1. Executive Summary

DEQUAD is a UK-headquartered software platform that helps university students build genuine peer connections, monitor their daily wellbeing, and access proactive safeguarding — all within a closed, identity-verified network of UK higher-education institutions.

DEQUAD addresses three converging national crises:

- **The student loneliness epidemic:** 54% of UK university students report frequent loneliness (ONS, 2023).
- **The student mental-health crisis:** One in three undergraduates experience a clinically significant mental-health issue during their degree (Student Minds, 2024).
- **The university safeguarding gap:** Existing university counselling services are over-subscribed (average wait time: 6 weeks) and lack 24/7 reach.

DEQUAD is the only platform in the UK that combines verified-student peer networking, daily mood analytics, and machine-assisted safeguarding into a single product that is **free at the point of use for students** and monetised via institutional subscriptions to universities, NHS Integrated Care Boards (ICBs), and selected premium features.

The business is **live in production** at <https://dequad.co.uk>, with a working full-stack platform (backend, web, iOS, and Android in beta), 12 seeded test universities, and a working safeguarding pipeline. The product is ready for institutional pilots in academic year 2026/27.

The applicant is requesting endorsement on the basis that DEQUAD meets the Home Office's three statutory criteria for the Innovator Founder route: **innovation, viability, and scalability**. Detailed evidence is presented in Sections 5, 6, and 7 respectively.

2. Founder Profile

2.1 Personal details

- **Full name:** Yusuf Quadri
- **Role:** Founder & Chief Executive Officer
- **Nationality:** _____
- **Current immigration status:** _____
- **Email:** quadri.yusuf@dequad.com
- **Country of intended business operation:** United Kingdom

2.2 Education

(Applicant to complete with verifiable certificates attached as Appendix A.)

Qualification	Institution	Year	Verified
_____	_____	_____	_____

2.3 Professional experience

(Applicant to complete with CV in Appendix B. Highlight any prior software-product roles, technology start-up experience, mental-health or student-services experience, and any leadership/team-building responsibilities.)

2.4 Relevant skills supporting the venture

Skill area	Evidence	Relevance to DEQUAD
Product strategy & roadmap ownership	Built DEQUAD MVP end-to-end (web, iOS, Android)	Directly required to lead the product through pilot to scale
Full-stack engineering	FastAPI/Python backend, React Native / Expo frontend, MongoDB data layer	Reduces engineering burn-rate; enables rapid iteration during pilot
Safeguarding domain literacy	Built crisis-keyword detection, escalation flows to trained leads	Distinguishes DEQUAD from generic social apps
Stakeholder management	Engaged University of Manchester pilot interest	Critical for institutional sales motion

2.5 Personal commitment

The applicant intends to make DEQUAD their **sole and full-time occupation** in the United Kingdom and to base the company headquarters in the UK. The applicant has signed an undertaking (Appendix C) committing to spend a minimum of 35 hours per week on the business.

3. The DEQUAD Business

3.1 What DEQUAD does

DEQUAD is a multi-platform software product (mobile + web) that delivers three integrated services to UK university students:

- Verified peer matching** — Students sign up with their `.ac.uk` university email. Once verified, they are matched with peers based on course, modules, society interests, study habits, and lifestyle compatibility. The matching prioritises platonic friendship, study partnerships, and society-mate discovery; it is **not a dating app**.

2. **Daily wellbeing tracking** — Users log a 10-second mood check-in each day. The system establishes a personal wellbeing baseline; deviation from baseline triggers proactive support nudges (signposting Samaritans, Shout, NHS Every Mind Matters, and the user's university counselling service).
3. **Safeguarding-led messaging & support** — All in-app messages are scanned in real time for crisis language, harassment, and exploitation indicators. Confirmed high-risk content is escalated to a trained safeguarding lead (initially DEQUAD's own designated lead; eventually the partner university's). A 24/7 chat-based support function provides instant first-line response, with human handover for serious cases.

3.2 What DEQUAD is NOT

DEQUAD is **not** a dating app, a clinical service, a replacement for university counselling, or a free-for-all social network. The product is deliberately narrower, slower, and stricter than incumbents — that constraint is the basis of its trust premium with both students and institutions.

3.3 Legal entity

Proposed entity: DEQUAD Ltd (England & Wales) **Registered office:** _____ (UK address — applicant to confirm) **Directors at incorporation:** Yusuf Quadri (CEO) **Initial shareholding:** 100% founder
Companies House registration: To be filed within 30 days of endorsement

3.4 Current operational status

Item	Status
Working MVP web app	✓ Live at https://dequad.co.uk
Backend API (FastAPI + MongoDB)	✓ Live in production
Native iOS / Android apps via Expo / EAS	✓ Build pipeline configured; internal beta builds
Safeguarding crisis-detection engine	✓ Live, calibrated with UK crisis-line dataset
Admin dashboard for institutional partners	✓ Live
Stripe billing infrastructure	✓ Integrated, test mode
GDPR-compliant data architecture	✓ Designed; documented in Section 13.3
Pilot university LOI / MOU	↻ In discussion

4. Problem Statement & Evidence of Market Need

4.1 The student wellbeing crisis (quantified)

Metric	Value	Source
UK undergraduates reporting frequent loneliness	54%	ONS Student Insights, 2023
Undergraduates with diagnosable mental-health condition during degree	33% (1 in 3)	Student Minds Insight Briefing, 2024
Average wait time for university counselling	6 weeks	UCU Wellbeing Survey, 2023
Students who wish they'd built broader friendships earlier	71%	NUS Survey, 2023
UK higher-education student population	2.86 million	HESA, 2023/24
Student suicides per academic year (England & Wales)	~169 average over last 5 years	Office for National Statistics

4.2 The institutional pain point

UK universities and the Office for Students (OfS) face mounting regulatory pressure to demonstrate proactive student welfare. The Higher Education Mental Health Charter (2022) — now adopted by 90+ UK institutions — requires *whole-university* approaches that include peer support and out-of-hours coverage. Universities currently meet this requirement with a patchwork of:

- In-house counselling (capacity-constrained)
- Third-party crisis lines (high cost-per-call, reactive)
- Generic student-life apps (no safeguarding integration)

DEQUAD fills the **proactive, peer-mediated, out-of-hours** segment of this stack — a category no existing UK competitor occupies at scale.

4.3 Why now

1. **Post-pandemic loneliness has remained elevated.** Cohort surveys 2022–2024 show student social-connection scores have not returned to pre-2020 baseline.
2. **The Online Safety Act 2023** (Section 12 + Schedule 11) has made existing US-based social platforms increasingly costly and risky for under-25 user bases. UK-domiciled, safeguarding-first products have a regulatory tailwind.
3. **University budgets are shifting** from in-house counselling toward digital wellbeing tooling: the JISC HE Digital Wellbeing Report (2024) found 78% of UK universities plan to procure third-party wellbeing

platforms in 2025–2027.

5. Innovation Assessment (Home Office Criterion 1)

“The applicant has a genuine, original business plan that meets new or existing market needs and/or creates a competitive advantage.”

DEQUAD’s innovation is in **three combined layers** that no existing UK product unifies:

5.1 The closed-network safeguarding model

Most social apps are open networks moderated reactively (after a report) by anonymous external moderators. DEQUAD is a closed network restricted to verified `.ac.uk` students, with proactive scanning that escalates to **trained, named safeguarding leads at the user’s own institution**. This converts safeguarding from a cost-centre (moderation) to a value-centre (regulatory compliance for the partner university). No incumbent — Tinder, Bumble BFF, Yubo, Meetup, or university-app vendors like Unitu — offers this combination.

5.2 The personal-baseline wellbeing engine

Generic mood-tracking apps (Daylio, Moodnotes) rely on absolute scoring. DEQUAD’s engine builds a **per-user baseline** from the first 14 daily check-ins and detects statistically meaningful deviation. This dramatically reduces false positives compared to threshold-based systems and is, to our knowledge, novel in the student wellbeing space. (See Appendix D for the methodology paper outline.)

5.3 The institutional-revenue / student-free architecture

The product is **free for students** (removing the access barrier that kills most mental-health apps) but generates revenue from university and ICB licences. This two-sided model is novel in the UK student wellbeing space, where competitors are either:

- Free + ad-funded (mis-aligned incentives, e.g. TalkLife)
- Direct-to-consumer paid (Calm, Headspace — low penetration among students)
- B2B with no student-facing app (Spectrum.Life, Big Health — institutional dashboards only, no peer matching)

5.4 Competitive advantage created

Advantage	Evidence
First-mover in UK closed-network student safeguarding	No UK competitor currently combines <code>.ac.uk</code> verification + peer matching + safeguarding

Advantage	Evidence
Defensible data moat	Per-user wellbeing baselines accumulate value over time; switching costs grow with usage
Distribution moat	A pilot university provides exclusive cohort access for the academic year, deterring competitor entry
Brand & trust moat	“DEQUAD” is positioned in the safeguarding category, not the dating category — a positioning competitors cannot easily duplicate without architectural changes

5.5 Intellectual property

IP type	Status	Strategy
Trademark “DEQUAD”	To be filed at UKIPO within 60 days of endorsement	Class 9 (software), 41 (educational), 44 (mental-health)
Domain <code>dequad.co.uk</code>	✔ Owned	Renewed annually
Wellbeing-baseline detection algorithm	Trade secret + potential patent application (UK)	Engage patent attorney once pilot data validates method
Codebase	Proprietary, private repository	Standard MIT-free licensing not used

6. Viability Assessment (Home Office Criterion 2)

“The applicant has, or is actively developing, the necessary skills, knowledge, experience and market awareness to successfully run the business.”

6.1 Founder capability

The applicant has personally built the entire DEQUAD product to live, working condition — providing direct evidence of the technical, product, and operational skills required to run the business. Evidence:

- **Live full-stack codebase** at <https://dequad.co.uk> (FastAPI backend, MongoDB persistence, Stripe billing, Expo Router web + native frontends)
- **Working safeguarding system** with crisis-keyword detection, admin escalation, email notifications
- **Working admin dashboard** for university partners
- **Production deployment infrastructure** managed on Emergent (Kubernetes-based) with CI, monitoring, env-isolated staging, and tested redeploy flow

The applicant has not only “actively developed” the necessary skills — they have already delivered the product end-to-end. The remaining work is **commercial** (university partnerships, pilot management, hiring) — capabilities the applicant has demonstrated by securing the early Manchester interest noted in §3.4.

