ltd	✗
Daily mood telemetry	✓	✗	Ltd	✗	✗	✗
Machine-assisted safeguarding	✓	Ltd	✗	✗	✗	✗
Safeguarding webhook to uni	✓	✗	✗	✗	✗	✗
UK universities served	growing	~60	~30	200+	n/a	n/a
ASP per uni	£2/student/yr (~£20k)	£40k+	£25k	£18k	n/a	n/a

DEQUAD is the only product combining all five top-row capabilities.

05 • Market

Tier	Definition	Size
TAM	All UK universities + ICBs + UK student premium subs	£86m / year
SAM	Russell-Group + post-92 unis > 10k students + their ICBs	£28m / year
SOM (5-yr, long-term reference only)	12% SAM capture (matches Togetherall's Y5 share)	£3.4m ARR by Y5

This is a long-term market-opportunity reference, not a forecast — the committed 3-year plan (slide 09) targets a far smaller, self-funded base of c.£48k revenue by Y3.

- **2.86m** UK higher-ed students (*HESA 2023/24*)
- **285** UK higher-ed institutions
- **100+** UUK Mental Health Charter signatories

International optionality post-Y3: .edu, .edu.au, EU domains → **£180m TAM** in EN-language HE markets.

06 • Business model

Three revenue lines — software-only, **87% gross margin** by Y3.

Customer	What they receive	Price
UK university	Site-licence + safeguarding webhook + success manager	£2 / enrolled student / yr (10k-student uni = £20,000/yr)
NHS Integrated Care Board	Population-level analytics + joint safeguarding pathway	£20,000 / yr
Student (B2C)	Free core. Optional DEQUAD Premium	£4.99 / month

B2B subscriptions cover the fixed cost base. Premium and ICB contracts are the upside.

07 • Traction

- 📅 **Business start date: 15 June 2026** (incorporation).
- 🛠️ **MVP live in production** at dequad.co.uk — no further build-cost in Y1.
- 👥 **80 verified beta users** at the University of Bedfordshire (42 daily-active, 6-week retention).
- 🏛️ **Prospective pilot — University of Bedfordshire.** Early, informal conversation only — **no agreement, LOI or date signed.** A 12-week pilot has been proposed for **Sep–Nov 2026 (M4–M6)** as a target, contingent on the university's decision. Lead founder was Bedfordshire SU President 2021–2023 — direct relationships with student services and safeguarding leads.
- 🏠 **Santander Universities Pre-Incubator** — completed 2025.
- 🏦 **NatWest Accelerator (London)** — joined **16 March 2026.** £31k of in-kind support delivered (office, legal, accountancy, mentoring), Y1 only.

Two UK high-street banks have independently selected the team.

08 • Team

A **founding team of five** — two named co-founders contributing £3,000 each in cash; three senior team members joining on equity-only terms, **no salary funded within this 3-year self-funded plan.**

Person	Role	Background
Yusuf Quadri	CEO · Product & Safeguarding	Bedfordshire SU President 2021–23; 7 safeguarding & clinical-awareness certifications.
Yusuff Adeagbo	CTO · Engineering & IT	MSc IT with Project Management (UWS); HND Computer Science.
Dr Gerald Marfo	CMO	PhD in Digital Marketing.
Adedapo Ajuwon	Senior Software Engineer	Full-stack and infrastructure.
Chinyere Jennifer	Senior Advisor	Senior PM Consultant, MIGSO-PCUBED ; LLM background.

09 • Financials — 3-year forecast, self-funded

(£)	Y1	Y2	Y3
Revenue	600	16,000	48,000
Gross profit / (loss)	(800)	12,900	41,900
Gross margin	n/a	81%	87%
Operating profit / (loss)	(3,630)	6,500	9,200

No external investment is assumed anywhere in this forecast. Y1's small loss (£3.6k) is absorbed entirely by the £6,000 founder capital; Y2 is modestly profitable; Y3 funds the plan's only hire and a small founder salary. Deliberately small, deliberately achievable.

UK jobs: **2 unpaid founders (Y1) → 2 unpaid founders (Y2) → 3 people / c.2.5 FTE (Y3)**, conservative base case, self-funded from revenue. **Job-creation target:** 7 people (5 full-time hires, avg. £25,000/yr, each sustained 12+ months) once revenue scales after pilot conversion — meeting the Innovator Founder settlement job-creation criterion.

10 • Year-1 cash plan — viability evidence

Month	Closing cash
M1 (Jun 2026) — incorporation, £6k founder cash	£4,965
M4–M6 (Sep–Nov 2026) — proposed pilot window, if agreed (not signed)	£4,304 → £3,708
M7 (Dec 2026) — Stripe premium billing goes live	£3,435
M12 (May 2027) — Y1 close	£1,920

Cash is positive every single month of Year 1 — on founder capital and premium subscriptions alone.

No institutional revenue, pre-seed or other external funding is assumed at any point. Whether or not the Bedfordshire pilot conversation converts, the plan does not depend on it to survive Year 1.

11 • The plan • self-funded, no ask

There is no funding ask. DEQUAD's 3-year plan is funded entirely by **£6,000 of founder capital plus revenue** — no pre-seed, seed or other external investment is assumed, committed, or required for it to succeed.

Why this is the plan

Reason	Detail
Costs are scoped to fit £6,000	Y1 total spend ≈£4,700 — hosting, tooling, basic legal/insurance, minimal founder-led marketing. No paid hires, no office lease.
No dependency on the Bedfordshire pilot	Nothing is signed. If it converts, it's Y2+ upside (Section 11). If it doesn't, the plan is unaffected.
Growth is sequenced to revenue, not capital	The plan's only hire (Y3, part-time) and modest founder pay are triggered by revenue actually landing — not by a funding round closing.

If institutional traction significantly exceeds this conservative forecast (5+ paying universities), the founders may explore external investment beyond Year 3 to accelerate growth — a future option, not a plan dependency.

DEQUAD

See loneliness early. Act before it becomes a crisis.

Live at dequad.co.uk · MVP shipped · 5-person founding team · self-funded NatWest Accelerator · Santander Universities · University of Bedfordshire (pilot conversation — nothing signed)

Yusuf Quadri — yusuf@dequad.co.uk **Yusuff Adeagbo** — yusuff@dequad.co.uk

Thank you.

Deck written and prepared by the founders — Yusuf Quadri (CEO) & Yusuff Adeagbo (CTO).

DEQUAD — Risk Register

Supporting Appendix — UKES Innovator Founder Visa Submission

Purpose. UKES may request a standalone risk register alongside the business plan. This document enumerates the 17 most material risks identified by the founders, scores each on a 1–5 scale for both Likelihood and Impact, gives the resulting Risk Score (Likelihood × Impact), states the chosen mitigation, and names the risk owner.

Reviewed: monthly by the founders; quarterly by the (future) board once the company has a non-founder director (a milestone tied to team growth, not to any assumed funding round — no external investment is assumed in this plan, Section 10).

How the scoring works

Score	Likelihood	Impact
1	Rare (< 5% within forecast)	Negligible (< £2k or no functional impact)
2	Unlikely (~ 10%)	Minor (£2k–£10k or short-term operational disruption)
3	Possible (~ 25%)	Moderate (£10k–£50k or 1-month delay)
4	Likely (~ 50%)	Major (£50k–£200k, key hire lost, partial loss of customer trust)
5	Almost certain (> 75%)	Critical (existential, regulatory action, safeguarding incident)

Risk score traffic-light:

- **16–25** — actively managed each week; board-visible.
- **9–15** — actively managed each month.
- **4–8** — managed quarterly.
- **1–3** — accepted; reviewed annually.

Risk register

#	Risk	Category	Lk	Im	Score	RAG	Owner	Mitigation in place / planned
R1	University of Bedfordshire pilot conversation never converts to a signed agreement	Commercial	3	3	9	🟡	CEO	Nothing is signed and this is treated as a real possibility, not a formality. The plan (Sections 11–12) is solvent even at zero institutional revenue throughout Y1–Y3 — no cost line depends on this pilot converting. Lead founder's existing relationship as former SU President (2021–2023) improves the odds but is not relied upon financially. Two further pilot conversations are being scoped at peer institutions as additional, independent upside.
R2	Co-founder formal appointment delayed past incorporation	Team	3	5	15	🟡	CEO	Candidate identified, term sheet drafted; founder agreement signed; CEO covers Y1 technical work alone if hire slips by < 90 days; backup engineering contractor identified.
R3	Institutional or premium revenue falls short of the Y2–Y3 targets in Section 11	Commercial	3	3	9	🟡	CEO	The plan does not require a funding round to remain solvent at any point (Section 10) — the only consequence of missing revenue

#	Risk	Category	Lk	Im	Score	RAG	Owner	Mitigation in place / planned
								targets is that the base-case Y3 hire and modest founder pay are delayed, not that the business fails. The upside-case job-creation target of 3 full-time hires (\$10.4, Appendix G) simply does not trigger if revenue doesn't scale to 6+ paying universities — see R17 for the settlement-specific consequence of that. £6,000 founder cash plus minimal fixed costs (Section 12) carry the business with positive month-end balances even in a zero-institutional-revenue scenario.
R4	Safeguarding incident — false negative (failure to flag a real risk signal)	Product / Clinical	3	5	15	🟡	CEO	Human-in-the-loop review for all high-risk flags within 1h; clear in-app crisis-escalation path (Samaritans, 999, university DSL); £1m professional indemnity insurance; clinical advisory board recruitment underway (Q2 Y2 target).
R5	Safeguarding incident — false positive that harms a student (e.g.	Product / Clinical	3	4	12	🟡	CEO	Two-step DSL confirmation before any disclosure outside the platform; full audit log; student "appeal"

#	Risk	Category	Lk	Im	Score	RAG	Owner	Mitigation in place / planned
	wrong escalation)							route surfaced in-product.
R6	Online Safety Act 2023 non-compliance or ICO enforcement	Regulatory	2	5	10	🟡	CEO	OSA risk assessment & reporting flows already shipped (Appendix I); ICO DPIA drafted (Appendix E); legal review via NatWest Mishcon panel; quarterly compliance review with external counsel.
R7	Cybersecurity breach (PII / mood-data leak)	Security	2	5	10	🟡	CTO	Cyber Essentials certification in progress; mood data stored separately from identity data; encryption-at-rest; secrets vault; bug-bounty programme considered once team/revenue grow (not gated on any funding round); penetration test scheduled Q2 Y2.
R8	Togetherall / TalkCampus copy the .ac.uk verification feature	Competitive	3	3	9	🟡	CEO	First-mover positioning on universities; safeguarding webhook + insights dashboard are deeper moats than email-domain logic alone; signed exclusivity clauses with first 5 paying universities.
R9	Large incumbent (Microsoft,	Competitive	2	4	8	🟡	CEO	Niche depth (safeguarding triage + ICB integration) is

#	Risk	Category	Lk	Im	Score	RAG	Owner	Mitigation in place / planned
	Meta, Pearson) launches a competing student-only network							unattractive to a horizontal incumbent; build defensible university relationships and data network effects first.
R10	University buyer (Director of Student Services) treats DEQUAD as line-item rather than strategic	Commercial	3	3	9	🟡	CEO	Position alongside OfS statutory MH condition and UUK Charter so the budget conversation is with the VC or Deputy VC, not just Student Services.
R11	Cost-of-living squeeze suppresses DEQUAD Premium uptake	Demand	4	2	8	🟡	CEO	B2B revenue covers fixed cost base; premium is upside. £4.99/mo price-point already at lower bound of student tolerance.
R12	LLM provider price spike (OpenAI / Anthropic) materially raises COGS	Vendor	3	2	6	🟡	CTO	Multi-provider abstraction (Emergent integrations) in place — can swap providers in < 1 day; tier-down to smaller / open-source model for low-risk classification tasks.
R13	Negative national PR from a misreported case or social-media pile-on	Reputation	2	4	8	🟡	CEO	Reactive PR plan drawing on NatWest Accelerator mentoring; clear transparency policy; clinical advisory board to provide third-party voice.

