

Co-Founder CV — Yusuff Adeagbo

Chief Technology Officer, DEQUAD

Personal details

Field	Value
Full name	Yusuff Adeagbo
Role at DEQUAD	Co-founder & Chief Technology Officer (CTO)
UK residency status	UK-resident, full-time on DEQUAD
Working hours commitment	Full-time
Cash contribution to share capital	£3,000 (matching the lead founder)

Summary

Yusuff Adeagbo is the co-founder and Chief Technology Officer of DEQUAD. He combines a postgraduate qualification in Information Technology with Project Management from a UK university with a Higher National Diploma in Computer Science, and brings a multidisciplinary skill set that spans full-stack engineering, UI/UX, graphic design, digital marketing for e-commerce and IT business analysis. This breadth makes him well placed to lead the engineering and IT functions of an early-stage software startup operating across web, mobile and institutional integrations.

Education

Years	Institution	Award
2022 – 2024	University of the West of Scotland	MSc Information Technology with Project Management
(prior)	Federal Polytechnic (Nigeria)	Higher National Diploma in Computer Science

Core skills

Area	Detail
Engineering & IT support	End-to-end IT support across user-facing and back-office systems; troubleshooting; service-desk operations; hardware and OS administration.
UI / UX design	User-centred design for web and mobile; wireframing, prototyping, design hand-off to engineering; accessibility and inclusive-design principles.
Graphic design	Brand identity, marketing collateral, infographic and presentation design — directly relevant to DEQUAD's go-to-market materials.
Digital marketing (e-commerce)	Performance marketing for e-commerce: campaign set-up, paid social, search, conversion tracking, A/B testing, channel attribution.
IT business analysis	Requirements gathering, process mapping, stakeholder management, gap analysis, solution scoping.
Project management	Postgraduate-level training in PM frameworks (PRINCE2-style and agile) applied through the MSc programme.

Responsibilities at DEQUAD

As CTO, Yusuff is responsible for:

- **Engineering delivery** — owning the FastAPI / MongoDB backend and the Expo / React Native universal frontend, with Adedapo Ajuwon (Senior Software Engineer, equity-only wider-team member) providing additional engineering capacity; further paid engineering hires are a longer-term ambition beyond this 3-year plan, not a commitment (Appendix G).

- **Infrastructure & security** — cloud (Render, Cloudflare), Cyber Essentials roadmap, secrets management, GDPR/DPA-by-design, OSA-2023 compliance reporting flows.
 - **Product UX** — collaborating with the CEO and CMO on user-experience decisions across the matching, mood-tracking and safeguarding modules.
 - **R&D claim leadership** — documenting qualifying R&D activity in line with HMRC SME R&D Tax Credit guidance.
 - **Vendor management** — LLM provider abstraction (OpenAI, Anthropic, Gemini), payment processing (Stripe), notification rails (Twilio, SendGrid).
-

Why DEQUAD

Yusuff is committing full-time to DEQUAD as a co-founder because:

1. **Lived experience of the problem.** Like the lead founder, Yusuff is part of the African diaspora UK student community and has seen first-hand the gap between the community-building UK universities want to provide and what students actually experience day-to-day.
 2. **Cross-functional fit.** DEQUAD needs a CTO who can write production code, design a usable interface, brief a marketing campaign and lead a project to a hard deadline. That breadth is unusual in early-stage UK tech and is exactly what Yusuff brings.
 3. **Long-term commitment.** Yusuff is contributing £3,000 of personal capital alongside the lead founder, accepting no salary through Y1–Y2, and signing customary founder vesting if and when any future funding round is raised — none is assumed or required in this 3-year self-funded plan. He is committed to working full-time in the UK on DEQUAD for the duration of the visa endorsement period and beyond.
-

Founder undertaking

The undersigned confirms that he:

- is committing full-time to DEQUAD as Chief Technology Officer;
- is contributing **£3,000** of personal capital as founder share capital, to be evidenced by the share allotment return (Form SH01) to be filed with Companies House at incorporation;
- agrees to a customary 4-year founder-vesting schedule with a 1-year cliff, to be put in place if and when any future external funding round is raised (none is assumed or required in this 3-year self-funded plan);

- accepts a £0 salary throughout Year 1 and Year 2, and a modest £500/month salary from Year 3 — funded entirely by revenue, not by any funding round.

Signed: _____ **Date:** _____

— *Yusuff Adeagbo*, Chief Technology Officer, DEQUAD Ltd.

Written by Yusuff Adeagbo (Co-Founder & CTO) and submitted to UKES as Appendix B-2 of the DEQUAD Innovator Founder visa endorsement application — August 2026.