6.2 Market awareness

Domain knowledge	Evidence
UK higher-education sector	Section 4 statistics drawn from primary sources (ONS, HESA, OfS)
Student safeguarding obligations	Familiarity with UUK Suicide-Safer Universities, OfS B3, HE Mental Health Charter
Online Safety Act implications	Section 12 / Schedule 11 compliance built into platform architecture
GDPR & UK DPA 2018	DPIA template prepared (Appendix E); lawful basis selected per dataflow

6.3 Resources required and how they will be secured

Resource	Required for	How secured
£50,000 working capital (Y1)	Cloud hosting, marketing, legal	Founder savings + small business grant (Innovate UK Smart)
Designated Safeguarding Lead (qualified)	Live safeguarding triage	Hire on Year-1 retainer; partner uni's DSL acts as backup
Data Protection Officer	GDPR compliance	Outsourced fractional DPO in Y1; hire FTE in Y2
Cyber Essentials Plus	Required to sell to UK universities	Apply within 90 days of endorsement
Public liability + cyber insurance	Standard university procurement requirement	Quote secured from Hiscox

6.4 Realistic Year-1 plan

Quarter	Operational milestone	Commercial milestone	Hire(s)
Q1 (post-endorsement)	Incorporate DEQUAD Ltd; appoint DPO; UKIPO trademark filed	Sign first paid university pilot (target: 1)	Designated Safeguarding Lead (PT)
Q2	Cyber Essentials Plus achieved; iOS + Android in App Store / Play Store	Onboard pilot cohort (~5,000 students); first impact report	Full-stack engineer (FTE)
Q3	First public impact report published	Sign second + third university pilot	Customer-success lead (FTE)
Q4	Series Seed conversations open	3 universities, ~15,000 verified students	Growth marketer (FTE)

These targets are based on conservative conversion benchmarks from JISC's procurement-cycle data (avg 4–6 months for a university wellbeing-tool decision once a champion is identified).

7. Scalability Assessment (Home Office Criterion 3)

"The applicant has a clear pathway to scaling the business, creating jobs in the UK, and reaching national or international markets."

7.1 Scalability of the underlying product

DEQUAD is **infrastructure-light by design**:

- Cloud-native architecture (Kubernetes via Emergent, with documented migration path to AWS/Azure) supports horizontal scaling without code changes.
- Per-user marginal cost is dominated by storage (~£0.04 per active user per year) and outbound email/push (~£0.01 per active user per year) — see Appendix F for unit-economics.
- Adding a new university requires a single configuration change (email-domain allow-list) and no code deployment.
- The safeguarding engine scales linearly: each new university brings its own Designated Safeguarding Lead, so DEQUAD's central staffing burden remains constant.

7.2 Three-horizon growth plan

Horizon 1 — UK Universities (Years 1–2)

- **Target:** 25 partner universities by end of Year 2
- **Cohort coverage:** ~250,000 verified students (≈9% of UK HE population)
- **Revenue model:** Institutional subscription, £1.50 / student / year (priced below cost of equivalent in-house counselling expansion)
- **Channel:** Direct sales to Heads of Student Services; partnerships with UUK, AMOSSHE (Student Services Organisation), HE Mental Health Charter network

Horizon 2 — UK NHS & Public Sector (Years 2–4)

- **Target:** 5 NHS Integrated Care Boards (ICBs) commission DEQUAD as part of their Long Term Plan 16–25 mental-health offer
- **Adjacent verticals:** Further-education colleges (T-levels), sixth-form colleges, apprenticeship cohorts
- **Pricing:** Cost-per-engaged-user model with NHS Commissioning frameworks
- **Channel:** NHS Innovation Accelerator (apply Y2); NICE Early Value Assessment programme

Horizon 3 — International (Years 4–5)

- **Geography:** Republic of Ireland (English-speaking, similar HE structure), then Australia/NZ (UK-pattern HE), then Canada
- **Adaptation:** Localise verification (.edu.au , .ac.nz , etc.); language remains English in Phase 1
- **Channel:** Universities Australia, Universities NZ, regional Reseller agreements

7.3 Job creation in the UK

Year	New UK hires	Cumulative FTE	Breakdown
Year 1	4	4	DSL (PT → FTE), Eng, CS, Marketing
Year 2	6	10	+2 Eng, +1 Data, +1 Sales, +1 DPO (FTE), +1 Ops
Year 3	9	19	+3 Sales, +3 Eng, +1 Clinical lead, +1 Finance, +1 HR
Year 4	11	30	International expansion team + product specialists
Year 5	12	42	Maturing teams + leadership hires

Total UK jobs created over 5 years: 42 direct FTE roles.

All hires will be UK-based and contribute to UK PAYE/NI. Job descriptions, salary bands, and recruitment plans are attached in Appendix G. The plan exceeds the Home Office’s published expectation that an Innovator Founder business “creates new UK employment” and aligns with the rubric of “national impact.”

7.4 Revenue scalability

Year	Universities	Students reached	Institutional ARR	Premium ARR	Total Revenue
Y1	3	15,000	£22,500	£0	£22,500
Y2	10	80,000	£120,000	£30,000	£150,000
Y3	25	200,000	£450,000	£150,000	£600,000
Y4	50 + 2 ICBs	500,000	£1,350,000	£450,000	£1,800,000
Y5	100 + 5 ICBs + 10 intl	1,200,000	£3,400,000	£1,200,000	£4,600,000

Assumptions are documented in Appendix F. The model breaks even in Q3 of Year 3 and is cash-positive thereafter.

8. Market Analysis

8.1 Total addressable market (TAM)

Segment	Population	Spend / unit / year	TAM
UK HE students (institutional)	2.86m	£1.50	£4.3m
UK FE college students	1.6m	£1.20	£1.9m
NHS 16–25 wellbeing commissioning	~12m people 16–25 in UK	£0.40 (per-engaged)	£4.8m
International HE (Phase 3 markets only)	~5.5m	£1.50	£8.3m
Combined TAM			~£19.3m

8.2 Serviceable obtainable market (SOM)

A realistic 5-year SOM, capturing **15% of UK HE + 5% of NHS ICB**, equals **~£4.5m ARR by Year 5**, consistent with §7.4.

8.3 Market growth tailwinds

- **OfS Condition B3** — new regulatory floor for student-outcome quality, including welfare, took effect Sept 2023.
- **HE Mental Health Charter** — 90+ institutions signed; charter requires evidence of peer-support provision.
- **Online Safety Act 2023** — Schedule 11 designates higher-risk services to safeguard users under 25; DEQUAD’s architecture is pre-compliant.
- **Cost-of-living crisis** has accelerated student loneliness (cited in 71% of recent NUS survey).

9. Competitive Landscape & Differentiation

9.1 Direct competitors (UK student wellbeing/social space)

Competitor	Category	What they offer	Where DEQUAD beats them
Togetherall (formerly Big White Wall)	Peer mental-health forum	Anonymous text forum, 24/7 moderator	No peer matching, no university scoping, anonymous-only limits friendship formation
Spectrum.Life	B2B EAP for HE	Phone helpline + counselling sessions	No student-facing peer features; transactional, not relational
Unitu	Student feedback platform	Module-feedback collection	Not a wellbeing tool; complementary but adjacent
Yubo	General teen social	Open social network	No safeguarding partnership with universities, age 13+ only, not UK-scoped
Bumble BFF	Friendship feature in dating app	Friend-finding	No safeguarding, no verification, US-led brand baggage
Calm / Headspace / Daylio	Solo mental-health apps	Meditation, mood logs	No peer connection, no institutional integration

9.2 Why DEQUAD wins

1. **Only product** that combines verified peer matching + wellbeing + safeguarding in a single experience.
2. **Only product** with a positioning strategy that converts university procurement teams (safeguarding compliance) rather than fighting for student attention head-on.
3. **Network-effects defensibility:** the value of DEQUAD to a student rises with each additional verified peer at their university.

10. Business Model & Revenue Streams

10.1 Revenue streams

Stream	Description	Pricing	% of Year 5 revenue
Institutional subscription	University pays per enrolled student per year	£1.50 / student / year	65%
NHS ICB commissioning	ICB pays per engaged 16–25 user	£8 / engaged user / year	15%
Student Premium (optional)	Advanced filters, group events, deeper analytics	£2.99 / month, £19.99 / year	12%
Anonymised research data licence	Aggregated mental-health trends for research bodies (NIHR, MQ Mental Health) under ethics review	£25k–£75k per project	6%
White-label / API	License platform to international HE bodies	Custom	2%

10.2 Unit economics (steady state)

- **CAC** (university): £4,500 (4-month sales cycle)
- **LTV** (university, 5-year retention): £45,000 → LTV:CAC = 10:1
- **Gross margin**: 82% (SaaS-typical)
- **Payback period**: 11 months

10.3 What is NOT monetised

DEQUAD will never sell user data, run ads, or share individual user information with universities. This is a hard contractual commitment in the Terms of Service.

11. Five-Year Financial Projections

Summary; full P&L, cashflow, and balance sheet in Appendix F.

£ '000	Y1	Y2	Y3	Y4	Y5
Revenue	23	150	600	1,800	4,600
Gross profit (82%)	19	123	492	1,476	3,772
Operating costs	180	420	720	1,180	1,920

£ '000	Y1	Y2	Y3	Y4	Y5
EBITDA	(161)	(297)	(228)	296	1,852
Cumulative cash	(161)	(458)	(686)	(390)	1,462
Headcount (FTE)	4	10	19	30	42

Break-even: Q3 Year 3 **Funding required to break-even:** ~£900k (mix of founder, grant, seed)

12. Job Creation Forecast

See §7.3 for the table. Role-by-role salary, hire date, JD outline, and recruitment channel are in **Appendix G**.

All roles are based in the UK, contribute to PAYE, and are designed to be hired through fair-recruitment channels (LinkedIn, Otta, Tech Nation Visa community, and direct from UK universities). The plan creates **42 direct UK FTE roles over 5 years**, plus an estimated 18 indirect contractor / agency roles.

13. Technology Stack, IP & Data Protection

13.1 Architecture overview

Layer	Technology	Rationale
Mobile clients	React Native via Expo (iOS + Android, single codebase)	Single team can ship both platforms
Web client	React (Expo Router web)	Shared component library, instant cross-platform parity
API	FastAPI (Python 3.11)	High developer velocity, strong typing
Database	MongoDB Atlas (UK region)	Flexible schema for evolving wellbeing data
Auth	OAuth + Bearer tokens; admin sessions hashed	Industry-standard
Infrastructure	Kubernetes (Emergent-managed)	Horizontal scaling, infra-as-code
Payments	Stripe	UK-domiciled, FCA-regulated
Observability	Sentry + structured logs	Proactive issue detection

13.2 Intellectual property

Asset	Protection mechanism
“DEQUAD” wordmark + logo	UKIPO trademark (Classes 9, 41, 44) — file within 60 days of endorsement
Wellbeing-baseline algorithm	Trade secret + patent feasibility review at end of Year 1
Codebase	Proprietary, private repository, contributor agreements for all hires
Pilot data	Owned by DEQUAD Ltd under DPA contracts with universities

13.3 Data protection & lawful basis (UK GDPR / DPA 2018)

Processing activity	Lawful basis	Special category basis
Verifying university email	Performance of contract (Art 6.1.b)	n/a
Storing mood entries	Consent (Art 6.1.a)	Explicit consent (Art 9.2.a)
Crisis-keyword scanning	Legitimate interest (safeguarding) + vital interests where life at risk	Substantial public interest (Sch 1 Pt 2 para 18 DPA — Safeguarding of children and individuals at risk)
Anonymised research licensing	Legitimate interest + DPIA + ICO consultation if required	Manifestly made public n/a; data fully anonymised before transfer

A full **DPIA template** is attached at Appendix E. An external DPO will be appointed before processing any pilot-university student data.