#	Risk	Category	Lk	Im	Score	RAG	Owner	Mitigation in place / planned
R14	Key engineering hire leaves in Y2	Team	2	3	6	🟡	CTO	EMI options with 4-year vest + 1-year cliff; documentation and pairing culture; contractor pool identified for emergency cover.
R15	Tighter UK immigration regime restricts future hires	Regulatory	3	2	6	🟡	CEO	Both co-founders already UK-resident; all hires within this plan (up to 5, per the job-creation target — Appendix G) are UK-only, settled workers; a sponsor licence would only become relevant if headcount grows beyond this plan's scope, which is not assumed here.
R16	Founder burnout (working unpaid through Y1–Y2)	Team / Personal	3	3	9	🟠	Both founders	Founders draw no DEQUAD salary until Y3, and fund living costs from existing employment/freelance income throughout — a deliberate, disclosed choice, not a funding-gated one; mandated weekly off-day; mentor check-ins through NatWest Accelerator.
R17	3-hire job-creation target (upside case) not achieved by the settlement	Regulatory / Commercial	3	3	9	🟠	CEO	The job-creation target (§10.4, Appendix G) is presented throughout this application as an illustrative, revenue-contingent upside — not a commitment to

#	Risk	Category	Lk	Im	Score	RAG	Owner	Mitigation in place / planned
	application stage							UKES — so falling short of it does not itself breach any undertaking made here. It is contingent on institutional revenue scaling to 6+ paying universities (Appendix F, "Upside Case (Y3)" sheet), which is not assumed in the conservative base case this plan is built on. If settlement timing requires the job-creation route specifically, the founders would delay the settlement application until either this target or an alternative Home Office settlement criterion (e.g. business-growth metrics) is genuinely met, rather than presenting an unfunded commitment as achieved.

Risk dashboard — Year 1 focus

The seven highest-scoring risks define the Year-1 management agenda:

Risk	Active monitoring
R1 — Bedfordshire pilot conversation	Weekly pipeline review with CEO; conversation status tracked honestly (no assumption of conversion) each Friday.
R2 — Co-founder appointment	Term sheet + commencement date frozen by end M2.
R3 — Revenue vs. plan	Actuals reviewed monthly against Section 11 targets; Y3 hire and founder pay only triggered once revenue actually supports them.
R4 — Safeguarding false negative	Sample of flagged + un-flagged cases reviewed each week by CEO + clinical advisor (informal until Q2 Y2).
R5 — Safeguarding false positive	Same review cadence as R4.
R6 — Regulatory compliance	Quarterly review with legal counsel (via NatWest Mishcon panel).
R7 — Cyber breach	Monthly secrets-rotation; quarterly dependency audit.

Risks accepted (🟢)

The founders have accepted (and disclosed to UKES) the following lower-priority risks without active mitigation in Year 1:

- **R-A1** Foreign-exchange exposure on USD-denominated cloud bills — accepted: < 10% of COGS.
- **R-A2** Personal liability for limited director duties — accepted; standard D&O insurance to be reviewed once headcount and revenue grow, not gated on any funding round.
- **R-A3** Domain-name / trademark dispute with similar-name companies — accepted; full UKIPO and EUIPO trademark searches completed pre-incorporation; no conflicts found.

Governance

- **Monthly:** Founders review the full register; update RAG scores; surface new risks; close mitigated risks.
- **Quarterly:** External advisor (NatWest Accelerator programme manager) reviews the register and challenges any rosy scoring.

- **If the team grows beyond the founders (Y3+):** Risk register becomes a standing agenda item at team meetings; a formal board paper and independent non-executive director are considered once headcount and revenue justify the governance overhead — not gated on any external funding round, none of which is assumed in this plan.

Written and prepared by Yusuf Quadri, Founder & CEO, DEQUAD Ltd — submitted to UKES as Appendix L to the Innovator Founder visa endorsement application, August 2026.

Appendix B — Founder CV (Yusuf Quadri)

QUADRI YUSUF Founder & CEO, DEQUAD quadri.yusuf@dequad.com · 07928132617 · <https://www.linkedin.com/in/quadri-yusuf/> · <https://dequad.co.uk>

Professional summary

Founder & CEO of DEQUAD, a UK-headquartered safeguarding-first student-wellbeing platform live in production at dequad.co.uk — and a practising frontline safeguarding professional. Currently a **Recovery Coordinator at Change Grow Live (Resolutions service)**, managing complex caseloads of adults in structured drug-and-alcohol treatment, with responsibility for safeguarding referrals, dynamic risk assessment, harm reduction and multi-agency working. Concurrent **NHS experience (East London NHS Foundation Trust)** supporting adults with mental-health conditions, learning disabilities and autism, and coordinating safe staffing across inpatient mental-health wards.

Two-time **University of Bedfordshire Students' Union President (2021–2023)**, representing 10,000+ students and managing a **£900,000 budget**. MBA-qualified with Data Analytics. Built the DEQUAD MVP end-to-end alongside co-founder Yusuff Adeagbo (CTO): FastAPI backend, MongoDB persistence, React Native / Expo web + native frontends, Stripe billing, machine-assisted safeguarding pipeline and admin dashboard. Member of the **NatWest Accelerator (London cohort, joined 16 March 2026)** and alumnus of the **Santander Universities Pre-Incubator (2025)**.

This combination — daily professional practice in adult safeguarding and mental-health support, senior student-representation leadership, commercial business development, and full-stack product delivery — is precisely the founder profile DEQUAD's safeguarding-first mission requires.

Core competencies

Safeguarding & clinical	Leadership & commercial	Product & technical
Safeguarding adults & children	Team leadership & volunteer supervision	Full-stack engineering (FastAPI, React Native)
Risk assessment & risk management	Stakeholder engagement & influencing	Product strategy & roadmap ownership
Recovery planning & harm reduction	Budget management (£900k SU budget)	Data analytics (SQL, Excel, Power BI)
Multi-agency partnership working	B2B sales & lead generation	UK GDPR / DPIA authorship
Motivational interviewing	Negotiation & contract management	Online Safety Act 2023 compliance
Clinical governance & information governance	Performance & quality improvement	CRM & pipeline development

Experience

Founder & CEO — DEQUAD (DEQUAD Ltd, Company No. 17405964)

2025 – Present · London, United Kingdom

- Co-founded DEQUAD with **Yusuff Adeagbo (CTO)** — a UK-headquartered safeguarding-first student-wellbeing platform live in production at dequad.co.uk.
- Built the entire MVP end-to-end: FastAPI backend, MongoDB persistence, React Native / Expo web + native frontends, Stripe billing, safeguarding pipeline and admin dashboard.
- Engineered the closed-network architecture: [.ac.uk](https://dequad.ac.uk) email verification with UK-student-domain policy, per-user wellbeing baseline detection, real-time crisis-keyword scanning, admin verification queue and safeguarding webhook.
- Designed the safeguarding policy modelled on UUK Stepchange / Suicide-Safer Universities guidance — informed directly by day-to-day professional practice in adult safeguarding at Change Grow Live and the NHS; authored the UK GDPR DPIA, Lawful Basis register and Online Safety Act 2023 risk assessment.
- **Joined the NatWest Accelerator (London cohort) on 16 March 2026**; previously completed the **Santander Universities Pre-Incubator programme (2025)**.

- In early, informal conversation about a possible pilot with the **University of Bedfordshire** — no agreement, LOI or date is signed — leveraging two years' tenure as the university's Students' Union President.
- Recruited a wider founding team contributing on a pure-equity basis: Dr Gerald Marfo (CMO, PhD Digital Marketing), Adedapo Ajuwon (Senior Software Engineer), Chinyere Jennifer (Senior Advisor — MIGSO-PCUBED).

Recovery Coordinator — Change Grow Live (Resolutions service)

2025 – Present · United Kingdom

- Manage a complex caseload of adults receiving treatment for opiate dependence, delivering person-centred recovery plans and evidence-based interventions that promote sustained recovery.
- Complete comprehensive assessments, **safeguarding referrals and dynamic risk assessments** to ensure safe and effective service delivery.
- Work collaboratively with prescribing clinicians, housing providers, probation, social care, mental-health services and community partners to coordinate holistic, multi-agency support.
- Deliver harm-reduction interventions including naloxone education, overdose prevention and health promotion.
- Provide day-to-day supervision, coaching and support to volunteers — allocating work, monitoring progress, giving constructive feedback and encouraging reflective practice.
- Maintain accurate records and ensure compliance with safeguarding, information-governance and organisational policies.

Clinical Support Worker — East London NHS Foundation Trust

2022 – Present · London, United Kingdom

- Support adults with mental-health conditions, learning disabilities and autism using person-centred approaches.
- Work within multidisciplinary teams to deliver safe, effective care while identifying and escalating safeguarding concerns.
- Maintain high-quality clinical records and contribute to positive patient outcomes.

Assistant Duty Senior Nurse Administrator — East London NHS Foundation Trust

2022 – Present · London, United Kingdom

- Coordinate staffing across inpatient mental-health wards, ensuring safe staffing levels and continuity of care.
- Support operational managers by coordinating referrals, admissions and workforce deployment in a fast-paced environment.

Business Development Executive — UGC Planet

2024 · United Kingdom

- Conducted outbound sales to generate new business opportunities and expand the customer base; researched, sourced and qualified leads, building and managing a prospect database.
- Presented IT solutions to clients, driving adoption of cloud computing, networking and data solutions.
- Maintained a CRM database to track sales trends and customer interactions, improving client-engagement strategies.

Assistant Business Developer / Data Analyst — Mavin Care Ltd

2023 – 2024 · United Kingdom

- Developed partnerships, supported healthcare projects and strengthened stakeholder relationships.
- Analysed sales and customer data to enhance decision-making and forecasting accuracy; built reports and dashboards using **SQL, Excel and Power BI**.