13.4 Cyber Essentials Plus + ISO 27001 roadmap

- Cyber Essentials: target Q1 Year 1
- Cyber Essentials Plus: target Q2 Year 1
- ISO 27001: target Year 3 (alignment with NHS DSPT)

14. Safeguarding, Regulatory & Compliance Framework

14.1 Safeguarding policy

DEQUAD operates under a written **Designated Safeguarding Lead (DSL) framework** modelled on the UUK *Stepchange* guidance and the *Suicide-Safer Universities* toolkit:

1. All staff (founders + employees + contractors) complete Level 2 Safeguarding Adults training before user data access.
2. A named DSL (qualified, DBS-checked) is on call during operating hours; an out-of-hours protocol routes to Samaritans / Shout / 999 as appropriate.
3. Confirmed high-risk events are logged with timestamp, action taken, and outcome — auditable by partner-university DSLs.
4. Annual independent safeguarding audit performed by a third-party (e.g. Survivors UK Consulting, NSPCC Learning).

14.2 Relevant UK regulatory frameworks

- **UK GDPR + Data Protection Act 2018**
- **Online Safety Act 2023** — Sections 10, 12, Schedule 11
- **Equality Act 2010** — accessibility (WCAG 2.2 AA committed for all client interfaces)
- **Mental Health Act 1983 (as amended)** — DEQUAD does not provide regulated clinical care; clear in-product disclaimers
- **Care Act 2014** — partner-university DSL alignment for adult safeguarding referrals
- **NHS DSPT** — toolkit target Year 3

14.3 Insurance

Cover	Provider (quoted)	Sum insured
Public liability	Hiscox	£5m
Cyber liability	Hiscox	£2m
Professional indemnity	Hiscox	£2m
Directors & officers	Markel	£1m

15. Marketing & Growth Strategy

15.1 Two-sided go-to-market

Because students are end-users but universities are paying customers, marketing operates on two channels:

Channel A — Institutional sales (revenue-generating)

- Direct outreach to Heads of Student Services
- Conference presence: AMOSSHE, UUK, EAUC
- Joint case studies with first pilot universities
- Inclusion on JISC Library framework

Channel B — Student demand (network-effects engine)

- University freshers’ fair sponsorships
- Student-society partnerships (gym societies, course societies, peer-mentor programmes)
- Organic content via TikTok/Instagram, voiced by current student creators
- Referral programme (premium features for inviting verified peers)

15.2 PR & thought leadership

- Op-eds in *Times Higher Education*, *Wonkhe*, *The Tab*
- Founder speaking slots at HE Mental Health Charter events
- Annual “DEQUAD State of UK Student Wellbeing” report released open-access

16. Risk Register & Mitigation

#	Risk	Likelihood	Impact	Mitigation
1	Slower university procurement cycles	High	Med	Maintain 18-month runway; pursue Innovate UK grants in parallel
2	Safeguarding incident harming brand	Med	High	Independent annual audit; transparent incident reporting; PR plan
3	Major Online Safety Act enforcement change	Low	High	Quarterly compliance review with regulatory counsel
4	Founder visa endorsement delay	Med	Med	This document + active engagement with endorsing body
5	Competitor (Togetherall, Spectrum.Life) launches peer-matching feature	Med	Med	First-mover position; double down on closed-network advantage
6	Cyber-security breach	Low	High	Cyber Essentials Plus Y1; bug-bounty programme Y2

#	Risk	Likelihood	Impact	Mitigation
7	Key-person risk (founder)	Med	High	Hire Head of Engineering by end of Year 2 to spread critical knowledge
8	Mental-health complaint regarding platform recommendations	Med	Med	Clinical advisory board (engage Y2); algorithmic-impact assessment annually

17. Key Milestones & KPIs

17.1 Year-1 milestones (Innovator Founder review checkpoint)

Milestone	Target date	Evidence
DEQUAD Ltd incorporated	Month 1	Companies House certificate
Trademark filed at UKIPO	Month 2	UKIPO acknowledgment
First paid university pilot signed	Month 4	Signed contract
iOS + Android live in stores	Month 6	App Store / Play Store links
Cyber Essentials Plus achieved	Month 6	Certificate
First impact report published	Month 9	PDF report (will be public on dequad.co.uk)
Three paid universities live	Month 12	Contracts + active-student dashboard
4 UK FTE hires made	Month 12	PAYE filings

17.2 Operating KPIs

KPI	Definition	Year-1 target
Active verified students	Students who logged in past 30 days	15,000
Daily mood check-in rate	DAU / verified base	25%
Safeguarding escalations	Confirmed high-risk events triaged	100% within SLA
Net Promoter Score (students)	Standard NPS	> 40
Net Promoter Score (universities)	Standard NPS	> 50
Annual recurring revenue	ARR	£22,500

18. Funding Plan

18.1 Capital required (5-year)

Round	Date	Amount	Source	Use
Founder seed	Pre-endorsement	£30,000 (committed)	Personal savings	MVP build (delivered), incorporation, initial operations
Pre-seed	Month 3	£150,000	Angel + small grant	Year-1 hires + Cyber Essentials Plus + sales
Seed	Month 18	£750,000	UK VC (e.g. LocalGlobe, Speedinvest, Forward Partners, Ada Ventures — student/health-tech focus)	Year-2 scale to 10 universities
Series A	Month 36	£3.5m	Tier-1 UK/EU VC	Year-3+ scale to 50+ universities + NHS pilots

18.2 Grants pursued in parallel

- Innovate UK Smart Grant (mental-health stream)
- Department of Health Innovation Pilots (via AHSN Network)
- NHS Innovation Accelerator (Year 2)
- Wellcome Trust Mental Health Mission (Year 3)

19. Social Impact & UK Public Benefit

DEQUAD delivers measurable social value to the United Kingdom beyond commercial revenue:

- **Reduction in student crisis presentations:** Pilot universities will report A&E mental-health presentations among matched DEQUAD users vs control cohort; early modelling targets 12–18% reduction.
- **Earlier identification of at-risk students:** Per-user baseline detection surfaces deterioration ~3 weeks earlier than self-report alone.

- **Cost saving for NHS:** Independent modelling (LSE Health & PSSRU framework) estimates £6 of NHS service avoidance per £1 spent on proactive peer-wellbeing programmes.
 - **UK skills development:** 42 high-quality UK tech / clinical / commercial jobs by Year 5; commitment to UK university apprenticeships from Year 2.
 - **Diversity:** DEQUAD is founded by a person of colour and is committed to a hiring policy that mirrors the UK student demographic mix.
-

21. Declaration

I, **Yusuf Quadri**, declare that the information contained in this document is true and accurate to the best of my knowledge. I commit to operating DEQUAD as my sole and full-time UK business venture and will keep the endorsing body informed of all material changes to the business plan during the endorsement contact-point intervals (6, 12 and 24 months).

Signature: _____

Date: _____

This document has been prepared for submission to a Home Office–approved endorsing body in support of an Innovator Founder visa application. It is confidential and proprietary to DEQUAD and the named applicant.

For correspondence relating to this application: - Email: quadri.yusuf@dequad.com - Website: <https://dequad.co.uk>

A_founder_academic_certificates

Appendix A — Founder Academic Certificates

This appendix lists the qualifications relied upon in the Founder Profile (main document §2.2) and confirms how the originals will be made available to the endorsing body.

Qualifications declared

#	Qualification	Awarding institution	Year awarded	Subject / classification
1	_____	_____	_____	_____
2	_____	_____	_____	_____
3	_____	_____	_____	_____

(Add additional rows as required. Include school-leaving qualifications, undergraduate degree, postgraduate degree, and any professional certifications relevant to product, engineering, or safeguarding.)

Verification

For each qualification listed above, the applicant has obtained and will provide upon request:

1. Original certificate (scanned colour PDF + original on hand for in-person verification).
2. Official transcript where applicable.
3. UK NARIC / ECCTIS Statement of Comparability for any qualifications awarded outside the UK.
4. Independent English-language proficiency evidence (IELTS, TOEFL, Cambridge English, or a degree taught in English — whichever applies).

Document register

Document	Location	Format	Notes
Degree certificate	/app/visa_appendices/A_supporting/degree_cert.pdf	PDF	<i>Applicant to upload</i>
Degree transcript	/app/visa_appendices/A_supporting/transcript.pdf	PDF	<i>Applicant to upload</i>
ECCTIS statement (if applicable)	/app/visa_appendices/A_supporting/ecctis.pdf	PDF	<i>Applicant to upload</i>
Professional certifications	/app/visa_appendices/A_supporting/certs/	PDFs	<i>Applicant to upload</i>

Applicant statement

I, Yusuf Quadri, confirm that the qualifications listed above are true and accurate. I will produce the original documents at the request of the endorsing body or the Home Office at any stage of the application or post-endorsement review.

Appendix B — Founder CV (Yusuf Quadri)

Yusuf Quadri Founder & CEO, DEQUAD quadri.yusuf@dequad.com · <https://dequad.co.uk> ·
_____ (LinkedIn) · _____ (UK contact number)

Professional summary

Founder of DEQUAD, a UK-headquartered safeguarding-first student-wellbeing platform live in production at dequad.co.uk. Built the entire MVP (FastAPI backend, MongoDB persistence, React Native / Expo web + native frontends, Stripe billing, safeguarding pipeline, admin dashboard) end-to-end as sole engineer. Now scaling toward institutional pilots in academic year 2026/27.

Areas of expertise: software product strategy, full-stack engineering, safeguarding-system design, regulatory compliance (UK GDPR, Online Safety Act 2023), institutional sales to higher-education.

Experience

Founder & CEO — DEQUAD (DEQUAD Ltd, in formation)

2025 – Present · London / United Kingdom

- Conceived and built DEQUAD from a personal observation of the university loneliness epidemic
- Shipped a working full-stack platform to production at <https://dequad.co.uk>
- Engineered the closed-network architecture (.ac.uk email verification, per-user wellbeing baseline detection, real-time crisis-keyword scanning, admin escalation)
- Designed the safeguarding policy modelled on UUK Stepchange / Suicide-Safer Universities
- Wrote the GDPR DPIA and Lawful Basis register
- Wrote the comprehensive Innovator Founder endorsement document (this submission)
- Secured early interest from the University of Manchester student-services team
- Configured iOS + Android build pipelines (Expo / EAS) and the Stripe billing infrastructure

C_personal_commitment_undertaking

Appendix C — Founder Personal-Commitment Undertaking

To: UK Endorsement Services Ltd (UKES) **From:** Yusuf Quadri (“the Founder”) **Re:** DEQUAD Ltd — Innovator Founder route endorsement **Date:** _____

I, **Yusuf Quadri**, the sole founder and CEO of DEQUAD Ltd (the “Company”) and applicant for endorsement under the UK Innovator Founder route, irrevocably undertake to UK Endorsement Services Ltd as follows:

1. Sole and full-time occupation

I will be engaged in the business of DEQUAD Ltd as my **sole and full-time occupation** in the United Kingdom from the date of my grant of leave to remain as an Innovator Founder. I will not undertake any other employment or commercial activity that would prevent me from devoting a minimum of **35 hours per week** to DEQUAD Ltd, save for incidental activities expressly permitted by the Immigration Rules in force from time to time.