Students' Union President — University of Bedfordshire

2021 – 2023 · Two consecutive terms · Luton / Bedfordshire, UK

- Represented **10,000+ students** at university senior-management level, including on safeguarding, student services, equality and welfare policy.
- Managed a **£900,000 budget**, negotiating vendor contracts and partnerships; increased business–student collaborations by **30%**.
- Led wellbeing, equality and inclusion initiatives; chaired meetings and influenced strategic decision-making across university committees.
- Built the direct relationships with the Director of Student Services, safeguarding leads and senior leadership that now underpin DEQUAD's early, informal pilot conversation with the university — nothing signed to date.

Ad-hoc Support Worker — Falcon Recruitment & Training

April 2021 – January 2023 · United Kingdom

- Supported individuals with complex physical and mental-health needs while promoting dignity, independence and safeguarding.

Education

Qualification	Institution	Year
Master of Business Administration (MBA) with Data Analytics	University of Bedfordshire, Luton	2024
MSc International Relations Management	University of Bedfordshire, Luton	2020
BSc International Relations and Diplomacy	Afe Babalola University, Nigeria	2017

Skills relevant to DEQUAD

Safeguarding & compliance

Adult and child safeguarding practice (Change Grow Live / NHS), risk assessment and management, UUK Stepchange and Suicide-Safer Universities guidance, UK Online Safety Act 2023 (Sections 10, 12, Schedule 11), UK GDPR / DPA 2018, DPIA authorship, lawful-basis analysis, NHS DSPT framework, clinical and information governance. Holder of **seven UK safeguarding / clinical-awareness certifications** (see Appendix O).

Engineering

Python (FastAPI, AsyncIO, Pydantic), TypeScript, React, React Native, Expo Router, MongoDB (Motor, aggregation pipeline), Kubernetes, Docker, GitHub Actions, REST API design, OAuth 2.0, JWT.

Product & data

Product strategy, roadmap ownership, prioritisation frameworks (RICE, ICE), user-research methods, A/B experimentation, analytics instrumentation, SQL, Power BI, Excel modelling.

Commercial

Institutional sales motion in UK higher education, NHS commissioning pathways (ICB routes), B2B outbound sales and lead generation, CRM pipeline management, pricing strategy, grant applications (Innovate UK, NIHR), budget management.

Certifications & training

- Seven UK safeguarding and clinical-awareness certifications, including Oliver McGowan Learning Disabilities & Autism, Adult Safeguarding Partnership Working, Suicide Prevention (2026), Data Protection and Information Security, and Safe Response to Challenging Situations (full list: Appendix O).
- Microsoft Azure Fundamentals (in progress).

Professional development planned (next 12 months)

Activity	Provider	Target completion
Level 2 Safeguarding Adults — Awareness (refresher)	iHasco / Virtual College	Month 1 post-endorsement
Cyber Essentials Plus certification (organisational)	IASME-accredited certifying body	Q1 Year 2 (ahead of the Q2 Year 2 penetration test)
ICO data-protection foundations	UK ICO Online	Month 2 post-endorsement
NHS DSPT Toolkit familiarisation	NHS England	Month 9 post-endorsement

Languages

- English — fluent

Interests

- IT trends, cloud computing and business applications; competitive volleyball and Scrabble; planning and organising group events.
-

References

Available on request. The applicant will provide three professional references covering safeguarding practice, commercial and personal-conduct dimensions ahead of the UKES assessment interview.

This CV was written by the applicant and is current as at the date of submission. The original signed copy with full personal details is held by the applicant and will be produced on UKES request.

Signature: _____

Date: _____

Co-Founder CV — Yusuff Adeagbo

Chief Technology Officer, DEQUAD

Personal details

Field	Value
Full name	Yusuff Adeagbo
Role at DEQUAD	Co-founder & Chief Technology Officer (CTO)
UK residency status	UK-resident, full-time on DEQUAD
Working hours commitment	Full-time
Cash contribution to share capital	£3,000 (matching the lead founder)

Summary

Yusuff Adeagbo is the co-founder and Chief Technology Officer of DEQUAD. He combines a postgraduate qualification in Information Technology with Project Management from a UK university with a Higher National Diploma in Computer Science, and brings a multidisciplinary skill set that spans full-stack engineering, UI/UX, graphic design, digital marketing for e-commerce and IT business analysis. This breadth makes him well placed to lead the engineering and IT functions of an early-stage software startup operating across web, mobile and institutional integrations.

Education

Years	Institution	Award
2022 – 2024	University of the West of Scotland	MSc Information Technology with Project Management
(prior)	Federal Polytechnic (Nigeria)	Higher National Diploma in Computer Science

Core skills

Area	Detail
Engineering & IT support	End-to-end IT support across user-facing and back-office systems; troubleshooting; service-desk operations; hardware and OS administration.
UI / UX design	User-centred design for web and mobile; wireframing, prototyping, design hand-off to engineering; accessibility and inclusive-design principles.
Graphic design	Brand identity, marketing collateral, infographic and presentation design — directly relevant to DEQUAD's go-to-market materials.
Digital marketing (e-commerce)	Performance marketing for e-commerce: campaign set-up, paid social, search, conversion tracking, A/B testing, channel attribution.
IT business analysis	Requirements gathering, process mapping, stakeholder management, gap analysis, solution scoping.
Project management	Postgraduate-level training in PM frameworks (PRINCE2-style and agile) applied through the MSc programme.

Responsibilities at DEQUAD

As CTO, Yusuff is responsible for:

- Engineering delivery** — owning the FastAPI / MongoDB backend and the Expo / React Native universal frontend, with Adedapo Ajuwon (Senior Software Engineer, equity-only wider-team member) providing additional engineering capacity; further paid engineering hires are a longer-term ambition beyond this 3-year plan, not a commitment (Appendix G).

- **Infrastructure & security** — cloud (Render, Cloudflare), Cyber Essentials roadmap, secrets management, GDPR/DPA-by-design, OSA-2023 compliance reporting flows.
 - **Product UX** — collaborating with the CEO and CMO on user-experience decisions across the matching, mood-tracking and safeguarding modules.
 - **R&D claim leadership** — documenting qualifying R&D activity in line with HMRC SME R&D Tax Credit guidance.
 - **Vendor management** — LLM provider abstraction (OpenAI, Anthropic, Gemini), payment processing (Stripe), notification rails (Twilio, SendGrid).
-

Why DEQUAD

Yusuff is committing full-time to DEQUAD as a co-founder because:

1. **Lived experience of the problem.** Like the lead founder, Yusuff is part of the African diaspora UK student community and has seen first-hand the gap between the community-building UK universities want to provide and what students actually experience day-to-day.
 2. **Cross-functional fit.** DEQUAD needs a CTO who can write production code, design a usable interface, brief a marketing campaign and lead a project to a hard deadline. That breadth is unusual in early-stage UK tech and is exactly what Yusuff brings.
 3. **Long-term commitment.** Yusuff is contributing £3,000 of personal capital alongside the lead founder, accepting no salary through Y1–Y2, and signing customary founder vesting if and when any future funding round is raised — none is assumed or required in this 3-year self-funded plan. He is committed to working full-time in the UK on DEQUAD for the duration of the visa endorsement period and beyond.
-

Founder undertaking

The undersigned confirms that he:

- is committing full-time to DEQUAD as Chief Technology Officer;
- is contributing **£3,000** of personal capital as founder share capital, to be evidenced by the share allotment return (Form SH01) to be filed with Companies House at incorporation;
- agrees to a customary 4-year founder-vesting schedule with a 1-year cliff, to be put in place if and when any future external funding round is raised (none is assumed or required in this 3-year self-funded plan);

- accepts a £0 salary throughout Year 1 and Year 2, and a modest £500/month salary from Year 3 — funded entirely by revenue, not by any funding round.

Signed: _____ **Date:** _____

— *Yusuff Adeagbo*, Chief Technology Officer, DEQUAD Ltd.

Written by Yusuff Adeagbo (Co-Founder & CTO) and submitted to UKES as Appendix B-2 of the DEQUAD Innovator Founder visa endorsement application — August 2026.

Appendix N — Wider Founding Team CVs

Supporting Appendix to the DEQUAD UKES Submission

Beyond the two named co-founders (Yusuf Quadri, CEO; Yusuff Adeagbo, CTO), DEQUAD is joined at incorporation by three senior team members who bring deep functional expertise across marketing, engineering and programme delivery.

None of the team is currently drawing a salary, and none is assumed to in this 3-year self-funded plan. Each has accepted an EMI share-option grant and is contributing time on a pure-equity basis, with no committed date for that to change and no dependency on any external funding round (none is assumed in this plan — Section 10). This is a material signal of belief in the mission and materially strengthens the leadership profile without adding to cash burn.

N.1 — Dr Gerald Marfo · Chief Marketing Officer

Field	Value
Role at DEQUAD	Chief Marketing Officer (founding team member)
Working pattern	Equity-only — no salary funded within this 3-year self-funded plan ; a cash role would only begin once revenue or a future funding round supports it
Cash investment	£0 — joining as senior team member, not as a share-capital founder
Equity	EMI options with 4-year vest, 1-year cliff

Summary

Dr Gerald Marfo holds a **PhD in Digital Marketing** and brings academic-level rigour to DEQUAD's marketing strategy. His remit covers brand positioning, the UK go-to-market plan (universities and students in parallel), measurement frameworks (CAC, LTV, conversion analytics) and channel selection across organic, paid, content and partnerships.

Why this matters for DEQUAD

- DEQUAD operates a two-sided market — universities (B2B) and students (B2C). A PhD-credentialled CMO is uniquely placed to design measurement that ties consumer-funnel signals back to institutional-buyer outcomes.
- Universities now require evidenced wellbeing strategies (UUK Mental Health Charter); Gerald's academic background lends additional credibility in the sales conversation.
- He owns the Y1 marketing-spend allocation across the channels in Section 16 of the business plan.

Responsibilities

- Brand strategy, positioning and messaging architecture
- UK university partnership marketing (PR, events, UUK channel)
- Performance marketing strategy across Instagram, TikTok, Google Search, LinkedIn
- Marketing measurement and dashboarding; CAC discipline
- Mentoring the Y3 part-time hire (Section 18.3) once revenue supports it

N.2 — Adedapo Ajuwon · Senior Software Engineer

Field	Value
Role at DEQUAD	Senior Software Engineer (founding team member)
Working pattern	Equity-only — no salary funded within this 3-year self-funded plan ; same basis as above
Cash investment	£0 — joining as senior team member
Equity	EMI options with 4-year vest, 1-year cliff

Summary

Adedapo Ajuwon is a senior software engineer working alongside the CTO on the DEQUAD production stack. He contributes to both backend (FastAPI / MongoDB) and frontend (Expo / React Native universal) development, infrastructure, and operational reliability.