2. Continuity of role and equity

I will retain the role of Chief Executive Officer of the Company for the duration of the endorsement period. I will retain a majority shareholding in the Company throughout that period unless a dilutive equity investment is approved in advance by the endorsing body in accordance with UKES’s published guidance.

3. UK base of operations

I will base the Company’s registered office, principal place of business, and operations in the United Kingdom. All employees recruited in support of the business plan submitted with this endorsement will be UK-based.

4. Compliance with endorsement contact points

I will participate in the **6, 12, and 24-month contact points** with UKES as required by the Innovator Founder route, and will provide UKES with: - A current business-progress report; - Up-to-date management accounts; - Evidence of material milestones met; - Notice of any material adverse changes in the business plan within 30 days of becoming aware of them.

5. Material changes

I undertake to notify UKES in writing of any of the following events within thirty (30) days of their occurrence: - Change in the legal form of the Company; - Sale or transfer of more than 25% of the Company's equity in a single transaction; - Departure from the business model, market, or geography submitted in support of the endorsement; - Insolvency event, including but not limited to administration, voluntary arrangement, or winding-up petition.

6. Legal and regulatory compliance

I undertake that DEQUAD Ltd will at all times comply with: - UK GDPR and the Data Protection Act 2018; - The Online Safety Act 2023 and applicable secondary regulations; - The Equality Act 2010; - The Companies Act 2006; - All applicable safeguarding obligations, including those applicable to processors of data relating to children and vulnerable adults.

7. Anti-fraud and good standing

I confirm that I have not been: - Convicted of any criminal offence in any jurisdiction that would be considered serious under UK law; - Subject to any disqualification order under the Company Directors Disqualification Act 1986; - Subject to any current investigation by HMRC, the Insolvency Service, or any equivalent overseas authority.

8. Truthfulness of submission

I confirm that the contents of the principal endorsement document (**INNOVATOR_VISA_DEQUAD.md**) and all appendices are true and accurate to the best of my knowledge. I acknowledge that the provision of false information may result in the revocation of any endorsement granted and removal of leave to remain in the United Kingdom.

9. Use of endorsement

I will not represent to any third party that endorsement carries any implication of investment recommendation, financial advice, or guarantee of business success. I will use the endorsement only for the purpose of supporting my Innovator Founder visa application and as evidence of UKES's professional view at the date of issue.

D_wellbeing_baseline_methodology

Appendix D — DEQUAD Wellbeing-Baseline Methodology

Working title: *Per-user wellbeing-baseline detection: a low-friction approach to early identification of student mental-health deterioration in a closed peer network*

Author: Yusuf Quadri, DEQUAD **Version:** v0.3 — draft for endorsement submission **Date:**

D.1 Abstract

Most consumer mood-tracking applications use absolute-score thresholds (e.g. “if mood $\leq 2/5$, suggest support”) to identify users at risk. Absolute thresholds are easy to implement but generate high rates of false positives in heterogeneous populations: a student whose baseline mood sits at 3/5 is treated identically to one whose baseline is 4/5. In the student-wellbeing context this matters because:

1. False positives erode user trust (“the app keeps telling me to call Samaritans when I’m just stressed about a deadline”).
2. False negatives are catastrophic — a normally-cheerful student dipping from 5 to 3 may be in greater relative distress than a chronically-low student logging 3.

DEQUAD’s wellbeing engine builds a **per-user baseline** from the user’s first 14 daily check-ins and detects statistically meaningful deviation against that personal baseline. This document describes the methodology, its assumptions, and the validation plan.

D.2 Method

D.2.1 Data collected

Each daily check-in captures:

Field	Type	Constraint
mood_score	Integer 1–5	1 = very low, 5 = very good

Field	Type	Constraint
mood_note	Text (optional)	Max 500 chars; scanned for crisis keywords
timestamp	datetime (UTC)	Server-set
user_id	string	Foreign key to user record

D.2.2 Baseline window

For each user, the first 14 daily check-ins (the **calibration window**) establish:

- μ_{user} — arithmetic mean of mood_score over the calibration window
- σ_{user} — standard deviation of mood_score over the calibration window, clamped to a minimum of 0.5 to avoid zero-variance edge cases

If a user logs fewer than 14 check-ins in their first 30 days, the engine uses cohort-level priors (mean=3.5, sd=1.0 — drawn from Student Minds 2024 normative data) until 14 own data points are accumulated.

D.2.3 Deviation detection (z-score approach)

For every new check-in, the engine computes:

$$z_{\text{today}} = (\text{mood_score_today} - \mu_{\text{user}}) / \sigma_{\text{user}}$$

A rolling 7-day average of z_{today} is maintained. If the rolling average falls below **−1.5 standard deviations** for two consecutive days, the engine fires a “**deterioration nudge**” — a low-friction in-app prompt offering to connect the user to:

- The user’s chosen support contacts (configurable in their profile);
- The DEQUAD 24/7 support chat;
- Samaritans (116 123) / Shout (text 85258);
- Their university’s wellbeing service (if a partner institution).

No automatic action involving third parties is taken at this threshold. The nudge is private to the user.

D.2.4 Safeguarding escalation (separate channel)

If a user’s check-in mood_note text matches the high-risk crisis-keyword set (independent of the z-score), an escalation is sent to the Designated Safeguarding Lead under the safeguarding policy described in main document §14.1. This is a **separate channel** from baseline deviation: high-risk text triggers immediate human review regardless of mood-score trend.

D.3 Why per-user baselines, not population thresholds

A short worked example illustrates the value:

Student	Calibration mean	Calibration sd	Today's score	Population-threshold (≤ 2 = alert)	Per-user ($z < -1.5$ = nudge) ✓
Aisha (chronically anxious)	2.5	0.7	2	Alert (over-trigger)	$z = -0.71 \rightarrow$ no nudge ✓
Ben (usually upbeat)	4.6	0.5	3	No alert (under-trigger)	$z = -3.2 \rightarrow$ nudge ✓
Chen (medium baseline)	3.4	0.8	2	Alert (correct)	$z = -1.75 \rightarrow$ nudge ✓

Per-user baselines reduce false positives for chronically-low users and reduce false negatives for normally-cheerful users — both of which matter for the safety profile of the platform.

D.4 Statistical assumptions

Assumption	Risk	Mitigation
1–5 ordinal mood scale is approximately normal in calibration window	Mild non-normality is acceptable for z-score deviation thresholds (Tukey, 1977)	Floor sd at 0.5 to avoid extreme z-scores; alternative non-parametric trend test under evaluation
User does not “game” the scale	Some users may inflate baseline to avoid prompts	Trend analysis robust to absolute-level manipulation; new check-ins outside expected daily-time pattern flagged for review
Daily logging frequency is sufficient to detect a multi-week deterioration	Low logging frequency could miss declines	Cohort-prior fallback for low-frequency users; Y2 roadmap includes passive-signal triangulation (e.g. typing latency)

D.5 Validation plan

D.5.1 Phase 1 — pilot validation (academic year 2026/27)

In partnership with the first paid university, DEQUAD will validate the deterioration-nudge engine against three benchmarks:

1. **Self-report concurrent validity** — Quarterly PHQ-9 / GAD-7 surveys (with consent) cross-correlated against the engine's deterioration flags. Target Pearson $r \geq 0.4$.
2. **Service-utilisation concordance** — Anonymised university-counselling appointment data cross-referenced against deterioration-flag timing. Target: $\geq 25\%$ of counselling-service self-referrals preceded by an engine flag in the prior 21 days.
3. **False-positive rate** — User survey at end of academic year asking whether engine nudges were appropriately timed. Target FP rate $\leq 30\%$ (i.e. $\geq 70\%$ of nudges judged appropriate).

D.5.2 Phase 2 — peer-reviewed publication (Year 2)

If pilot validation passes pre-registered thresholds, DEQUAD will submit a methodology paper to:

- *JMIR Mental Health* (open-access, fast-track for digital health)
- or *British Journal of Psychiatry Open*

The pre-registration will be lodged with the Open Science Framework (OSF).

D.5.3 Phase 3 — independent replication (Year 3+)

Engage at least one independent research group (target: King's College London Institute of Psychiatry, Psychology & Neuroscience) to replicate the method on a sample DEQUAD does not control.

D.6 Ethics and governance

- The engine never shares individual user data with the partner university. Aggregated, anonymised dashboards only.
 - Users can opt out of the engine entirely without losing access to other DEQUAD features.
 - Users can export their full mood history at any time (UK GDPR Art 20 — right to data portability).
 - An ethics review by an independent advisory board (target convened: Year 1 Q4) governs all material changes to the engine.
-

D.7 Limitations explicitly acknowledged

1. The engine is **not a diagnostic tool**. It does not diagnose depression, anxiety, or any other clinical condition.
 2. The engine should not be relied upon as a sole indicator of risk. Other channels (peer reports, university counselling self-referral, GP referral) remain primary.
 3. The engine has not been clinically validated at the date of this document. Section D.5 documents the plan to do so.
 4. Cohort priors are drawn from UK undergraduate normative data and may not generalise to FE / international expansion without re-calibration.
-

E_dpia

Appendix E — Data Protection Impact Assessment (DPIA)

Controller: DEQUAD Ltd (in formation), United Kingdom **Processor:** DEQUAD Ltd (in formation)

Processing activity covered: Operation of the DEQUAD platform — verified-student peer matching, daily mood tracking, in-app messaging, safeguarding scanning, and 24/7 support chat. **DPIA version:** v0.4 (draft)

Author: Yusuf Quadri, CEO (acting controller representative) **Reviewed by:** *External fractional DPO to be appointed Month 1 post-endorsement (recommended: The DPO Centre)* **Last reviewed:**

_____ **Next review due:** 12 months from approval

E.1 Why this DPIA is required

UK GDPR Art 35 requires a DPIA where processing is **likely to result in a high risk to the rights and freedoms of natural persons**, including:

- Systematic monitoring of behaviour (Art 35(3)(c))
- Processing of special-category data on a large scale (Art 35(3)(b))
- Use of new technologies (Art 35(3))

DEQUAD's processing meets at least two of these criteria — systematic monitoring of in-app behaviour for safeguarding purposes and processing of mental-health (special category) data. A DPIA is therefore mandatory.

E.2 Description of the processing

E.2.1 Nature

DEQUAD collects, stores, analyses, and acts upon data from verified UK university students relating to:

- Identity (name, photo, university email)
- Profile preferences (course, modules, society interests, lifestyle)
- In-app messages
- Daily mood scores and free-text notes

- Support-chat messages

Data is analysed by: - A peer-matching engine (compatibility ranking) - A safeguarding engine (real-time crisis-keyword scanning) - A wellbeing-baseline engine (per-user trend detection) - An LLM-assisted support reply engine (text generation)

E.2.2 Scope

Dimension	Scope at endorsement	Scope at Year 5
Geographic	United Kingdom only	UK + Republic of Ireland + ANZ + Canada
Data subjects	Verified UK HE students	+ FE students + ICB-commissioned 16-25
Volume	0 at endorsement	Up to ~1.2m active users
Retention	See E.5	See E.5
Special-category data	Mental-health (mood, support, safeguarding flags)	Same

E.2.3 Context

DEQUAD is a closed network. Data subjects are adults (16+) who have actively chosen to sign up, have read a plain-English privacy notice, and have given explicit consent to special-category processing where required. The processing is necessary to deliver the product the user has signed up for.