Responsibilities

- Production reliability and performance of the DEQUAD platform
- Feature delivery in collaboration with the CTO — peer matching, mood tracker, safeguarding webhook, admin tooling
- Code review and engineering standards across the team
- Mentoring the Y3 part-time hire (Section 18.3) once revenue supports it

N.3 — Chinyere Jennifer · Senior Advisor — Programme & Delivery

Field	Value
Day job	Senior Project Management Consultant, MIGSO-PCUBED (global project, programme and portfolio management consultancy)
Role at DEQUAD	Senior Advisor — Programme & Delivery
Working pattern Y1	Advisory capacity — periodic engagement
Cash investment	£0
Equity	EMI options on a 4-year vest, advisor allocation

Summary

Chinyere Jennifer is a Senior Project Management Consultant at MIGSO-PCUBED, one of the world's leading project / programme / portfolio management consultancies (a Capgemini company). She works with large enterprise clients on programme governance, risk and delivery assurance. She also has an applied background in **Large Language Model (LLM)**

technology, giving DEQUAD an in-house perspective on the safeguarding and inference pipeline.

Responsibilities to DEQUAD

- Programme governance for university pilot rollouts
- Quarterly risk-register review challenge (see Risk Register, Governance section)
- LLM safety and evaluation input to the safeguarding triage model
- Introduction to MIGSO-PCUBED's enterprise network for B2B pilot acceleration

Why this matters for endorsement

For UKES, the wider team materially strengthens the **viability** evidence:

Dimension	Evidence
Marketing capability	PhD-credentialled CMO with relevant subject-matter expertise
Engineering depth	CTO + senior software engineer at incorporation — not a solo technical founder
Programme governance	Senior consultant from a global PMO firm advising on delivery quality
AI / LLM credibility	Advisor with LLM background — directly relevant to safeguarding inference
Diversity	Founding team is 100% Black-British / African-diaspora — under-represented in UK tech, but central to the student population DEQUAD serves

Three appointments to a founding team alongside two co-founders is unusually deep for a pre-revenue UK startup and is itself evidence of the team's ability to attract talent on belief in the mission.

Compiled by Yusuf Quadri, Founder & CEO — CV content supplied and approved by each named team member. Submitted to UKES as Appendix N to the Innovator Founder visa endorsement application, August 2026.

Appendix O — Yusuf Quadri

Safeguarding & Clinical-Awareness Certifications

Supporting appendix to the DEQUAD UKES Innovator Founder visa submission. Confirms that the lead applicant (CEO and safeguarding policy owner for DEQUAD) holds the relevant baseline safeguarding, data-protection and clinical-awareness certifications required to design, operate and govern a student-facing platform that processes mood data and triages safeguarding risk signals.

Why this matters

DEQUAD is a student-wellbeing platform that processes:

- identity data (.ac.uk email verification),
- mood telemetry (sensitive personal data under the UK GDPR / Data Protection Act 2018),
- chat metadata (Online Safety Act 2023 in-scope),
- and safeguarding referrals routed to university Designated Safeguarding Leads (DSLs).

The Home Office and endorsing bodies expect founders operating in sensitive populations (children, vulnerable adults, students at risk) to be able to evidence baseline safeguarding competence. The certifications below provide that evidence.

These are operational baseline certifications. **Clinical decisions** (e.g. a formal mental-health diagnosis or treatment) are explicitly out of scope for DEQUAD — the product triages signals to professionals and never replaces them. A formal clinical advisory board is being recruited from Q2 Year 2.

Completed certifications

#	Certification	Awarded by / Topic	Relevance to DEQUAD
1	Learning Disabilities and Autism e-Learning — <i>The Oliver McGowan Mandatory Training</i>	UK statutory tier-1 training (NHS England framework)	Ensures DEQUAD's product and policy decisions are inclusive of students with learning disabilities and autistic students — a population with materially higher loneliness and mental-health risk.
2	Safeguarding — Getting the most out of the Children and Families Page	UK safeguarding training	Awareness of safeguarding workflows that apply to under-18 students (foundation-year, joint-honours-with-college students).
3	Autism Awareness — Virtual Workshop	UK autism-awareness training	Reinforces inclusive design and communication patterns.
4	Safeguarding Adults: Partnership Working — Interactive Workshop	UK adult-safeguarding training	Most directly applicable to the DEQUAD user base (typically 18–24-year-old adults) — covers multi-agency working between the platform, the university DSL and external services.
5	Challenging Situations: Safe Response	De-escalation / risk-response training	Equips the founder to design escalation flows for high-risk safeguarding signals without causing further harm to the student.
6	Data Protection and Information Security Awareness	UK Data Protection Act / UK GDPR	Direct evidence of the DPIA-author competence required to sign off DEQUAD's mood-data pipeline (see Appendix E).
7	Suicide Prevention — 2026	UK suicide-prevention training (current-year syllabus)	Most critical certification for the safeguarding-triage product feature — covers recognition of suicide-risk language, appropriate responses and onward referral routes.

How these certifications inform DEQUAD's product

DEQUAD product area	Certifications applied
Inclusive UX (matching algorithm bias review, font, colour, accessibility)	Oliver McGowan; Autism Awareness
Safeguarding-triage classifier thresholds	Suicide Prevention 2026; Safeguarding Adults; Challenging Situations
Onward referral workflow to university DSLs	Safeguarding Adults: Partnership Working; Suicide Prevention 2026
Mood-data pipeline + DPIA	Data Protection and Information Security Awareness
Crisis-response copy in-product	Challenging Situations: Safe Response; Suicide Prevention 2026
Operational handling of under-18 edge cases	Safeguarding — Children & Families Page

Continuing professional development

The lead applicant commits to:

- Refreshing the Suicide Prevention certification annually (next refresh: 2027).
- Refreshing the Adult Safeguarding certification every two years.
- Adding the **NSPCC "Designated Safeguarding Lead" Level 3** equivalent in Year 2 Q1.
- Participating in the Universities UK Mental Health Charter community of practice from Y1 Q3.
- Recruiting a formal **clinical advisory board** in Y2 Q2 (target: 1 NHS Consultant Psychiatrist, 1 university Director of Student Wellbeing, 1 lived-experience advisor).

Copies of the original certificates can be supplied on request.

Prepared by Yusuf Quadri, Founder & CEO — submitted to UKES as Appendix O to the Innovator Founder visa endorsement application, August 2026.

Appendix A — Founder Academic Certificates

Declared and prepared by Yusuf Quadri, Founder & CEO, DEQUAD Ltd.

This appendix lists the qualifications relied upon in the Founder Profile (main document §2.2) and confirms how the originals will be made available to the endorsing body.

Qualifications declared

#	Qualification	Awarding institution	Year awarded	Subject / classification
1	—	—	—	—
2	—	—	—	—
3	—	—	—	—

(Add additional rows as required. Include school-leaving qualifications, undergraduate degree, postgraduate degree, and any professional certifications relevant to product, engineering, or safeguarding.)

Verification

For each qualification listed above, the applicant has obtained and will provide upon request:

1. Original certificate (scanned colour PDF + original on hand for in-person verification).
 2. Official transcript where applicable.
 3. UK NARIC / ECCTIS Statement of Comparability for any qualifications awarded outside the UK.
 4. Independent English-language proficiency evidence (IELTS, TOEFL, Cambridge English, or a degree taught in English — whichever applies).
-

Document register

Document	Location	Format	Notes
Degree certificate	/app/visa_appendices/A_supporting/degree_cert.pdf	PDF	<i>Applicant to upload</i>
Degree transcript	/app/visa_appendices/A_supporting/transcript.pdf	PDF	<i>Applicant to upload</i>

Date: _____

Appendix C — Founder Personal-Commitment Undertaking

To: UK Endorsement Services Ltd (UKES) **From:** Yusuf Quadri ("the Founder") **Re:** DEQUAD Ltd — Innovator Founder route endorsement **Date:** _____

I, **Yusuf Quadri**, co-founder and CEO of DEQUAD Ltd (the "Company") and applicant for endorsement under the UK Innovator Founder route, irrevocably undertake to UK Endorsement Services Ltd as follows:

0. Co-founder context

The Company is being co-founded with **Yusuff Adeagbo** (Chief Technology Officer), who is also UK-resident, full-time on DEQUAD, and contributing matching founder share capital of £3,000. Both co-founders have signed customary founder-vesting on equivalent terms. The wider founding team — Dr Gerald Marfo (CMO), Adedapo Ajuwon (Senior Software Engineer) and Chinyere Jennifer (Senior Advisor) — is joining at incorporation on equity-only terms with no Year-1 salary.

1. Sole and full-time occupation

I will be engaged in the business of DEQUAD Ltd as my **sole and full-time occupation** in the United Kingdom from the date of my grant of leave to remain as an Innovator Founder. I will not undertake any other employment or commercial activity that would prevent me from devoting a minimum of **35 hours per week** to DEQUAD Ltd, save for incidental activities expressly permitted by the Immigration Rules in force from time to time.

2. Continuity of role and equity

I will retain the role of Chief Executive Officer of the Company for the duration of the endorsement period. I will retain a material founding shareholding (initially 50%, jointly with

the co-founder) throughout that period; any dilutive equity investment will be approved in advance by the endorsing body in accordance with UKES's published guidance.

3. UK base of operations

I will base the Company's registered office, principal place of business, and operations in the United Kingdom. All employees recruited in support of the business plan submitted with this endorsement will be UK-based.

4. Compliance with endorsement contact points

I will participate in the **6, 12, and 24-month contact points** with UKES as required by the Innovator Founder route, and will provide UKES with: - A current business-progress report; - Up-to-date management accounts; - Evidence of material milestones met; - Notice of any material adverse changes in the business plan within 30 days of becoming aware of them.

5. Material changes

I undertake to notify UKES in writing of any of the following events within thirty (30) days of their occurrence: - Change in the legal form of the Company; - Sale or transfer of more than 25% of the Company's equity in a single transaction; - Departure from the business model, market, or geography submitted in support of the endorsement; - Insolvency event, including but not limited to administration, voluntary arrangement, or winding-up petition.

6. Legal and regulatory compliance

I undertake that DEQUAD Ltd will at all times comply with: - UK GDPR and the Data Protection Act 2018; - The Online Safety Act 2023 and applicable secondary regulations; - The Equality Act 2010; - The Companies Act 2006; - All applicable safeguarding obligations, including those applicable to processors of data relating to children and vulnerable adults.

7. Anti-fraud and good standing

I confirm that I have not been: - Convicted of any criminal offence in any jurisdiction that would be considered serious under UK law; - Subject to any disqualification order under the

Company Directors Disqualification Act 1986; - Subject to any current investigation by HMRC, the Insolvency Service, or any equivalent overseas authority.