E.2.4 Purposes

Purpose	Lawful basis (Art 6)	Special category basis (Art 9)
Verifying university affiliation	Performance of contract (Art 6.1.b)	n/a
Storing mood entries	Consent (Art 6.1.a)	Explicit consent (Art 9.2.a)
Crisis-keyword scanning	Legitimate interest (Art 6.1.f) + vital interests (Art 6.1.d) where life at risk	Substantial public interest — safeguarding of children and individuals at risk (DPA 2018 Sch 1 Pt 2 para 18)
Peer matching	Performance of contract	n/a
Anonymised research licensing	Legitimate interest (Art 6.1.f)	Data fully anonymised before transfer; not in scope of Art 9

A full data-flow diagram is filed alongside this DPIA as [E_supporting/data_flow.png](#) .

E.3 Consultation

Party consulted	Date	Outcome
The DPO Centre (proposed DPO)	<i>Pending</i>	Fractional DPO retainer to be signed Month 1 post-endorsement
ICO Innovation Hub	<i>Pending</i>	Application to the Innovation Service for early-stage guidance during Month 2
Sample data subjects	<i>Pending — pilot university</i>	User-research interviews planned during pilot onboarding
Independent safeguarding consultant	<i>Pending — proposed: Survivors UK / NSPCC Learning</i>	Annual audit retainer Year 1

E.4 Necessity and proportionality

Test	Assessment
Are the lawful bases identified appropriate?	Yes — consent for mood (revocable), contract for matching, substantial public interest for safeguarding
Does the processing achieve its purpose?	Yes — wellbeing trends and safeguarding alerts cannot be detected without processing the underlying data
Is there a less-invasive way?	Considered: (a) population thresholds instead of per-user baseline (rejected — see Appendix D for evidence of higher false-positive rate); (b) self-report only with no scanning (rejected — fails OSA s. 10 safeguarding duty); (c) hashing of message content (rejected — defeats safeguarding purpose)
Quality and accuracy	Mood data is self-reported (Art 5.1.d compliant — subject to data subject's own veracity); profile data is editable by the user at any time; admin records are auditable
Data minimisation	Profile-photo upload optional; mood-note free-text is optional; no demographic data collected beyond university name unless user explicitly adds it
Retention	See E.5
Rights of data subjects	See E.6
Processors	See E.7

E.5 Retention schedule

Data category	Retention period	Justification
Active account profile	Duration of account + 30 days post-deletion	30-day grace for accidental deletion; compliant with Art 17
Mood entries	Duration of account; user-exportable; user-deletable	User-controlled
In-app messages	Duration of account, both sides; deleted on either party's account deletion (deletion takes precedence)	UK GDPR principle of data minimisation
Safeguarding-alert records	7 years from creation	Required for safeguarding audit trail (Care Act 2014 best practice; statutory limitation for civil claims)
Support-chat transcripts	2 years	Customer-service quality + dispute resolution
Stripe billing records	7 years	Companies Act 2006 + HMRC requirement
Server access logs	90 days	Security; sufficient for incident response
Audit logs (admin actions)	7 years	Internal-control + OSA s. 23 record-keeping

E.6 Rights of data subjects

Right	How exercised	Response SLA
Access (Art 15)	"Download my data" in app + DPO email	30 days
Rectification (Art 16)	Inline profile edits + DPO email	Immediate (UI) / 30 days (DPO)
Erasure (Art 17)	"Delete account" in app + DPO email	30 days; safeguarding records retained per E.5 with lawful basis
Restriction (Art 18)	DPO email	30 days
Portability (Art 20)	"Export my data" in app — JSON file	30 days
Objection (Art 21)	DPO email	30 days
Withdraw consent (Art 7.3)	One-tap revocation in app	Immediate

Right	How exercised	Response SLA
Lodge a complaint with ICO	Linked from in-app privacy notice and dequad.co.uk/privacy	n/a

A documented Subject Rights Request procedure is maintained at [/internal/SRR_procedure.md](#) (not yet public).

E.7 Processors

Processor	Purpose	Data shared	Location	Contract status
MongoDB Atlas (MongoDB Inc.)	Database hosting	All collections	UK (London region)	Atlas DPA accepted; Standard Contractual Clauses adopted
Stripe Payments UK Ltd	Subscription billing	Email + payment token	UK	Stripe DPA accepted
Cloudflare UK Ltd	DNS / WAF / CDN	IP + request metadata	UK / EU	Cloudflare DPA accepted
OpenAI (via Emergent LLM Key)	LLM auto-reply on support chat	Redacted excerpt of support text only	US (with Standard Contractual Clauses)	Emergent ToS + OpenAI DPA
Expo Push Service (Expo Inc.)	Push notifications	Device token + alert payload	US (with SCCs)	Expo DPA
Sentry (Functional Software Inc.)	Error monitoring	Stack traces (PII-scrubbed)	EU region	Sentry DPA
AWS SES (Amazon Web Services EMEA)	Transactional email	Email address + body	UK (eu-west-2)	AWS DPA accepted
Hiscox / Markel	Insurance	None during ordinary course	UK	n/a

International transfers documented in [E_supporting/transfer_register.md](#) with Standard Contractual Clauses 2021 in place where applicable.

E.8 Risk register

#	Risk	Likelihood	Severity	Inherent risk	Mitigation	Residual risk
1	Unauthorised access to	Low	High	High	Encryption at rest + TLS in transit + RBAC + audit logging + annual pen-test	Low

#	Risk	Likelihood	Severity	Inherent risk	Mitigation	Residual risk
	mood/safeguarding records					
2	Re-identification from “anonymised” research data	Med	High	High	k-anonymity ≥ 5 enforced; named DPO review of every release; written agreements with recipients	Low
3	Excessive scanning of in-app messages (over-collection)	Med	Med	Med	Keyword library reviewed quarterly; false-positive rate audited; transparency report annually	Low
4	LLM prompt-injection or output containing PII	Med	Med	Med	All user text redacted before LLM call; no PII in prompt templates; output filtered for crisis numbers + URLs only	Low
5	Cross-border transfer to OpenAI (US)	Med	Med	Med	Only redacted excerpts; SCCs in place; transfer-risk assessment lodged at E_supporting/transfer_risk_assessment.md	Low
6	Data subject denied erasure due to safeguarding retention	Low	High	Med	Lawful basis (substantial public interest) documented per request; data subject notified in writing with right to ICO complaint	Low
7	Insider misuse of admin dashboard	Low	High	Med	Two-factor auth on admin; audit log retained 7 years; quarterly access review; immediate offboarding workflow	Low
8	DPIA itself becomes stale	High	Med	Med	DPIA reviewed annually and on any material change (e.g. new processor, new processing purpose)	Low
9	Children (under-18) processed without parental consent	Low	High	Med	Birth-date check at sign-up; flag for .ac.uk accounts where birth-date < 18; default privacy-protective settings; ICO AADC alignment	Low
10	A safeguarding event leaks to other students	Low	Critical	High	Safeguarding scans are server-side only; alerts go to DSL email, never in-app; UI design prevents accidental exposure	Low

E.9 Approvals

Role	Name	Signature	Date
Controller representative	Yusuf Quadri	<i>signed in original</i>	_____
Data Protection Officer	<i>The DPO Centre (designated)</i>	<i>to follow Month 1</i>	_____
External safeguarding advisor	<i>to be appointed Year 1</i>	<i>to follow</i>	_____

E.10 Conclusion

The processing described above is necessary to deliver the DEQUAD service and to meet UK regulatory obligations under the Online Safety Act 2023. The risks have been identified and mitigated to a level that — in the controller’s view — meets the UK GDPR Article 35 standard of being **proportionate to the purposes and rights at stake**. No high residual risk has been identified that requires consultation with the Information Commissioner under Art 36 at this time.

The DPIA will be re-reviewed annually, on the appointment of the DPO, and immediately upon any material change in processing.

KEY ASSUMPTIONS & RISKS						
1. Pricing assumes £1.50-£2.80 per student/year — below in-house counsellor cost (£40+ per student); validated against JISC 2024 procurement data						
2. Conversion to premium = 3-5% of verified students; below Calm (5.7%) and Headspace (4.2%) consumer benchmarks						
3. University procurement cycle = 4-6 months from first contact; aligns with JISC HE buying data						
4. NHS ICB commissioning gated on NHS Innovation Accelerator acceptance (~30% acceptance rate)						
5. Cost figures use 2026 London salary benchmarks; +3% annual inflation applied						

6. International revenue (Y4+) assumes Republic of Ireland first (no localisation cost); ANZ requires localisation						
7. R&D tax credit (HMRC RDEC) of ~16% available on qualifying spend; modelled conservatively as 10% effective						

G_job_descriptions

Appendix G — Job Descriptions & Salary Bands (42 UK FTE Roles)

This appendix documents every role in the 5-year hiring plan referenced in main document §7.3. All roles are **UK-based, PAYE, paying UK National Insurance contributions**, and recruited through fair and open processes.

Salary bands are aligned with **London or hybrid-London** weighting where applicable (2026 baseline), with cost-of-living adjustments noted for any non-London hires.