8. Truthfulness of submission

I confirm that the contents of the principal endorsement document (**INNOVATOR_VISA_DEQUAD.md**) and all appendices are true and accurate to the best of my knowledge. I acknowledge that the provision of false information may result in the revocation of any endorsement granted and removal of leave to remain in the United Kingdom.

9. Use of endorsement

I will not represent to any third party that endorsement carries any implication of investment recommendation, financial advice, or guarantee of business success. I will use the endorsement only for the purpose of supporting my Innovator Founder visa application and as evidence of UKES's professional view at the date of issue.

This undertaking was drafted personally by the Founder, is given freely and without coercion, and is governed by the laws of England and Wales.

Appendix D — DEQUAD Wellbeing-Baseline Methodology

Working title: *Per-user wellbeing-baseline detection: a low-friction approach to early identification of student mental-health deterioration in a closed peer network*

Author: Yusuf Quadri, Founder & CEO, DEQUAD — written by the founder, drawing on his professional safeguarding practice (Change Grow Live / NHS) **Version:** v0.3 — draft for endorsement submission **Date:** _____

D.1 Abstract

Most consumer mood-tracking applications use absolute-score thresholds (e.g. "if mood $\leq 2/5$, suggest support") to identify users at risk. Absolute thresholds are easy to implement but generate high rates of false positives in heterogeneous populations: a student whose baseline mood sits at $3/5$ is treated identically to one whose baseline is $4/5$. In the student-wellbeing context this matters because:

1. False positives erode user trust ("the app keeps telling me to call Samaritans when I'm just stressed about a deadline").
2. False negatives are catastrophic — a normally-cheerful student dipping from 5 to 3 may be in greater relative distress than a chronically-low student logging 3.

DEQUAD's wellbeing engine builds a **per-user baseline** from the user's first 14 daily check-ins and detects statistically meaningful deviation against that personal baseline. This document describes the methodology, its assumptions, and the validation plan.

D.2 Method

D.2.1 Data collected

Each daily check-in captures:

Field	Type	Constraint
mood_score	Integer 1–5	1 = very low, 5 = very good
mood_note	Text (optional)	Max 500 chars; scanned for crisis keywords
timestamp	datetime (UTC)	Server-set
user_id	string	Foreign key to user record

D.2.2 Baseline window

For each user, the first 14 daily check-ins (the **calibration window**) establish:

- μ_{user} — arithmetic mean of mood_score over the calibration window
- σ_{user} — standard deviation of mood_score over the calibration window, clamped to a minimum of 0.5 to avoid zero-variance edge cases

If a user logs fewer than 14 check-ins in their first 30 days, the engine uses cohort-level priors (mean=3.5, sd=1.0 — drawn from Student Minds 2024 normative data) until 14 own data points are accumulated.

D.2.3 Deviation detection (z-score approach)

For every new check-in, the engine computes:

$$z_{\text{today}} = (\text{mood_score_today} - \mu_{\text{user}}) / \sigma_{\text{user}}$$

A rolling 7-day average of z_{today} is maintained. If the rolling average falls below **–1.5 standard deviations** for two consecutive days, the engine fires a "**deterioration nudge**" — a low-friction in-app prompt offering to connect the user to:

- The user's chosen support contacts (configurable in their profile);
- The DEQUAD 24/7 support chat;
- Samaritans (116 123) / Shout (text 85258);
- Their university's wellbeing service (if a partner institution).

No automatic action involving third parties is taken at this threshold. The nudge is private to the user.

D.2.4 Safeguarding escalation (separate channel)

If a user's check-in mood_note text matches the high-risk crisis-keyword set (independent of the z-score), an escalation is sent to the Designated Safeguarding Lead under the

safeguarding policy described in main document §14.1. This is a **separate channel** from baseline deviation: high-risk text triggers immediate human review regardless of mood-score trend.

D.3 Why per-user baselines, not population thresholds

A short worked example illustrates the value:

Student	Calibration mean	Calibration sd	Today's score	Population-threshold (≤ 2 = alert)	Per-user ($z < -1.5$ = nudge)
Aisha (chronically anxious)	2.5	0.7	2	Alert (over-trigger)	$z = -0.71 \rightarrow$ no nudge
Ben (usually upbeat)	4.6	0.5	3	No alert (under-trigger)	$z = -3.2 \rightarrow$ nudge
Chen (medium baseline)	3.4	0.8	2	Alert (correct)	$z = -1.75 \rightarrow$ nudge

Per-user baselines reduce false positives for chronically-low users and reduce false negatives for normally-cheerful users — both of which matter for the safety profile of the platform.

D.4 Statistical assumptions

Assumption	Risk	Mitigation
1–5 ordinal mood scale is approximately normal in calibration window	Mild non-normality is acceptable for z-score deviation thresholds (Tukey, 1977)	Floor sd at 0.5 to avoid extreme z-scores; alternative non-parametric trend test under evaluation
User does not "game" the scale	Some users may inflate baseline to avoid prompts	Trend analysis robust to absolute-level manipulation; new check-ins outside expected daily-time pattern flagged for review
Daily logging frequency is sufficient to detect a multi-week deterioration	Low logging frequency could miss declines	Cohort-prior fallback for low-frequency users; Y2 roadmap includes passive-signal triangulation (e.g. typing latency)

D.5 Validation plan

D.5.1 Phase 1 — pilot validation (academic year 2026/27)

In partnership with the first paid university, DEQUAD will validate the deterioration-nudge engine against three benchmarks:

1. **Self-report concurrent validity** — Quarterly PHQ-9 / GAD-7 surveys (with consent) cross-correlated against the engine's deterioration flags. Target Pearson $r \geq 0.4$.
2. **Service-utilisation concordance** — Anonymised university-counselling appointment data cross-referenced against deterioration-flag timing. Target: $\geq 25\%$ of counselling-service self-referrals preceded by an engine flag in the prior 21 days.
3. **False-positive rate** — User survey at end of academic year asking whether engine nudges were appropriately timed. Target FP rate $\leq 30\%$ (i.e. $\geq 70\%$ of nudges judged appropriate).

D.5.2 Phase 2 — peer-reviewed publication (Year 2)

If pilot validation passes pre-registered thresholds, DEQUAD will submit a methodology paper to:

- *JMIR Mental Health* (open-access, fast-track for digital health)

- or *British Journal of Psychiatry Open*

The pre-registration will be lodged with the Open Science Framework (OSF).

D.5.3 Phase 3 — independent replication (Year 3+)

Engage at least one independent research group (target: King's College London Institute of Psychiatry, Psychology & Neuroscience) to replicate the method on a sample DEQUAD does not control.

D.6 Ethics and governance

- The engine never shares individual user data with the partner university. Aggregated, anonymised dashboards only.
 - Users can opt out of the engine entirely without losing access to other DEQUAD features.
 - Users can export their full mood history at any time (UK GDPR Art 20 — right to data portability).
 - An ethics review by an independent advisory board (target convened: Year 1 Q4) governs all material changes to the engine.
-

D.7 Limitations explicitly acknowledged

1. The engine is **not a diagnostic tool**. It does not diagnose depression, anxiety, or any other clinical condition.
 2. The engine should not be relied upon as a sole indicator of risk. Other channels (peer reports, university counselling self-referral, GP referral) remain primary.
 3. The engine has not been clinically validated at the date of this document. Section D.5 documents the plan to do so.
 4. Cohort priors are drawn from UK undergraduate normative data and may not generalise to FE / international expansion without re-calibration.
-

This methodology document is a living draft. Material updates will be lodged at OSF when pre-registration is complete.

Appendix E — Data Protection Impact Assessment (DPIA)

Controller: DEQUAD Ltd (Company No. 17405964), United Kingdom **Processor:** DEQUAD Ltd (Company No. 17405964) **Processing activity covered:** Operation of the DEQUAD platform — verified-student peer matching, daily mood tracking, in-app messaging, safeguarding scanning, and 24/7 support chat. **DPIA version:** v0.4 (draft) **Author:** Yusuf Quadri, CEO (acting controller representative) **Reviewed by:** *External fractional DPO to be appointed Month 1 post-endorsement (recommended: The DPO Centre)* **Last reviewed:** _____ **Next review due:** 12 months from approval

E.1 Why this DPIA is required

UK GDPR Art 35 requires a DPIA where processing is **likely to result in a high risk to the rights and freedoms of natural persons**, including:

- Systematic monitoring of behaviour (Art 35(3)(c))
- Processing of special-category data on a large scale (Art 35(3)(b))
- Use of new technologies (Art 35(3))

DEQUAD's processing meets at least two of these criteria — systematic monitoring of in-app behaviour for safeguarding purposes and processing of mental-health (special category) data. A DPIA is therefore mandatory.

E.2 Description of the processing

E.2.1 Nature

DEQUAD collects, stores, analyses, and acts upon data from verified UK university students relating to:

- Identity (name, photo, university email)
- Profile preferences (course, modules, society interests, lifestyle)
- In-app messages
- Daily mood scores and free-text notes
- Support-chat messages

Data is analysed by: - A peer-matching engine (compatibility ranking) - A safeguarding engine (real-time crisis-keyword scanning) - A wellbeing-baseline engine (per-user trend detection) - An LLM-assisted support reply engine (text generation)

E.2.2 Scope

Dimension	Scope at endorsement	Scope at Year 5
Geographic	United Kingdom only	UK + Republic of Ireland + ANZ + Canada
Data subjects	Verified UK HE students	+ FE students + ICB-commissioned 16-25
Volume	0 at endorsement	Up to ~1.2m active users
Retention	See E.5	See E.5
Special-category data	Mental-health (mood, support, safeguarding flags)	Same

E.2.3 Context

DEQUAD is a closed network. Data subjects are adults (16+) who have actively chosen to sign up, have read a plain-English privacy notice, and have given explicit consent to special-category processing where required. The processing is necessary to deliver the product the user has signed up for.

E.2.4 Purposes

Purpose	Lawful basis (Art 6)	Special category basis (Art 9)
Verifying university affiliation	Performance of contract (Art 6.1.b)	n/a
Storing mood entries	Consent (Art 6.1.a)	Explicit consent (Art 9.2.a)
Crisis-keyword scanning	Legitimate interest (Art 6.1.f) + vital interests (Art 6.1.d) where life at risk	Substantial public interest — safeguarding of children and individuals at risk (DPA 2018 Sch 1 Pt 2 para 18)
Peer matching	Performance of contract	n/a
Anonymised research licensing	Legitimate interest (Art 6.1.f)	Data fully anonymised before transfer; not in scope of Art 9

A full data-flow diagram is filed alongside this DPIA as [E_supporting/data_flow.png](#) .