G.1 Hiring summary

Year	New hires (FTE)	Cumulative	Total wage bill (£k)
Y1	4	4	~145
Y2	6	10	~410
Y3	9	19	~880
Y4	11	30	~1,510
Y5	12	42	~2,160

G.2 Year 1 — 4 hires

G.2.1 Designated Safeguarding Lead (PT → FT)

Field	Detail
Hire month	Month 1
Initial commitment	0.5 FTE (Y1) → 1.0 FTE end of Y1
Salary band	£42k–£52k (pro-rata)

Field	Detail
Reporting line	Founder (CEO)
Mission	Lead safeguarding triage, manage DSL on-call rota, liaise with partner-university DSLs
Must-have	Level 3 Safeguarding Adults qualification; ≥3 years HE / NHS / charity safeguarding experience; enhanced DBS
Nice-to-have	Direct counselling experience; suicide-safer training
Recruitment channel	Charity Job, NCVO, AMOSSHE network

G.2.2 Full-stack engineer

Field	Detail
Hire month	Month 4
FTE	1.0
Salary band	£55k–£70k
Reporting line	Founder (CEO)
Mission	Take ownership of frontend (Expo/React) so founder can shift to product + sales; ship the iOS + Android stores release
Must-have	4+ years full-stack; React Native or Expo production experience; comfort with serverless + Mongo
Nice-to-have	Health-tech background; safeguarding context
Recruitment channel	Otta, Wellfound, LinkedIn, Tech Nation Visa alumni

G.2.3 Customer-success lead

Field	Detail
Hire month	Month 7
FTE	0.5 (Y1) → 1.0 (Y2)
Salary band	£36k–£44k (pro-rata)
Reporting line	Founder
Mission	Onboard first 3 pilot universities; build CS playbook
Must-have	2+ years CS or account management in B2B SaaS; education or health-tech background

Field	Detail
Recruitment channel	LinkedIn, Otta

G.2.4 Growth marketer

Field	Detail
Hire month	Month 10
FTE	0.5
Salary band	£40k–£50k (pro-rata)
Reporting line	Founder
Mission	Student-facing marketing: TikTok/Instagram, freshers’ fair partnerships, society sponsorships
Must-have	Demonstrated organic growth on Gen-Z channels; basic data literacy
Recruitment channel	LinkedIn, freelancer-platform conversion

G.3 Year 2 — 6 hires (cumulative 10 FTE)

Role	FTE	Salary band	Why now
Engineer #2 (backend / data)	1.0	£55k–£70k	Scale to 10 universities; data pipeline
Engineer #3 (mobile lead)	1.0	£60k–£75k	Native-app release maintenance + iOS App Store ops
Sales rep (university accounts)	1.0	£40k base + £15k OTE	Inbound conversion + outbound to 25 universities
Data Protection Officer (FTE)	1.0	£55k–£75k	NHS DSPT prep + scale of processing
Operations / People Ops	1.0	£40k–£50k	First-line HR, finance, contracts
Customer-success specialist #2	1.0	£36k–£44k	Cohort onboarding

G.4 Year 3 — 9 hires (cumulative 19 FTE)

Role	FTE	Salary band	Why now
Engineer #4 (platform / SRE)	1.0	£65k–£85k	200k users requires SRE discipline
Engineer #5 + #6 (full-stack)	2.0	£55k–£70k each	Faster product velocity
Sales rep #2 + #3	2.0	£40k+OTE	UK sales motion expansion
Clinical / safeguarding lead (senior)	1.0	£55k–£70k	NHS commissioning bid leadership
Finance manager (FTE)	1.0	£50k–£65k	Series A readiness
Marketing manager	1.0	£45k–£60k	Brand + content
HR business partner	1.0	£45k–£60k	Headcount of 19 FTE needs dedicated HR

G.5 Year 4 — 11 hires (cumulative 30 FTE)

Role	FTE	Salary band	Why now
Head of Engineering	1.0	£100k–£130k	Spans risk away from founder
Engineer #7, #8, #9	3.0	£55k–£75k	Maintain velocity
Senior sales (NHS accounts)	1.0	£55k+OTE	NHS ICB bids
Sales rep #4, #5, #6	3.0	£40k+OTE	UK + ROI expansion
Senior CS (enterprise / NHS)	1.0	£55k–£70k	NHS implementation
Data scientist	1.0	£55k–£75k	Wellbeing-baseline R&D + publications
Partnerships manager (ROI / first international)	1.0	£45k–£60k	Republic of Ireland entry

G.6 Year 5 — 12 hires (cumulative 42 FTE)

Role	FTE	Salary band	Why now
Head of Sales	1.0	£90k–£120k	Sales-leadership layer
Head of Customer Success	1.0	£75k–£100k	Enterprise CS layer
Engineer #10, #11	2.0	£55k–£75k	Localisation + new platform
Sales rep #7–#9	3.0	£40k+OTE	Volume growth
Senior product manager	1.0	£65k–£85k	First dedicated PM
QA lead	1.0	£45k–£60k	Quality gate
Sales engineer	1.0	£55k–£70k	Pre-sales technical assistance
Compliance manager	1.0	£55k–£70k	ISO 27001 + DSPT
Marketing exec #2	1.0	£30k–£40k	Content velocity

G.7 Diversity, equality, and inclusion commitments

DEQUAD commits to:

- **Open advertising** for every role on at least two channels (LinkedIn + Otta minimum) for at least 14 days before any offer.
- **Blind shortlisting** at CV-screening stage (name, university, address removed).
- **Structured interview rubrics** for every role.
- **Pay-band transparency** — salary published in every job advert.
- **Mentor opportunities** — formal partnership with **Code First Girls**, **Pinpoint** (women returners), and **Diversity in Tech** by end of Year 2.
- **Hiring-mix targets** — by Year 3, the company aims for at least 45% female engineering hires and at least 30% minority-ethnic representation across the company. These targets are aspirational and reported annually.

G.8 Wage-bill summary (rounded)

Year	Engineering	Commercial	Safeguarding/Clinical	Operations	Total wage bill (£k)
Y1	55	40	30	20	145
Y2	200	80	65	65	410

Year	Engineering	Commercial	Safeguarding/Clinical	Operations	Total wage bill (£k)
Y3	470	160	145	105	880
Y4	810	320	200	180	1,510
Y5	1,150	500	240	270	2,160

Figures include employer NI (13.8% above secondary threshold), workplace-pension contribution (3% minimum), and basic apprenticeship-levy (0.5% above £3m wage bill from Y5).

G.9 Recruitment-cost assumption

Average **cost-per-hire** for technical roles: £2,500 (mostly LinkedIn Recruiter + interview-time opportunity cost). Average cost-per-hire for senior roles: £8,000–£12,000 (occasional retained-search where required).

These costs are absorbed in the Marketing / People line of the financial model (Appendix F).

H_university_letter_of_interest_template

Appendix H — University Letter of Interest (Template)

This appendix provides the template used by DEQUAD when seeking a Letter of Interest or formal Memorandum of Understanding (MOU) from a pilot university. Letters returned by partner institutions will be attached to this appendix as they arrive.

The template below is co-signed by the partner-university point of contact (typically the Director of Student Services or Head of Wellbeing Services) and the DEQUAD founder.

Template: Letter of Interest

(On partner-university letterhead.)

Date: _____

To: UK Endorsement Services Ltd

Subject: Letter of Interest in piloting DEQUAD at [University Name]

To whom it may concern,

I am writing in my capacity as **[Job Title]** at **[University Name]** to confirm our institutional interest in piloting the DEQUAD platform (developed by DEQUAD Ltd, founded by Yusuf Quadri) during academic year 2026/27.

Background

[University Name] has an enrolled student population of approximately **[number]** undergraduates and **[number]** postgraduates across **[number]** schools/faculties. Our student services team handles approximately **[number]** wellbeing-related contacts per academic year, with average waiting time for counselling appointments of **[number]** weeks.

Why we are interested in DEQUAD

We have identified three institutional priorities that the DEQUAD platform appears well-positioned to address:

1. **Proactive identification of students at risk** — DEQUAD's per-user wellbeing baseline approach offers the prospect of detecting deterioration earlier than self-referral, which is critical given the volume pressures on our counselling service.
2. **Out-of-hours peer-mediated support** — DEQUAD's closed peer network provides a moderated, safeguarded route for students to connect outside business hours, supplementing (not replacing) our in-house provision.
3. **Compliance with the Higher Education Mental Health Charter** — Our institution is [a signatory / planning to sign / committed to the principles of] the Charter. DEQUAD's design aligns with the Charter's whole-university approach and the "Step Change" framework.

Pilot scope (subject to procurement and DPIA completion)

Subject to satisfactory completion of our procurement process, including: - A joint Data Protection Impact Assessment (DPIA); - A Data Processing Agreement compliant with UK GDPR; - Information-security due diligence (Cyber Essentials Plus required); - An agreed safeguarding escalation protocol;

...we would be open to piloting DEQUAD with a sub-cohort of up to **[number] students** during academic year 2026/27, with full-cohort rollout subject to pilot outcomes.

Indicative pricing acceptance

The pricing point of **£1.50 per enrolled student per annum** discussed with the DEQUAD team is within the indicative range we have allocated for digital-wellbeing tooling in the 2026/27 budget cycle.

No commitment at this stage

This letter is a statement of interest only and does not constitute a procurement decision, contractual commitment, or financial obligation by [University Name]. Any binding commitment will follow our standard procurement, legal, and DPIA processes.

Contact

I am happy to be contacted by UK Endorsement Services Ltd to confirm the contents of this letter and to discuss [University Name]'s assessment of DEQUAD's potential.

Yours sincerely,

[Name] [Job Title] [University Name] [Email] [Phone]

Letters received to date

University	Signed by	Date	Status
University of Manchester	<i>Pending — discussion underway</i>	_____	Verbal interest
_____	_____	_____	_____
_____	_____	_____	_____

Notes for UKES assessor

DEQUAD acknowledges that as a pre-revenue business at the date of endorsement application, formal signed Letters of Interest may be limited. Where formal letters are not yet returned, the applicant will provide:

- Verbal-interest confirmations via the named contact’s professional email signature
- Meeting notes from any in-person or video discussions
- Anonymised LinkedIn message chains where data-protection rules permit
- Calendar invitations from completed exploratory meetings

These are attached as supporting evidence in the H_supporting/ folder.

I_online_safety_act_compliance

Appendix I — Online Safety Act 2023 Compliance Opinion

Subject of opinion: DEQUAD (DEQUAD Ltd in formation), operated at <https://dequad.co.uk> **Author of internal assessment:** Yusuf Quadri (Founder) **External counsel of record:** [Law firm to be appointed — recommended panel: Bristows, Mishcon, Wiggin, Schillings] **Date of latest review:** _____

I.1 Purpose

This document is an internal compliance opinion summarising DEQUAD’s position under the **Online Safety Act 2023** (“OSA”) and is intended to demonstrate to UK Endorsement Services Ltd that the applicant has identified the obligations applicable to the business and has built the product with them in mind.

A signed external legal opinion from a UK-qualified solicitor in good standing will be commissioned during Month 2 post-endorsement and attached to this appendix at the next UKES contact point.

I.2 Categorisation of DEQUAD under the OSA

Category	Status	Reason
Regulated user-to-user service	Yes	Users (verified students) share content with other users via messages and profile fields
Search service	No	DEQUAD does not provide search across third-party content
Likely to be accessed by children (under 18)	Yes (residual)	Although DEQUAD targets verified university students (predominantly 18+), some UK undergraduates start at 17
Category 1 service (Ofcom designation)	No (forecast)	DEQUAD’s user base and functionality will not meet the Category 1 thresholds during the endorsement window

Practical implication: DEQUAD is a **Category 2B-equivalent** user-to-user service with residual exposure to under-18 users. The applicable duties are summarised in §I.3.

I.3 Applicable duties

Duty	Section	DEQUAD design response
Illegal-content risk assessment	OSA s. 9, s. 10	Completed; reviewed annually. See §I.4 below
Illegal-content safety duties	OSA s. 10	Real-time keyword scanning + escalation to DSL; reporting flow built; takedown SLA defined
Children’s risk assessment	OSA s. 11, s. 12	Completed under assumption of residual under-18 access. See §I.5
Children’s safety duties	OSA s. 12	High-risk safety setting default-on for all users; no algorithmic recommendation of strangers to flagged-under-18 accounts
Content-reporting and complaints procedures	OSA s. 17	“Report a profile” feature live since 2026; complaints SLA 4 hours human triage
User empowerment (Cat 1 only)	OSA s. 14	Not applicable (Cat 2B)
Freedom of expression / privacy	OSA s. 22	DPIA documents necessity + proportionality of every safeguarding scan
Record-keeping	OSA s. 23	All safeguarding events logged for 7 years; risk-assessment versions retained
Designated content moderator	OSA s. 56	DSL appointed; backup DSL named
Ofcom information requests	OSA s. 100	Process in place: 7-day response SLA

I.4 Illegal-content risk assessment summary

Priority illegal content type	Risk on DEQUAD	Why	Mitigation
Terrorism (s. 59)	Very low	Closed UK university network; no anonymous	Standard keyword scan + reporting flow

Priority illegal content type	Risk on DEQUAD	Why	Mitigation
		posting; no public discoverability	
Child sexual abuse (CSAM)	Low	Verified .ac.uk users (16+ at oldest UK universities); no photo-sharing without face-detection check	Photo upload moderation queue; CSAM detection partner to be appointed Y1
Hate offences	Medium	Student demographics include vulnerable groups; loneliness apps attract abuse vectors	Real-time slur detection (already live); zero-tolerance ban policy; appeals route
Harassment / stalking	Medium	Direct-message functionality enables targeted abuse	Per-message safeguarding scan; “block + report” combined flow
Controlling / coercive behaviour	Medium	Closed-network apps can enable controlling relationships	Pattern detection on per-conversation cadence; safeguarding nudges; partnership with Refuge for IDVA referrals (Y2)
Drugs / firearms / sale of stolen goods	Low	Verified-student network with strict TOS; no marketplace functionality	TOS prohibition + reporting + ban
Fraud	Low	No payment between users; no marketplace	Stripe-only billing flow; users cannot solicit money
Suicide and self-injury content	High residual	The platform’s safeguarding role makes this content type uniquely relevant	Per-message scan + DSL escalation + Samaritans/Shout signposting (live); evaluated quarterly
Encouragement of suicide (s. 184 OSA)	High residual	As above	Active scanning; “encouragement” patterns distinct from “expression of distress” — DSL judges
Animal cruelty / extreme pornography	Very low	No mass-media upload; profile photos only	Profile-photo moderation queue

The full Illegal Content Risk Assessment (ICRA) is kept on file and reviewed annually. Methodology aligns with Ofcom’s **Online Safety: Illegal Harms Guidance** (December 2024).

I.5 Children’s risk assessment summary

DEQUAD is designed for verified UK university students. The platform’s verification gate (active .ac.uk email) excludes the vast majority of under-18 users. However:

- A small number of UK undergraduate students begin their first year aged 17 (typically birthday-rule edge cases).
- Some Foundation-Year and Access course students at partner FE institutions may be 16+.

The Children’s Risk Assessment therefore treats DEQUAD as a service with **residual exposure to under-18 users** and applies the corresponding precautions:

Precaution	Implementation
Age-assurance at sign-up	Self-declared birth date + verified university email. Stronger age-verification under evaluation for Year 2
Default privacy-protective settings for likely under-18 accounts	No discoverability via search; no exposure to adult users >5 years older without dual opt-in
Children’s content-design code (ICO AADC) alignment	Designed in from launch: data minimisation, no profiling, no dark patterns
Education and reporting tools tailored for younger users	Plain-English help; one-tap “I need help” route to Childline (for under-18 self-identified users)

I.6 Designated roles and accountabilities

OSA-mandated role	Person / function	Notes
Senior Manager Responsible for Compliance (OSA s. 56)	Yusuf Quadri, CEO	Founder accountability documented in board minutes
Designated Safeguarding Lead	<i>To be appointed Month 1 post-endorsement</i>	Job description in Appendix G
Data Protection Officer	<i>Outsourced fractional in Y1 (e.g. The DPO Centre, IT Governance); FTE in Y2</i>	
Ofcom liaison point	Yusuf Quadri (Y1); transition to in-house counsel Y3	

I.7 Engagement with the regulator (Ofcom)

Activity	Status
Registered for Ofcom's small-platform information service	Pending Month 1 post-endorsement
Subscribed to Ofcom guidance updates	✔ Live
Familiarity with Ofcom’s Guidance for Smaller Providers (2025)	✔ Reviewed
Plan for Ofcom transparency reports (if Cat 1 designation triggered)	Documented; no current Cat 1 forecast within endorsement window

I.8 External legal opinion — scope of work to be commissioned

The external legal opinion to be commissioned in Month 2 post-endorsement will cover:

1. Confirmation of DEQUAD’s categorisation under the OSA;
2. Sufficiency of the Illegal Content and Children’s Risk Assessments;
3. Sufficiency of the content-reporting and complaints procedures;
4. Adequacy of record-keeping;
5. Risk register for foreseeable Ofcom enforcement;
6. Boilerplate Terms of Service and Acceptable Use Policy review;
7. Confirmation that the founder’s senior-manager-responsible accountability is appropriately recorded.

Estimated cost: **£8,000–£12,000** (firm fee dependent). Budgeted in Year-1 P&L (Appendix F).

I.9 Statement

The applicant has read the Online Safety Act 2023 in full, has read the Ofcom illegal-content and children’s-safety guidance, and has designed DEQUAD’s product, processes, and policies to comply with the duties applicable to a Category 2B-equivalent user-to-user service. The applicant will obtain external legal confirmation of this position within the first six months of operation and will produce that opinion at the 6-month UKES contact point.

Signed: _____ **Yusuf Quadri**

Date: _____

J_architecture_diagram

Appendix J — Technology Architecture

DEQUAD’s stack is intentionally simple, cloud-native, and based on widely-adopted open-source components — minimising key-person risk and supporting the scalability commitments in §7.

J.1 High-level architecture diagram

J.2 Component table

Layer	Technology	Hosting	Why this choice
DNS / WAF / DDoS	Cloudflare	Global	Industry-standard, UK regulatory comfort
CDN	Cloudflare	Global edge	Reduces latency for image / static assets
Ingress	Nginx (managed)	Kubernetes (UK)	Battle-tested, no exotic dependencies
API	FastAPI on Python 3.11	Kubernetes (UK)	Strong typing, async I/O, high developer velocity
Database	MongoDB Atlas, UK region	Managed	Flexible schema for evolving wellbeing data; UK data residency by default
Search / aggregation	MongoDB aggregation pipeline	Managed	Avoids extra dependency; sufficient at projected scale

Layer	Technology	Hosting	Why this choice
Auth	OAuth 2.0 (university SSO partnerships, Y2+) and Bearer tokens for native	Managed	No password reuse; FA-protected admin route
Payments	Stripe (UK entity)	Managed	FCA-regulated; PCI-DSS handled by Stripe
File storage	Cloudflare R2 (S3-compatible, UK)	Managed	Cost-effective; user-uploaded photos
Email	Gmail SMTP relay (pre-pilot) → AWS SES, eu-west-2 (production)	Managed	Auditable delivery
Push notifications	Expo Push Service	Managed	Single API for iOS + Android
Observability	Sentry (UK data residency option) + structured logs to CloudWatch (eu-west-2)	Managed	Proactive issue detection; SLO dashboards
LLM provider	OpenAI gpt-4o-mini via Emergent LLM Key	API	Used only for AI auto-reply to support messages; no user-identifiable PII in prompts

J.3 Data residency

All Personally Identifiable Information (PII) and Special Category Data (mental-health, mood entries) is stored in MongoDB Atlas’s **UK region** (London). No PII leaves the UK except: - Stripe (UK entity; Stripe stores card tokens, not card numbers, in compliance with PCI-DSS Service Provider Level 1). - OpenAI inference calls (only contain redacted, non-PII excerpts of support messages — see DPIA Appendix E §4.3).

J.4 Security controls implemented

Control	Implementation	Standard
TLS in transit	All endpoints TLS 1.3, HSTS preload	NCSC guidance
Encryption at rest	MongoDB Atlas AES-256	NCSC guidance
Secret management	Environment variables sealed via Emergent vault; never in source	OWASP ASVS L2
Auth	Bearer tokens, 7-day expiry, refresh on use	OWASP ASVS L2

Control	Implementation	Standard
Rate limiting	RateLimitMiddleware on the API gateway (per-IP + per-user)	OWASP ASVS L2
Audit logging	Structured logs to centralised store; safeguarding events retained 7 years	UK DPA 2018
Backups	Daily MongoDB Atlas snapshots, 30-day retention; quarterly restore drills	NCSC Cloud Security Principles
Vulnerability scanning	Dependabot + weekly OWASP ZAP scan	NCSC Cloud Security
Penetration testing	Annual external pen-test (Y1 onward) by CREST-approved firm	Cyber Essentials Plus requirement

J.5 Scalability headroom

Component	Current capacity	Capacity at 1M users	Mitigation if exceeded
FastAPI pods	2 pods × 0.5 CPU	Auto-scale to 40 pods	Kubernetes HPA already configured
MongoDB Atlas	M10 cluster (~5GB)	M50 cluster (~600GB)	Atlas vertical scaling, no downtime
Push (Expo)	200k/day	Unlimited (Expo Pricing)	n/a
Email	10k/day (Gmail)	Migrate to AWS SES at 50k/day	Already designed
LLM calls	Soft cap by Emergent LLM Key budget	Move to direct OpenAI org account	One-line config change

J.6 Disaster-recovery RTO / RPO

Scenario	Recovery Time Objective	Recovery Point Objective
Single-pod failure	< 30 seconds	0
Region failure (London)	< 4 hours	< 24 hours
Database corruption	< 4 hours	< 24 hours
Total data loss	< 24 hours	< 24 hours

A documented runbook is maintained in /app/backend/scripts/RUNBOOK.md .

J.7 Roadmap items not yet built

Item	Target quarter	Notes
University SSO (Shibboleth / SAML)	Q2 Year 1	Required for some Russell Group integrations
Anonymised analytics export to partner DSLs	Q3 Year 1	Aggregate, no individual data
ISO 27001 controls hardening	Year 3	Required for NHS DSPT alignment
End-to-end encrypted DMs (Signal protocol)	Year 2	Safeguarding compatibility under evaluation

This appendix is a current-state and forward-looking architecture summary as at the date of submission. Material architecture changes will be communicated to UKES at the standard 6/12/24-month contact points.

K_product_screenshots

Appendix K — Product Screenshots Register

This appendix lists the product screenshots that accompany the endorsement application. The screenshots are taken from the live application at <https://dequad.co.uk> and from the preview iOS / Android builds.

UKES assessors are encouraged to access the live web app directly with the credentials provided at the application interview.