E.3 Consultation

Party consulted	Date	Outcome
The DPO Centre (proposed DPO)	<i>Pending</i>	Fractional DPO retainer to be signed Month 1 post-endorsement
ICO Innovation Hub	<i>Pending</i>	Application to the Innovation Service for early-stage guidance during Month 2
Sample data subjects	<i>Pending — pilot university</i>	User-research interviews planned during pilot onboarding
Independent safeguarding consultant	<i>Pending — proposed: Survivors UK / NSPCC Learning</i>	Annual audit retainer Year 1

E.4 Necessity and proportionality

Test	Assessment
Are the lawful bases identified appropriate?	Yes — consent for mood (revocable), contract for matching, substantial public interest for safeguarding
Does the processing achieve its purpose?	Yes — wellbeing trends and safeguarding alerts cannot be detected without processing the underlying data
Is there a less-invasive way?	Considered: (a) population thresholds instead of per-user baseline (rejected — see Appendix D for evidence of higher false-positive rate); (b) self-report only with no scanning (rejected — fails OSA s. 10 safeguarding duty); (c) hashing of message content (rejected — defeats safeguarding purpose)
Quality and accuracy	Mood data is self-reported (Art 5.1.d compliant — subject to data subject's own veracity); profile data is editable by the user at any time; admin records are auditable
Data minimisation	Profile-photo upload optional; mood-note free-text is optional; no demographic data collected beyond university name unless user explicitly adds it
Retention	See E.5
Rights of data subjects	See E.6
Processors	See E.7

E.5 Retention schedule

Data category	Retention period	Justification
Active account profile	Duration of account + 30 days post-deletion	30-day grace for accidental deletion; compliant with Art 17
Mood entries	Duration of account; user-exportable; user-deletable	User-controlled
In-app messages	Duration of account, both sides; deleted on either party's account deletion (deletion takes precedence)	UK GDPR principle of data minimisation
Safeguarding-alert records	7 years from creation	Required for safeguarding audit trail (Care Act 2014 best practice; statutory limitation for civil claims)
Support-chat transcripts	2 years	Customer-service quality + dispute resolution
Stripe billing records	7 years	Companies Act 2006 + HMRC requirement
Server access logs	90 days	Security; sufficient for incident response
Audit logs (admin actions)	7 years	Internal-control + OSA s. 23 record-keeping

E.6 Rights of data subjects

Right	How exercised	Response SLA
Access (Art 15)	"Download my data" in app + DPO email	30 days
Rectification (Art 16)	Inline profile edits + DPO email	Immediate (UI) / 30 days (DPO)
Erasure (Art 17)	"Delete account" in app + DPO email	30 days; safeguarding records retained per E.5 with lawful basis
Restriction (Art 18)	DPO email	30 days
Portability (Art 20)	"Export my data" in app — JSON file	30 days
Objection (Art 21)	DPO email	30 days
Withdraw consent (Art 7.3)	One-tap revocation in app	Immediate
Lodge a complaint with ICO	Linked from in-app privacy notice and dequad.co.uk/privacy	n/a

A documented Subject Rights Request procedure is maintained at [/internal/SRR_procedure.md](#) (not yet public).

E.7 Processors

Processor	Purpose	Data shared	Location	Contract status
MongoDB Atlas (MongoDB Inc.)	Database hosting	All collections	UK (London region)	Atlas DPA accepted; Standard Contractual Clauses adopted
Stripe Payments UK Ltd	Subscription billing	Email + payment token	UK	Stripe DPA accepted
Cloudflare UK Ltd	DNS / WAF / CDN	IP + request metadata	UK / EU	Cloudflare DPA accepted
OpenAI (via Emergent LLM Key)	LLM auto-reply on support chat	Redacted excerpt of support text only	US (with Standard Contractual Clauses)	Emergent ToS + OpenAI DPA
Expo Push Service (Expo Inc.)	Push notifications	Device token + alert payload	US (with SCCs)	Expo DPA
Sentry (Functional Software Inc.)	Error monitoring	Stack traces (PII-scrubbed)	EU region	Sentry DPA
AWS SES (Amazon Web Services EMEA)	Transactional email	Email address + body	UK (eu-west-2)	AWS DPA accepted
Hiscox / Markel	Insurance	None during ordinary course	UK	n/a

International transfers documented in [E_supporting/transfer_register.md](#) with Standard Contractual Clauses 2021 in place where applicable.

E.8 Risk register

#	Risk	Likelihood	Severity	Inherent risk	Mitigation	Residual risk
1	Unauthorised access to mood/safeguarding records	Low	High	High	Encryption at rest + TLS in transit + RBAC + audit logging + annual pen-test	Low
2	Re-identification from "anonymised" research data	Med	High	High	k-anonymity ≥ 5 enforced; named DPO review of every release; written agreements with recipients	Low
3	Excessive scanning of in-app messages (over-collection)	Med	Med	Med	Keyword library reviewed quarterly; false-positive rate audited; transparency report annually	Low
4	LLM prompt-injection or output containing PII	Med	Med	Med	All user text redacted before LLM call; no PII in prompt templates; output filtered for crisis numbers + URLs only	Low
5	Cross-border transfer to OpenAI (US)	Med	Med	Med	Only redacted excerpts; SCCs in place; transfer-risk assessment lodged at E_supporting/transfer_risk_assessment.md	Low-Med
6	Data subject denied erasure due to safeguarding retention	Low	High	Med	Lawful basis (substantial public interest) documented per request; data subject notified in writing with right to ICO complaint	Low
7	Insider misuse of admin dashboard	Low	High	Med	Two-factor auth on admin; audit log retained 7 years; quarterly access review; immediate offboarding workflow	Low
8	DPIA itself becomes stale	High	Med	Med	DPIA reviewed annually and on any material change (e.g. new processor, new processing purpose)	Low
9	Children (under-18) processed without parental consent	Low	High	Med	Birth-date check at sign-up; flag for .ac.uk accounts where birth-date < 18; default privacy-protective settings; ICO AADC alignment	Low
10	A safeguarding event leaks to other students	Low	Critical	High	Safeguarding scans are server-side only; alerts go to DSL email, never in-app; UI design prevents accidental exposure	Low

E.9 Approvals

Role	Name	Signature	Date
Controller representative	Yusuf Quadri	<i>signed in original</i>	_____
Data Protection Officer	<i>The DPO Centre (designated)</i>	<i>to follow Month 1</i>	_____
External safeguarding advisor	<i>to be appointed Year 1</i>	<i>to follow</i>	_____

E.10 Conclusion

The processing described above is necessary to deliver the DEQUAD service and to meet UK regulatory obligations under the Online Safety Act 2023. The risks have been identified and mitigated to a level that — in the controller's view — meets the UK GDPR Article 35 standard of being **proportionate to the purposes and rights at stake**. No high residual risk has been identified that requires consultation with the Information Commissioner under Art 36 at this time.

The DPIA will be re-reviewed annually, on the appointment of the DPO, and immediately upon any material change in processing.

Appendix G — Job Description & Salary Band (Self-Funded 3-Year Plan)

Written and prepared by Yusuf Quadri, Founder & CEO, DEQUAD Ltd.

This appendix documents the **one funded hire** in the conservative base-case plan referenced in main document §7.3, the **three-hire job-creation target** for the upside case (§10.4), and the basis on which any hiring beyond Year 3 would be considered. This is a deliberate change from earlier drafts of this plan, which assumed a 42-role, 5-year hiring plan funded by pre-seed, seed and Series A rounds. No external funding is assumed for the base case (Section 10); the hiring plan has been rebuilt around what institutional and premium revenue can actually fund, with the 3-hire job-creation target funded from revenue generated after piloting, and deliberately kept lean — every role either drives the revenue that funds it (Sales Lead) or is essential to serving the resulting student and institutional base safely (Support Agent, Student Ambassador).

All roles are **UK-based, PAYE, paying UK National Insurance contributions**, and recruited through fair and open processes.

G.1 Hiring summary — 3-year, self-funded

Year	New hires	Cumulative headcount	Basis
Y1	0	2 (founders, unpaid)	No revenue to fund any hire
Y2	0	2 (founders, unpaid)	Revenue still too small/uncertain to justify a hire
Y3	1 (part-time)	3 (c.2.5 FTE)	Funded entirely by Y3 revenue, contingent on 2+ paying universities

Total Y3 wage bill (base case, all roles, incl. modest founder pay): **£20,000 gross / £21,500 incl. employer NI, pension and other costs** (Section 18.3).

Job-creation target, upside case: if institutional revenue scales beyond the base case via pilot conversion (6+ paying universities), the target is **3 full-time hires** on top of the 2 founders (5 total), each sustained at least 12 months at an average salary of £25,000/year —

a Y3 gross wage bill of £75,000 for the 3 hires, funded entirely from revenue generated after piloting, meeting the Innovator Founder settlement job-creation criterion.

G.2 Year 3 — Safeguarding & Trust Lead (part-time)

Field	Detail
Hire timing	Year 3, contingent on 2+ paying universities — not guaranteed
Commitment	Part-time, c.10 hours/week
Salary band	c.£8,000/yr (pro-rata)
Reporting line	CEO (Yusuf Quadri)
Mission	Support safeguarding triage and escalation as the paying-university base grows beyond what the founder can cover alone; liaise with partner-university DSLs
Must-have	Relevant safeguarding qualification (Level 2/3 Safeguarding Adults or equivalent); HE, NHS or charity safeguarding experience; enhanced DBS
Recruitment channel	Charity Job, NCVO, AMOSSHE network

G.3 Job-creation target (upside case) — 3 full-time hires

If institutional revenue scales beyond the conservative Y3 base case via pilot conversion (6+ paying universities), the plan's job-creation target is **3 full-time UK roles**, each:

- Full-time, UK-based, PAYE, paying UK National Insurance contributions
- Sustained for at least 12 months
- Paid an average salary of £25,000/year

These 3 roles are funded entirely from revenue generated after piloting, not from any external funding round. The target is deliberately kept to three — one role that directly drives the institutional revenue funding it, and two that are essential to serving the resulting student and university base — rather than the larger, marketing-heavy hiring plan considered in earlier drafts.

#	Role	Commitment	Salary band	Hire timing	Reporting line
1	Sales Lead	Full-time	£25,000/yr	Year 3, contingent on 6+ paying universities	CEO (Yusuf Quadri)
2	Support Agent	Full-time	£25,000/yr	Year 3, contingent on 6+ paying universities	CEO (Yusuf Quadri)
3	Student Ambassador	Full-time	£25,000/yr	Year 3, contingent on 6+ paying universities	CMO (Dr Gerald Marfo)

Each of the 3 roles is £25,000/yr, all full-time, hired in Year 3 once institutional revenue scales via pilot conversion (6+ paying universities) — meeting the settlement job-creation criterion's average-salary threshold exactly. Mission and must-have detail for each role follows below.