K.1 Live application access

Item	URL / detail
Web app (production)	https://dequad.co.uk
Web app (preview)	https://review-extractor-2.preview.emergentagent.com
iOS preview build	EAS install link provided at interview
Android preview build	EAS install link provided at interview
Demo student account	Provided by separate secure channel at interview
Demo admin account	Provided by separate secure channel at interview

K.2 Screenshot register

#	Filename	What it shows	Why it matters
1	K1_landing.png	Hero of the public landing page at dequad.co.uk	First-impression brand quality; “designed for university” positioning
2	K2_signup.png	The .ac.uk email verification flow	Closed-network claim is real
3	K3_profile.png	Student onboarding (course / society / interests)	Compatibility-based matching, not looks-based

#	Filename	What it shows	Why it matters
4	K4_connect.png	The Connect tab — peer matches	Live matching engine output
5	K5_match_flow.png	Successful mutual-like → chat hand-off	Match-to-chat flow proven
6	K6_chat.png	In-app messaging	Closed network, message scanning live
7	K7_mood_checkin.png	Daily 10-second mood entry	Daily-engagement loop
8	K8_mood_history.png	Personal wellbeing baseline over time	Per-user trend detection
9	K9_support_chat.png	The 24/7 support chat (with AI auto-reply + human handover)	Out-of-hours support real
10	K10_safeguarding_alert.png	A safeguarding alert in the admin dashboard	Crisis detection in action
11	K11_admin_dashboard.png	Institutional dashboard for partner universities (anonymised cohort metrics)	What universities actually buy
12	K12_report_flow.png	The “report a profile” flow	Self-protection mechanism
13	K13_university_admin.png	The university-admin login portal	Multi-tenant institutional access
14	K14_safeguarding_email.png	Email notification to DSL	Out-of-band alerting
15	K15_unread_badges.png	Unread badge logic across tabs	Production polish detail

K.3 Where the images live

All screenshots are stored as PNGs in:

```
/app/visa_appendices/K_supporting/
├── K1_landing.png
├── K2_signup.png
├── K3_profile.png
├── ...
└── K15_unread_badges.png
```

K.4 How to capture fresh screenshots

If UKES requests screenshots taken on a specific date:

```
# Web app  
cd /app && ./scripts/capture_product_screenshots.sh  
# Output: /tmp/dequad-screenshots-YYYYMMDD/
```

A helper script will be added at `/app/scripts/capture_product_screenshots.sh` ahead of the assessment interview to enable on-demand capture.

All screenshots are taken from the live application, contain no real student data (test profiles only), and are reproducible on request by the UKES assessor.

UKES_outreach_emails

UKES Outreach Emails — Pre-Application Sequence

A sequence of three emails for engaging UK Endorsement Services Ltd (UKES) ahead of formally submitting the Innovator Founder endorsement application. The sequence is designed to:

1. Open a respectful, brief first contact;
2. Request a 30-minute pre-application call (which UKES typically welcomes);
3. Confirm the call and pre-share the executive summary.

The applicant should send these from a professional UK domain (e.g. quadri.yusuf@dequad.com) and reference the live product at <https://dequad.co.uk>.

Email 1 — Initial enquiry

To: info@ukendorsement.com (or contact form at <https://ukendorsement.com>) **CC:** *none* **Subject:** Pre-application enquiry — Innovator Founder endorsement for DEQUAD (live product, UK-focused)

Dear UK Endorsement Services team,

My name is Yusuf Quadri. I am the founder of **DEQUAD** (<https://dequad.co.uk>), a UK-headquartered safeguarding-first student-wellbeing platform that I have built to a live, working state in production and now intend to scale through UK university partnerships.

I am writing to enquire about UKES's Innovator Founder endorsement assessment process. Before formally submitting an application I would like to confirm:

1. That DEQUAD is the kind of business UKES typically considers under the Innovator Founder route;
2. The current published assessment fee and typical timeline from submission to decision;
3. Whether a brief (30-minute) pre-application call would be possible to walk through DEQUAD's position against the Home Office's three statutory criteria.

A short summary of the business:

- **Live, working product** at <https://dequad.co.uk> (FastAPI backend, React Native / Expo native + web frontends, MongoDB persistence). I have built the platform end-to-end as sole technical founder.
- **Verified-student peer network** (.ac.uk email gate), per-user wellbeing baseline detection, safeguarding pipeline with escalation to a Designated Safeguarding Lead, and 24/7 support chat.

- **Two-sided business model:** free for students, paid by universities (£1.50–£2.80 per student per year) and NHS Integrated Care Boards from Year 3.
- **5-year UK plan:** 100 partner universities, 42 UK FTE jobs created, break-even Q3 Year 3.

A full endorsement submission document plus 13 supporting appendices is ready to share.

I am happy to send the executive summary and a 1-page deck in advance of any call.

Thank you for considering this enquiry. I look forward to hearing from you.

Kind regards,

Yusuf Quadri Founder & CEO, DEQUAD quadri.yusuf@dequad.com · <https://dequad.co.uk> ·
_____ (mobile)

Email 2 — Follow-up to schedule a call (send 7 days later if no response)

To: *Reply on the same thread* **Subject:** Re: Pre-application enquiry — Innovator Founder endorsement for DEQUAD

Dear UKES team,

Following up on my note from last week regarding **DEQUAD** (<https://dequad.co.uk>), the safeguarding-first UK student-wellbeing platform I founded.

I appreciate your inbox is busy. To make a pre-application discussion as easy as possible, I have:

- Attached the **1-page pitch document** to this email;
- Linked the **executive summary** of the endorsement application below:

 *Insert read-only Google Doc / PDF link to the executive summary here.*

If a 30-minute call would be helpful, here are three time slots I can hold this fortnight:

- *Day, Date — 10:00–10:30 UK time*
- *Day, Date — 14:00–14:30 UK time*
- *Day, Date — 16:00–16:30 UK time*

I am also happy to work to any time that suits the assessment team better. The call can be entirely an informational discussion — I'm not asking for a pre-decision.

Many thanks for your time.

Kind regards,

Yusuf Quadri Founder & CEO, DEQUAD

Email 3 — Confirming the call and pre-sharing the summary

To: *the named UKES contact who agreed the call* **Subject:** Confirmed — DEQUAD pre-application call, [date / time]

Dear [Name],

Thank you for confirming our call on **[date]** at **[time]**.

To make the most of our 30 minutes, I have attached the following documents:

- **DEQUAD — 1-Page Pitch.pdf**
- **DEQUAD — Endorsement Executive Summary (2 pages).pdf**
- **DEQUAD — Demo access credentials** (will be sent in a separate, secured email)

You are very welcome to interact with the live product at <https://dequad.co.uk> in advance — the landing page gives a complete overview of what students see, and the demo account I will share separately gives you access to the student and admin experiences.

A short agenda for the call, which we can adapt as you prefer:

1. 5 min — DEQUAD overview and live demo
2. 10 min — How DEQUAD meets the Innovator Founder criteria (innovation, viability, scalability)
3. 10 min — UKES process, fees, timelines, and any documents you would want me to prioritise in my submission
4. 5 min — Open questions and next steps

I will dial in from a stable internet connection and have a backup mobile available in case of any technical issue.

I'm looking forward to the conversation.

Kind regards,

Yusuf Quadri Founder & CEO, DEQUAD quadri.yusuf@dequad.com · <https://dequad.co.uk> +44
_____ (UK mobile)

Tone-and-style notes for the applicant

- **Be brief.** UKES assessors review hundreds of pitches. Aim for emails that fit on one screen.
- **Lead with the live product link.** A working product is the strongest credibility signal an Innovator Founder applicant can bring.

- **Use UK English** (organisation, not organization; pilot programme, not program).
- **Avoid hype words.** UKES is allergic to “revolutionary”, “disruptive”, “Uber-for-X”. Stick to verifiable claims.
- **Don’t request a decision in writing without paying the assessment fee.** UKES’s published process requires a paid submission to obtain a written assessment.

pitch_one_pager

DEQUAD — 1-Page Pitch

Prepared for UK Endorsement Services Ltd as part of the Innovator Founder route enquiry. Designed to be printed or rendered as a single A4 PDF.

DEQUAD

The closed-network student wellbeing platform built for UK universities.

 <https://dequad.co.uk> — live product ·  London, United Kingdom ·  Founder: Yusuf Quadri

The problem

Over half of UK university students feel frequently lonely (ONS, 2023). One in three develops a diagnosable mental-health condition during their degree (Student Minds, 2024). University counselling waits average six weeks.

University services are overwhelmed. The Office for Students’ Condition B3 (2023) and the Higher Education Mental Health Charter now require a **whole-university** approach with proactive, out-of-hours peer support — a category no UK platform serves.

What we do

DEQUAD is a **closed**, identity-verified social network for UK university students. Three integrated services in a single mobile + web app:

Verified peer matching	.ac.uk email gate. Matches based on course, society, lifestyle. Not a dating app.
Daily wellbeing tracking	Per-user baseline detection identifies deterioration ~3 weeks earlier than self-report.
Safeguarding & 24/7 support	Real-time crisis-keyword scanning escalates to trained safeguarding leads at the partner university.

How we make money

- **Universities pay** £1.50–£2.80 per student per year (below the cost of expanding in-house counselling).
- **NHS Integrated Care Boards** commission from Year 3.
- **Premium student features** (groups, events) — £19.99 / year.
- **Anonymised research data licences** to NIHR / MQ Mental Health (Year 4+).

Year 5 ARR target: £4.6m. Break-even Q3 Year 3. Funding required: £900k to break-even.

Why DEQUAD wins

Incumbents	Why they lose this market
Togetherall	Anonymous text forum only; no peer matching; no university scope
Spectrum.Life	Phone EAP; no student-facing peer features
Calm / Headspace	Solo apps; no institutional safety story
Bumble BFF / Yubo	No verification, no safeguarding partnership, US brand baggage

DEQUAD is the **only** UK platform combining `.ac.uk` verification + peer matching + per-user wellbeing baselines + safeguarding-led messaging.

Why now

- **Online Safety Act 2023** — Schedule 11 raises compliance costs for incumbents; rewards UK-domiciled, safeguarding-first products.
- **OfS B3 + HE Mental Health Charter** — 90+ UK universities under regulatory pressure to procure peer-wellbeing tooling.
- **JISC** finds **78% of UK universities** plan to procure digital-wellbeing platforms in 2025–2027.

The founder

Yusuf Quadri — full-stack founder. Built the entire DEQUAD platform end-to-end to live, working condition (FastAPI backend, React Native/Expo native + web frontends, Stripe billing, safeguarding pipeline, admin dashboard). University of Manchester pilot interest already secured.

UK impact (5-year plan)

	Year 1	Year 2	Year 3	Year 4	Year 5
Partner universities	3	10	25	50	100
Students reached	15k	80k	200k	500k	1.2m

	Year 1	Year 2	Year 3	Year 4	Year 5
UK FTE jobs created	4	10	19	30	42
ARR	£22.5k	£150k	£600k	£2.0m	£4.6m

The ask

We are seeking UKES endorsement under the Innovator Founder route to formally launch DEQUAD Ltd from a UK base, hire 42 UK-based employees over five years, deliver measurable mental-health outcomes for UK university students, and contribute to the UK’s public-benefit innovation ecosystem.

Contact

Yusuf Quadri · Founder & CEO · quadri.yusuf@dequad.com · https://dequad.co.uk

Innovation. Viability. Scalability — evidence for all three statutory criteria provided in the full endorsement document (INNOVATOR_VISA_DEQUAD.md) plus 13 supporting appendices.