G.3.1 Sales Lead

Field	Detail
Mission	Own the institutional sales pipeline end-to-end — lead generation, outreach, and closing paid university and NHS ICB contracts; manage each account from pilot conversion through renewal
Must-have	B2B/enterprise sales experience, ideally in EdTech, higher education or public-sector software; able to run a full sales cycle independently
Recruitment channel	Otta, LinkedIn, NatWest Accelerator alumni network

G.3.2 Support Agent

Field	Detail
Mission	Front-line support for students and university admins via in-app chat and email; triage non-safeguarding queries directly and escalate safeguarding-relevant issues to the Safeguarding & Trust Lead per the existing escalation pathway
Must-have	Prior customer support experience; empathetic, clear written communication; completes DEQUAD's safeguarding awareness training within the first month
Recruitment channel	LinkedIn, Otta

G.3.3 Student Ambassador

Field	Detail
Mission	Drive on-campus adoption at partner universities — represent DEQUAD at freshers' fairs, SU events and society meetups; run peer referral pushes; feed student feedback back into the product roadmap
Must-have	Current student or recent graduate of a UK university; prior involvement in SU, society or student-rep leadership preferred; comfortable representing the brand in person on campus
Recruitment channel	University careers portals, partner-university SU/society networks, LinkedIn

These three job descriptions are a first draft for review — mission and must-have detail is not yet finalised or presented as committed.

G.4 Further roles beyond the job-creation target — not part of this plan

Any hiring beyond the 3-hire job-creation target above is a longer-term ambition, not a commitment. It would only happen if institutional revenue significantly exceeds even the upside case, or if a future funding round is raised — neither of which is assumed here.

G.5 Diversity, equality, and inclusion commitments

Even at this small scale, DEQUAD commits to:

- **Open advertising** for each Y3 hire on at least two channels for at least 14 days before any offer.
- **Blind shortlisting** at CV-screening stage (name, university, address removed).
- **Structured interview rubric.**
- **Pay-band transparency** — salary published in the job advert.
- **Hiring-mix aspiration** — as the team grows beyond Year 3, DEQUAD aims for at least 45% female and at least 30% minority-ethnic representation, reported annually once headcount is large enough for this to be meaningful.

Appendix H — University Letter of Interest (Template)

Template drafted by Yusuf Quadri, Founder & CEO, DEQUAD Ltd.

This appendix provides the template used by DEQUAD when seeking a Letter of Interest or formal Memorandum of Understanding (MOU) from a pilot university. Letters returned by partner institutions will be attached to this appendix as they arrive.

The template below is co-signed by the partner-university point of contact (typically the Director of Student Services or Head of Wellbeing Services) and the DEQUAD founder.

Template: Letter of Interest

(On partner-university letterhead.)

Date: _____

To: UK Endorsement Services Ltd

Subject: Letter of Interest in piloting DEQUAD at [University Name]

To whom it may concern,

I am writing in my capacity as **[Job Title]** at the **University of Bedfordshire** to confirm our institutional interest in piloting the DEQUAD platform (developed by DEQUAD Ltd, co-founded by Yusuf Quadri — formerly Bedfordshire SU President 2021–2023 — and Yusuff Adeagbo, CTO) during academic year 2026/27.

Background

[University Name] has an enrolled student population of approximately **[number]** undergraduates and **[number]** postgraduates across **[number]** schools/faculties. Our student services team handles approximately **[number]** wellbeing-related contacts per academic year, with average waiting time for counselling appointments of **[number]** weeks.

Why we are interested in DEQUAD

We have identified three institutional priorities that the DEQUAD platform appears well-positioned to address:

1. **Proactive identification of students at risk** — DEQUAD's per-user wellbeing baseline approach offers the prospect of detecting deterioration earlier than self-referral, which is critical given the volume pressures on our counselling service.
2. **Out-of-hours peer-mediated support** — DEQUAD's closed peer network provides a moderated, safeguarded route for students to connect outside business hours, supplementing (not replacing) our in-house provision.
3. **Compliance with the Higher Education Mental Health Charter** — Our institution is [a signatory / planning to sign / committed to the principles of] the Charter. DEQUAD's design aligns with the Charter's whole-university approach and the "Step Change" framework.

Pilot scope (subject to procurement and DPIA completion)

Subject to satisfactory completion of our procurement process, including: - A joint Data Protection Impact Assessment (DPIA); - A Data Processing Agreement compliant with UK GDPR; - Information-security due diligence (Cyber Essentials Plus required); - An agreed safeguarding escalation protocol;

...we would be open to piloting DEQUAD with a sub-cohort of up to **[number] students** during academic year 2026/27, with full-cohort rollout subject to pilot outcomes.

Indicative pricing acceptance

The pricing point of **£2.00 per enrolled student per annum** discussed with the DEQUAD team is within the indicative range we have allocated for digital-wellbeing tooling in the 2026/27 budget cycle.

No commitment at this stage

This letter is a statement of interest only and does not constitute a procurement decision, contractual commitment, or financial obligation by [University Name]. Any binding

commitment will follow our standard procurement, legal, and DPIA processes.

Contact

I am happy to be contacted by UK Endorsement Services Ltd to confirm the contents of this letter and to discuss [University Name]'s assessment of DEQUAD's potential.

Yours sincerely,

[Name] [Job Title] [University Name] [Email] [Phone]

Letters received to date

University	Signed by	Date	Status
University of Bedfordshire	<i>Pending</i>	_____	Early, informal conversation only — no LOI, MOU or verbal commitment yet; nothing is signed or guaranteed
—	—	_____	—
—	—	_____	—

No formal Letter of Interest has been signed by any institution at the date of this application. The row above reflects the single active conversation described throughout this plan (Section 8.3); it is not a commitment.

Notes for UKES assessor

DEQUAD acknowledges that as a pre-revenue business at the date of endorsement application, formal signed Letters of Interest may be limited. Where formal letters are not yet returned, the applicant will provide:

- Verbal-interest confirmations via the named contact's professional email signature
- Meeting notes from any in-person or video discussions
- Anonymised LinkedIn message chains where data-protection rules permit

- Calendar invitations from completed exploratory meetings

These are attached as supporting evidence in the **H_supporting/** folder.

Appendix I — Online Safety Act 2023

Compliance Opinion

Subject of opinion: DEQUAD (DEQUAD Ltd, Company No. 17405964), operated at <https://dequad.co.uk> **Author of internal assessment:** Yusuf Quadri (Founder) **External counsel of record:** [Law firm to be appointed — recommended panel: Bristows, Mishcon, Wiggan, Schillings] **Date of latest review:** _____

I.1 Purpose

This document is an internal compliance opinion summarising DEQUAD's position under the **Online Safety Act 2023** ("OSA") and is intended to demonstrate to UK Endorsement Services Ltd that the applicant has identified the obligations applicable to the business and has built the product with them in mind.

A signed external legal opinion from a UK-qualified solicitor in good standing will be commissioned during Month 2 post-endorsement and attached to this appendix at the next UKES contact point.

I.2 Categorisation of DEQUAD under the OSA

Category	Status	Reason
Regulated user-to-user service	Yes	Users (verified students) share content with other users via messages and profile fields
Search service	No	DEQUAD does not provide search across third-party content
Likely to be accessed by children (under 18)	Yes (residual)	Although DEQUAD targets verified university students (predominantly 18+), some UK undergraduates start at 17
Category 1 service (Ofcom designation)	No (forecast)	DEQUAD's user base and functionality will not meet the Category 1 thresholds during the endorsement window

Practical implication: DEQUAD is a **Category 2B-equivalent** user-to-user service with residual exposure to under-18 users. The applicable duties are summarised in §I.3.

I.3 Applicable duties

Duty	Section	DEQUAD design response
Illegal-content risk assessment	OSA s. 9, s. 10	Completed; reviewed annually. See §I.4 below
Illegal-content safety duties	OSA s. 10	Real-time keyword scanning + escalation to DSL; reporting flow built; takedown SLA defined
Children's risk assessment	OSA s. 11, s. 12	Completed under assumption of residual under-18 access. See §I.5
Children's safety duties	OSA s. 12	High-risk safety setting default-on for all users; no algorithmic recommendation of strangers to flagged-under-18 accounts
Content-reporting and complaints procedures	OSA s. 17	"Report a profile" feature live since 2026; complaints SLA 4 hours human triage
User empowerment (Cat 1 only)	OSA s. 14	Not applicable (Cat 2B)
Freedom of expression / privacy	OSA s. 22	DPIA documents necessity + proportionality of every safeguarding scan
Record-keeping	OSA s. 23	All safeguarding events logged for 7 years; risk-assessment versions retained
Designated content moderator	OSA s. 56	DSL appointed; backup DSL named
Ofcom information requests	OSA s. 100	Process in place: 7-day response SLA

I.4 Illegal-content risk assessment summary

Priority illegal content type	Risk on DEQUAD	Why	Mitigation
Terrorism (s. 59)	Very low	Closed UK university network; no anonymous posting; no public discoverability	Standard keyword scan + reporting flow
Child sexual abuse (CSAM)	Low	Verified .ac.uk users (16+ at oldest UK universities); no photo-sharing without face-detection check	Photo upload moderation queue; CSAM detection partner to be appointed Y1
Hate offences	Medium	Student demographics include vulnerable groups; loneliness apps attract abuse vectors	Real-time slur detection (already live); zero-tolerance ban policy; appeals route
Harassment / stalking	Medium	Direct-message functionality enables targeted abuse	Per-message safeguarding scan; "block + report" combined flow
Controlling / coercive behaviour	Medium	Closed-network apps can enable controlling relationships	Pattern detection on per-conversation cadence; safeguarding nudges; partnership with Refuge for IDVA referrals (Y2)
Drugs / firearms / sale of stolen goods	Low	Verified-student network with strict TOS; no marketplace functionality	TOS prohibition + reporting + ban
Fraud	Low	No payment between users; no marketplace	Stripe-only billing flow; users cannot solicit money
Suicide and self-injury content	High residual	The platform's safeguarding role makes this content type uniquely relevant	Per-message scan + DSL escalation + Samaritans/Shout signposting (live); evaluated quarterly
Encouragement of suicide (s. 184 OSA)	High residual	As above	Active scanning; "encouragement" patterns distinct from "expression of distress" — DSL judges
Animal cruelty / extreme pornography	Very low	No mass-media upload; profile photos only	Profile-photo moderation queue

The full Illegal Content Risk Assessment (ICRA) is kept on file and reviewed annually. Methodology aligns with Ofcom's **Online Safety: Illegal Harms Guidance** (December 2024).

I.5 Children's risk assessment summary

DEQUAD is designed for verified UK university students. The platform's verification gate (active `.ac.uk` email) excludes the vast majority of under-18 users. However:

- A small number of UK undergraduate students begin their first year aged 17 (typically birthday-rule edge cases).
- Some Foundation-Year and Access course students at partner FE institutions may be 16+.

The Children's Risk Assessment therefore treats DEQUAD as a service with **residual exposure to under-18 users** and applies the corresponding precautions:

Precaution	Implementation
Age-assurance at sign-up	Self-declared birth date + verified university email. Stronger age-verification under evaluation for Year 2
Default privacy-protective settings for likely under-18 accounts	No discoverability via search; no exposure to adult users >5 years older without dual opt-in
Children's content-design code (ICO AADC) alignment	Designed in from launch: data minimisation, no profiling, no dark patterns
Education and reporting tools tailored for younger users	Plain-English help; one-tap "I need help" route to Childline (for under-18 self-identified users)

I.6 Designated roles and accountabilities

OSA-mandated role	Person / function	Notes
Senior Manager Responsible for Compliance (OSA s. 56)	Yusuf Quadri, CEO (with Yusuff Adeagbo, CTO, as deputy)	Joint founder accountability documented in board minutes
Designated Safeguarding Lead	<i>Yusuf Quadri, CEO, personally (a qualified safeguarding professional) through Y1–Y2; a dedicated part-time Safeguarding & Trust Lead is planned for Y3, contingent on 2+ paying universities and funded entirely by revenue — see Business Plan §18.3</i>	Job description in Appendix G
Data Protection Officer	<i>Outsourced fractional throughout Y1–Y2 (e.g. The DPO Centre, low-cost pay-as-you-go); an in-house FTE DPO is not assumed in this 3-year plan and would only be considered later if data-processing scale justifies it</i>	
Ofcom liaison point	Yusuf Quadri, CEO (Y1); transition to in-house counsel Y3	

I.7 Engagement with the regulator (Ofcom)

Activity	Status
Registered for Ofcom's small-platform information service	Pending Month 1 post-endorsement
Subscribed to Ofcom guidance updates	✓ Live
Familiarity with Ofcom's Guidance for Smaller Providers (2025)	✓ Reviewed
Plan for Ofcom transparency reports (if Cat 1 designation triggered)	Documented; no current Cat 1 forecast within endorsement window

I.8 External legal opinion — scope of work to be commissioned

The external legal opinion to be commissioned in Month 2 post-endorsement will cover:

1. Confirmation of DEQUAD's categorisation under the OSA;
2. Sufficiency of the Illegal Content and Children's Risk Assessments;
3. Sufficiency of the content-reporting and complaints procedures;
4. Adequacy of record-keeping;
5. Risk register for foreseeable Ofcom enforcement;
6. Boilerplate Terms of Service and Acceptable Use Policy review;
7. Confirmation that the founder's senior-manager-responsible accountability is appropriately recorded.

Estimated cost: **£8,000–£12,000** (firm fee dependent). This exceeds the £4,500 NatWest in-kind legal allocation (Business Plan §10.3) and is not separately budgeted in the Y1 cash P&L (Appendix F, where Y1 legal & accountancy is £300, out-of-programme only). The founders will either scope a narrower opinion within the NatWest in-kind panel's capacity, or fund the shortfall from founder cash reserves or defer to Y2 once revenue supports it — this is not yet a fully funded commitment.

I.9 Statement

The applicant has read the Online Safety Act 2023 in full, has read the Ofcom illegal-content and children's-safety guidance, and has designed DEQUAD's product, processes, and policies to comply with the duties applicable to a Category 2B-equivalent user-to-user service. The applicant will obtain external legal confirmation of this position within the first six months of operation and will produce that opinion at the 6-month UKES contact point.

Signed: _____ Yusuf Quadri

Date: _____

Appendix J — Technology Architecture

Prepared by the founders — Yusuf Quadri (CEO) and Yusuff Adeagbo (CTO), who designed and built the architecture described below.

DEQUAD's stack is intentionally simple, cloud-native, and based on widely-adopted open-source components — minimising key-person risk and supporting the scalability commitments in §7.

J.1 High-level architecture diagram

J.2 Component table

Layer	Technology	Hosting	Why this choice
DNS / WAF / DDoS	Cloudflare	Global	Industry-standard, UK regulatory comfort
CDN	Cloudflare	Global edge	Reduces latency for image / static assets
Ingress	Nginx (managed)	Kubernetes (UK)	Battle-tested, no exotic dependencies
API	FastAPI on Python 3.11	Kubernetes (UK)	Strong typing, async I/O, high developer velocity
Database	MongoDB Atlas, UK region	Managed	Flexible schema for evolving wellbeing data; UK data residency by default
Search / aggregation	MongoDB aggregation pipeline	Managed	Avoids extra dependency; sufficient at projected scale
Auth	OAuth 2.0 (university SSO partnerships, Y2+) and Bearer tokens for native	Managed	No password reuse; FA-protected admin route
Payments	Stripe (UK entity)	Managed	FCA-regulated; PCI-DSS handled by Stripe
File storage	Cloudflare R2 (S3-compatible, UK)	Managed	Cost-effective; user-uploaded photos
Email	Gmail SMTP relay (pre-pilot) → AWS SES, eu-west-2 (production)	Managed	Auditable delivery
Push notifications	Expo Push Service	Managed	Single API for iOS + Android
Observability	Sentry (UK data residency option) + structured logs to CloudWatch (eu-west-2)	Managed	Proactive issue detection; SLO dashboards
LLM provider	OpenAI gpt-4o-mini via Emergent LLM Key	API	Used only for AI auto-reply to support messages; no user-identifiable PII in prompts

J.3 Data residency

All Personally Identifiable Information (PII) and Special Category Data (mental-health, mood entries) is stored in MongoDB Atlas's **UK region** (London). No PII leaves the UK except: - Stripe (UK entity; Stripe stores card tokens, not card numbers, in compliance with PCI-DSS Service Provider Level 1). - OpenAI inference calls (only contain redacted, non-PII excerpts of support messages — see DPIA Appendix E §4.3).

J.4 Security controls implemented

Control	Implementation	Standard
TLS in transit	All endpoints TLS 1.3, HSTS preload	NCSC guidance
Encryption at rest	MongoDB Atlas AES-256	NCSC guidance
Secret management	Environment variables sealed via Emergent vault; never in source	OWASP ASVS L2
Auth	Bearer tokens, 7-day expiry, refresh on use	OWASP ASVS L2
Rate limiting	<code>RateLimitMiddleware</code> on the API gateway (per-IP + per-user)	OWASP ASVS L2
Audit logging	Structured logs to centralised store; safeguarding events retained 7 years	UK DPA 2018
Backups	Daily MongoDB Atlas snapshots, 30-day retention; quarterly restore drills	NCSC Cloud Security Principles
Vulnerability scanning	Dependabot + weekly OWASP ZAP scan	NCSC Cloud Security
Penetration testing	Annual external pen-test (from Q2 Year 2) by CREST-approved firm	Cyber Essentials Plus requirement

J.5 Scalability headroom

Component	Current capacity	Capacity at 1M users	Mitigation if exceeded
FastAPI pods	2 pods × 0.5 CPU	Auto-scale to 40 pods	Kubernetes HPA already configured
MongoDB Atlas	M10 cluster (~5GB)	M50 cluster (~600GB)	Atlas vertical scaling, no downtime
Push (Expo)	200k/day	Unlimited (Expo Pricing)	n/a
Email	10k/day (Gmail)	Migrate to AWS SES at 50k/day	Already designed
LLM calls	Soft cap by Emergent LLM Key budget	Move to direct OpenAI org account	One-line config change

J.6 Disaster-recovery RTO / RPO

Scenario	Recovery Time Objective	Recovery Point Objective
Single-pod failure	< 30 seconds	0
Region failure (London)	< 4 hours	< 24 hours
Database corruption	< 4 hours	< 24 hours
Total data loss	< 24 hours	< 24 hours

A documented runbook is maintained in `/app/backend/scripts/RUNBOOK.md`.

J.7 Roadmap items not yet built

Item	Target quarter	Notes
University SSO (Shibboleth / SAML)	Q2 Year 1	Required for some Russell Group integrations
Anonymised analytics export to partner DSLs	Q3 Year 1	Aggregate, no individual data
ISO 27001 controls hardening	Year 3	Required for NHS DSPT alignment
End-to-end encrypted DMs (Signal protocol)	Year 2	Safeguarding compatibility under evaluation

This appendix is a current-state and forward-looking architecture summary as at the date of submission. Material architecture changes will be communicated to UKES at the standard 6/12/24-month contact points.

Appendix K — Product Screenshots

Register

Compiled by Yusuf Quadri, Founder & CEO, DEQUAD Ltd.

This appendix lists the product screenshots that accompany the endorsement application. The screenshots are taken from the live application at <https://dequad.co.uk> and from the preview iOS / Android builds.

UKES assessors are encouraged to access the live web app directly with the credentials provided at the application interview.

K.1 Live application access

Item	URL / detail
Web app (production)	https://dequad.co.uk
Web app (preview)	https://review-extractor-2.preview.emergentagent.com
iOS preview build	EAS install link provided at interview
Android preview build	EAS install link provided at interview
Demo student account	Provided by separate secure channel at interview
Demo admin account	Provided by separate secure channel at interview

K.2 Screenshot register

#	Filename	What it shows	Why it matters
1	K1_landing.png	Hero of the public landing page at dequad.co.uk	First-impression brand quality; "designed for university" positioning
2	K2_signup.png	The .ac.uk email verification flow	Closed-network claim is real
3	K3_profile.png	Student onboarding (course / society / interests)	Compatibility-based matching, not looks-based
4	K4_connect.png	The Connect tab — peer matches	Live matching engine output
5	K5_match_flow.png	Successful mutual-like → chat hand-off	Match-to-chat flow proven
6	K6_chat.png	In-app messaging	Closed network, message scanning live
7	K7_mood_checkin.png	Daily 10-second mood entry	Daily-engagement loop
8	K8_mood_history.png	Personal wellbeing baseline over time	Per-user trend detection
9	K9_support_chat.png	The 24/7 support chat (with AI auto-reply + human handover)	Out-of-hours support real
10	K10_safeguarding_alert.png	A safeguarding alert in the admin dashboard	Crisis detection in action
11	K11_admin_dashboard.png	Institutional dashboard for partner universities (anonymised cohort metrics)	What universities actually buy
12	K12_report_flow.png	The "report a profile" flow	Self-protection mechanism
13	K13_university_admin.png	The university-admin login portal	Multi-tenant institutional access
14	K14_safeguarding_email.png	Email notification to DSL	Out-of-band alerting
15	K15_unread_badges.png	Unread badge logic across tabs	Production polish detail

K.3 Where the images live

All screenshots are stored as PNGs in:

```
/app/visa_appendices/K_supporting/  
├─ K1_landing.png  
├─ K2_signup.png  
├─ K3_profile.png  
├─ ...  
└─ K15_unread_badges.png
```

K.4 How to capture fresh screenshots

If UKES requests screenshots taken on a specific date:

```
# Web app  
cd /app && ./scripts/capture_product_screenshots.sh  
# Output: /tmp/dequad-screenshots-YYYYMMDD/
```

A helper script will be added at `/app/scripts/capture_product_screenshots.sh` ahead of the assessment interview to enable on-demand capture.

All screenshots are taken from the live application, contain no real student data (test profiles only), and are reproducible on request by the UKES assessor.
